

A photograph of a garment factory. In the foreground, a young man in a white shirt is focused on his work at a sewing machine. Behind him, a woman in a red shirt is also working. Further back, another woman in a light blue shirt is visible. The background is filled with more workers and sewing machines, creating a sense of a busy industrial environment. The lighting is bright, and the overall tone is professional.

Approaches and Corporate Social Responsibility Adaeze Okoye, 2016-12-08 From the late 20th Century a catalogue of high profile disasters and controversies has drawn attention to the changing relationship between corporations and society This is taking place against the context of globalisation and this change has become the driving force for demands that

corporations become socially responsible Corporate social responsibility CSR has therefore emerged as a concept which attempts to encapsulate these demands for social responsibility Yet at the heart of CSR is the debate about the role and relevance of law This book will explore the proposition that CSR is a valid legal enquiry and will suggest a law jobs approach which offers a potential general analytical perspective for examining such fluid concepts such as CSR in law This approach is innovative because of the insistence of some users of CSR on placing law outside the parameters of CSR or giving it a very limited role however Okoye argues here that the very nature of CSR as seeking legitimacy for corporate power pushes to the fore the question of what role law can play Law is an essential and important aspect of legitimacy and thus this work explores a legal theoretical approach that holds potential for a legal framework of CSR This interdisciplinary book will be of great interest to students and scholars of corporate law and business studies in general

Meta-Regulation in Practice F.C. Simon, 2017-06-26 Meta regulation presents itself as a progressive policy approach that can manage complexity and conflicting objectives better than traditional command and control regulation It does this by harnessing markets and enlisting a broad range of stakeholders to reach a more inclusive view of the public interest that a self regulating business can then respond to Based on a seventeen year study of the Australian energy industry and via the lens of Niklas Luhmann's systems theory Meta Regulation in Practice argues that normative meta regulatory theory relies on questionable assumptions of stakeholder morality and rationality Meta regulation in practice appears to be most challenged in a complex and contested environment the very environment it is supposed to serve best Contending that scholarship must prioritise an understanding of communicative possibilities in practice this book will be of interest to undergraduate and postgraduate students as well as postdoctoral researchers interested in subjects such as business regulation systems theory and corporate social responsibility Please visit meta-regulation.com for more insightful information on meta regulation and Meta Regulation in Practice
