The Modern Land Grant University:

The Modern Land-grant University Robert J. Sternberg, 2014 Contributors from across the university focus on what the land grant mission means to them in their daily endeavors whether that be crafting the undergraduate academic experience stimulating research or engaging with the community through extension activities The twenty contributions are divided into four parts exploring in turn the core mission of the modern land grant university the university environment the university's public value and its accountability The volume ends with an epilogue by the editor which summarizes the values underlying the activities of land grant institutions In a time of uncertainty in higher education this volume provides a helpful overview of the many different types of value public universities bring to American society *The Modern Land-Grant University* Robert J. Sternberg, 2014-11-15 In an increasingly competitive higher education environment Americas public universities are seeking ways to differentiate themselves This book suggests that a hopeful vision of what a university should be lies in a reexamination of the land grant mission the common system of values originally set forth in the Morrill Land Grant Acts of 1862 and 1890 which established a new system of practically oriented higher learning across the United States While hard to define these values are often expressed by the one hundred or so institutions that currently define themselves as land grants under the three pillars of research teaching and engagement extension In order to understand the unique character of a modern land grant institution this book focuses especially but not exclusively on the multiple components of a single organization Oklahoma State University founded in 1890 and currently enrolling 35 000 students across five campuses Contributors from across the university focus on what the land grant mission means to them in their daily endeavors whether that be crafting the undergraduate academic experience stimulating research or engaging with the community through extension activities The twenty contributions are divided into four parts exploring in turn the core mission of the modern land grant university the university environment the university's public value and its accountability The volume ends with an epilogue by the editor which summarizes the values underlying the activities of land grant institutions In a time of uncertainty in higher education this volume provides a helpful overview of the many different types of value public universities bring to American society It also offers a powerful vision of a future founded on land grant ideas that will be inspiring to university administrators and trustees other educational policymakers and faculty and staff especially those fortunate enough to be part of land grant institutions **Institutional Diversity in American Postsecondary Education** Tiffany J. Davis, Shelley Price-Williams, Pietro A. Sasso, 2024-07-01 The glossy and polished college videos view books and websites catered to the marketplace of students Some recruitment brochures often discuss famous alumni athletics championships and a vibrant student life Particularly at research universities marketing materials may even focus on entrepreneurs and medical discoveries These types of colleges along with others compromise the marketplace of higher education in which different types of colleges exist across a spectrum of missions institutional sagas and histories Within this

marketplace is a bewildering and disorienting catalog of different institutional types and classifications. This marketplace also exists within a conglomerate of rankings and ratings that are ordered by US News World Report and Peterson's. Such rankings are often connected to a larger quest for prestige and primarily facilitated by these private sector publications but are juxtaposed to the higher education industry created Carnegie Classification system. The Carnegie Classification system was created as an approach to differentiate the more than 4,000 institutions by size, mission, and scope for research and policy analysis. However, this system is also integrated into broader hierarchies of accreditation and funding. However, the continued reclassification of the system in 2005, 2010, and the addition of new categories in 2018 such as doctoral professional has advanced to call attention to and emphasize the importance of the considerable institutional diversity of U.S. higher education (2005, p. 52). However, these typologies do not fully describe or conceptualize the organizational, administrative, culture, or student experiences of each of these typologies. The rankings guides and the Carnegie Classification systems often overlook more nuanced institutional types such as faith-based or works colleges. They also overlook the role and impact of Minority Serving Institutions (MSI). This lack of recognition often facilitates continued invisibility for different institutional types and the diverse multiple student populations they may educate and support. Therefore, this edited text seeks to expand and further the Carnegie Classification system typology and beyond the private sector rankings. This text is a response to a call for existential exploration as an attempt to critically revivify our understanding of the various institutional types and is inspired by the words of David Thorton Moore in which it might be heartening to see a cadre of faculty and critical scholars facilitate a form of discourse in which teachers and students conduct an unfettered investigation of social institutions, power relations, and value commitment. In this text, the authors describe and problematize the various institutional types as defined by accreditation, Carnegie classification, and private sector rankings.

FIGHT SONG Peter Woan, 2024-02-22 Every nation's past is prologue to its present and every nation's story unfolds in its own way. In this book, a native Englishman and long-time resident of the United States proposes four defining narratives that have helped fashion the nation's progression toward becoming America: westward expansion and a fascination for the moving frontier; hunger for land reflected in national expansion through nineteenth-century geopolitical acquisitions; and the desire of individual Americans to grab their own piece of territory leading to the iconic Homestead Act of 1862, the land grant college movement culminating in Justin Morrill's 1862 landmark legislation representing a shift away from higher education dominated by religious imperatives to a more secular model with significant state sponsorship; the GI Bill of Rights enacted in 1944 for servicemen and women returning from WW II and which provided among other benefits a free college education for millions of veterans. These four themes are brought together through the uniquely American phenomenon of college football.

Proceedings of the National Association of State Universities and Land-Grant Colleges Association of State Universities and Land-Grant Colleges. Convention, American Association of Land-Grant Colleges and State Universities. Convention, Association of American

Agricultural Colleges and Experiment Stations. Convention, National Association of State Universities and Land-Grant Colleges. Convention, 1907 **Service as Mandate** Alan I Marcus, 2015-12-31 Completing a comprehensive history of America's land grant universities begun in Science as Service the thirteen original essays in Service as Mandate examine how these great institutions both changed and were changed by the late twentieth and early twenty first centuries

Strategic Planning in Higher Education James F. Williams, 1991 In this refreshing new volume strategic planning of budget management is looked at with a broad positive perspective Whether because of cuts in funding enrollment decline or academic cutbacks the necessity for strategic planning in a university comes out of unfavorable circumstances The chapters cover the planning process from start to finish with an emphasis on a final goal of bringing the library's status from one of an economic competitor to a deserving equal in the eyes of the academic community The development of programs and long term goals for various programs with realistic results in mind are stressed in this timely book Strategic planning can be an effective managing tool in the midst of uncertainty and constant change Cooperation collaboration and communication are all essentials for reaching this goal and the authors of the 13 chapters describe in detail past instances in which these were successful Readers will find that several major themes tie the diverse chapters of this book together such as becoming successful in applying for limited institutional resources giving the library's goals a more prominent position among the members of the campus administration and using the planning exercise to help the members of the academic community better understand the administrative decision making process Written by college and university presidents campus planners and librarians this book clearly outlines the methods and benefits of strategic planning and provides an encouraging picture of what can be achieved when the process is used
