The Hate Project Kris Ripper, 2021-04-27 This is a delight Publishers Weekly This arrangement is either exactly what they need or a total disaster Oscar is a grouch That s a well established fact among his tight knit friend group and they love him anyway Jack is an ass Jack who s always ready with a sly insult who can t have a conversation without arguing and who Oscar may or may not have hooked up with on a strict no commitment one time only basis Even if it was extremely hot Together they re a bickering combative mess When Oscar is fired answering phones is not for the anxiety ridden he somehow ends up working for Jack Maybe while cleaning out Jack s grandmother s house they can stop fighting long enough to turn a one night stand into a frenemies with benefits situation The house is an archaeological dig of love and dysfunction and while Oscar thought he was prepared he wasn t It s impossible to delve so deeply into someone s past without coming to understand them at least a little but Oscar has boundaries for a reason even if sometimes Jack makes him want to break them all down After all hating Jack is less of a risk than loving him Carina Adores is home to romantic love stories where LGBTQ characters find their happily ever afters *The Love Study Book 1 The Love Study Book 2 The Hate Project Book 3 The Life Revamp* Also by Kris Ripper Book Boyfriend

*The Scientific Method* Henry M. Cowles, 2020-04-14 The surprising history of the scientific method from an evolutionary account of thinking to a simple set of steps and the rise of psychology in the nineteenth century The idea of a single scientific method shared across specialties and teachable to ten year olds is just over a hundred years old For centuries prior science had meant a kind of knowledge made from facts gathered through direct observation or deduced from first principles But during the nineteenth century science came to mean something else a way of thinking The Scientific Method tells the story of how this approach took hold in laboratories the field and eventually classrooms where science was once taught as a natural process Henry M Cowles reveals the intertwined histories of evolution and experiment from Charles Darwin s theory of natural selection to John Dewey s vision for science education Darwin portrayed nature as akin to a man of science experimenting through evolution while his followers turned his theory onto the mind itself Psychologists reimagined the scientific method as a problem solving adaptation a basic feature of cognition that had helped humans prosper This was how Dewey and other educators taught science at the turn of the twentieth century but their organic account was not to last Soon the scientific method was reimagined as a means of controlling nature not a product of it By shedding its roots in evolutionary theory the scientific method came to seem far less natural but far more powerful This book reveals the origin of a fundamental modern concept Once seen as a natural adaptation the method soon became a symbol of science s power over nature a power that until recently has rarely been called into question

*Why Math Must Replace Science* Mike Hockney, 2014-11-03 The greatest catastrophe in intellectual history was to regard physics as real and mathematics as an unreal abstraction In fact mathematics is noumenal true reality and physics is phenomenal illusory reality Mathematics tells you what things are in themselves and physics tells you how they appear to us Mathematics is the perfect

ground of existence defined by the God Equation It s the source of causation determinism and objective reality all of the things now formally denied by physics which claims that observable reality is indeterministically born of unreal potentiality wavefunctions It s time to replace the scientific method with the mathematical method It s time to recognize that true reality is intelligible not sensible noumenal not phenomenal unobservable not observable metaphysical not physical hidden not manifest rationalist not empiricist necessary not contingent Don t follow the crowd Think for yourself The Love Study Kris Ripper,2020-09-29 A warmly appealing romance BookPage What happens when the search for the perfect date goes perfectly wrong Declan has commitment issues He s been an office temp for literally years now and his friends delight in telling people that he left his last boyfriend at the altar And that s all true But he s starting to think it s time to start working on his issues Maybe When Declan meets Sidney a popular nonbinary YouTuber with an advice show an opportunity presents itself as part of The Love Study Declan will go on a series of dates arranged by Sidney and report back on how the date went in the next episode The dates are sort of blah It s not Sidney s fault the folks participating are mostly great people but there s no chemistry there Maybe Declan s just broken Or maybe the problem is that the only person he s feeling chemistry with is Sidney Carina Adores is home to romantic love stories where LGBTQ characters find their happily ever afters The Love Study Book 1 The Love Study Book 2 The Hate Project Book 3 The Life Revamp Also by Kris Ripper Book Boyfriend **The American Engineer** ,1884 *Dictionary of Christianity and Science* Zondervan,2017-04-25 The definitive reference work on science and Christian belief How does Christian theology relate to scientific inquiry What are the competing philosophies of science and do they work with a Christian faith based on the Bible No reference work has covered this terrain sufficiently until now Featuring entries from over 140 international contributors the Dictionary of Christianity and Science is a deeply researched peer reviewed fair minded work that illuminates the intersection of science and Christian belief In one volume you get reliable summaries and critical analyses of over 450 relevant concepts theories terms movements individuals and debates You will find answers to your toughest questions about faith and science from the existence of Adam and Eve to the age of the earth evolution and string theory FEATURES INCLUDE Over 450 entries that will help you think through some of today s most challenging scientific topics including climate change evolution bioethics and much more Essays from over 140 leading international scholars including Francis Beckwith Michael Behe Darrell Bock William Lane Craig Hugh Ross Craig Keener Davis Young John Walton and many more Multiple view essays on controversial topics allow you to understand and compare differing Christian viewpoints Learn about flesh and blood figures who have shaped the interaction of science and religion Augustine Aquinas Bacon Darwin and Stephen Hawking are just the beginning Fully cross referenced entries include references and recommendations for further reading Advance Praise Every Christian studying science will want a copy within arm s reach Scot McKnight Northern Seminary This is an invaluable resource that belongs in every Christian s library I will be keeping my copy close by when I m writing Lee Strobel Elizabeth and John Gibson chair of apologetics Houston Baptist
