Mediating Nature Nils Lindahl Elliot, 2013-04-15 Mediating Nature provides a history of the present nature of mass mediation It examines the ways in which a number of discourses technologies and institutions have historically shaped the current ways of imagining nature in the mass media Where much of the existing research treats mass mediation as a matter of media technologies texts or institutions this text adopts a somewhat different approach it considers mass mediation as a historical process by means of which the members of audiences and indeed the public more generally came to be incorporated as observers in and of mass culture This approach allows the book to investigate the roles that a wide range of genres relating to nature played in constructing senses of nature but also of mass culture itself The genres include landscape paintings and gardens modern zoos photography early cinema nature essays disaster and animal attack films as well as wildlife documentaries on television The investigation develops what Lindahl Elliot describes as a social semeiotic approach that combines the semeiotic theory of Charles Peirce with a historical sociology of cultural formations Topical and timely this fascinating book will be of great interest to students and researchers in the fields of media sociology cultural geography and environmental studies

The Nature of Politics Annette A. LaRocco, 2024-04-16 This case study of Botswana focuses on the state building qualities of biodiversity conservation in southern Africa Drawing on extensive fieldwork Annette A LaRocco argues that discourses and practices related to biodiversity conservation are essential to state building in the postcolonial era These discourses and practices invoke the ways the state exerts authority over people places and resources enacts and remakes territorial control crafts notions of ideal citizenship and identity and structures economic relationships at the local national and global levels The book's key innovation is its conceptualization of the conservation estate a term most often used as an apolitical descriptor denoting land set aside for the purpose of conservation LaRocco argues that this description is inadequate and proposes a novel and much needed alternative definition that is tied to its political elements The components of conservation control over land policing of human behavior and structuring of the authority that allows or disallows certain subjectivities render conservation a political phenomenon that can be analyzed separately from considerations of nature or wildlife In doing so it addresses a gap in the scholarship of rural African politics which focuses overwhelmingly on productive agrarian dynamics and often fails to recognize that land nonuse can be as politically significant and wide reaching as land use Botswana is an ideal empirical case study upon which to base these theoretical claims With 39 percent of its land set aside for conservation Botswana is home to large populations of wildlife particularly charismatic megafauna such as the largest herd of elephants on the continent Utilizing more than two hundred interviews participant observation and document analysis this book examines a series of conservation policies and their reception by people living on the conservation estate These phenomena include securitized antipoaching enforcement a national hunting ban 2014 19 restrictions on using wildlife products forced evictions from conservation areas limitations on mobility and freedom of movement the political economy of Botswana's wildlife tourism industry and the conservation of globally important charismatic megafauna species

Financial crises and the nature of capitalist money Jocelyn Pixley, 2013-09-12 This volume is a debate about a sociology and economics of money a form of positive trespassing It is unique in being written by scholars of both disciplines committed to this mutual venture and in starting from the original groundwork laid by Geoffrey Ingham The contributors look critically at money's institutions and the meanings and history of money creation and show the cross cutting purposes or incommensurable sides of money and its crises These arise from severe tensions and social conflicts about the production of money and its many purposes We demonstrate the centrality of money to capitalism and consider social disorders since the 2007 crisis which marks the timeliness and need for dialogue Both disciplines have far too much to offer to remain in the former damaging standoff While we are thankful to see a possible diminution of this split remnants are maintained by mainstream economic and sociological theorists who after all the crises of the past 30 years and many before still hold to an argument that money really does not matter We suggest to many different and interested audiences that since money is a promise understanding this social relation must be a joint though plural task between economics and sociology at the very least
