The Model Maker A World War II Veteran S Story:

The Model Maker Brett S. Weber, 2006 *The Model Maker* is inspired by the personal account of a World War II veteran's experiences during the Battle of the Bulge. Bill spends a good deal of his time working on his model airplanes. They mean more to him than just a usual hobby; however, they remind him of a time and a place when these models were replaced with real planes and his tranquil rural setting was replaced with gunfire, thick forests, and an ever-present danger. Through his models, he recalls his story in a simple, quiet way that belies the harsh reality of the Battle of the Bulge. This story is meant to capture the interest of the young reader and to serve as a springboard into an important historical lesson. The event of World War II was a pivotal point in modern history. It is imperative that the lessons learned by this Greatest Generation should never be lost or forgotten.

Congressional Record United States. Congress, 2002. *The Congressional Record* is the official record of the proceedings and debates of the United States Congress. It is published daily when Congress is in session. The *Congressional Record* began publication in 1873. Debates for sessions prior to 1873 are recorded in *The Debates and Proceedings in the Congress of the United States* 1789-1824, the *Register of Debates in Congress* 1824-1837, and the *Congressional Globe* 1833-1873.

The Oxford Companion to American Military History, **Employment Security Review**, 1945 **Employment Service Review**, 1946 **Employment Security Review** United States. Bureau of Employment Security, 1945 [Improving the Presumptive Disability Decision-Making Process for Veterans](#) Institute of Medicine, Board on Military and Veterans Health, Committee on Evaluation of the Presumptive Disability Decision-Making Process for Veterans, 2008-05-15. The United States has long recognized and honored the service and sacrifices of its military and veterans. Veterans who have been injured by their service, whether their injury appears during service or afterwards, are owed appropriate health care and disability compensation. For some medical conditions that develop after military service, the scientific information needed to connect the health conditions to the circumstances of service may be incomplete. When information is incomplete, Congress or the Department of Veterans Affairs (VA) may need to make a presumption of service connection so that a group of veterans can be appropriately compensated. The missing information may be about the specific exposures of the veterans or there may be incomplete scientific evidence as to whether an exposure during service causes the health condition of concern. For example, when the exposures of military personnel in Vietnam to Agent Orange could not be clearly documented, a presumption was established that all those who set foot on Vietnam soil were exposed to Agent Orange. The Institute of Medicine (IOM) Committee was charged with reviewing and describing how presumptions have been made in the past and, if needed, to make recommendations for an improved scientific framework that could be used in the future for determining if a presumption should be made. The Committee was asked to consider and describe the processes of all participants in the current presumptive disability decision-making process for veterans. The Committee was not asked to offer an opinion about past presumptive decisions or to suggest specific future presumptions. The Committee heard from a

range of groups that figure into this decision making process including past and present staffers from Congress the VA the IOM veterans service organizations and individual veterans The Department of Defense DoD briefed the Committee about its current activities and plans to better track the exposures and health conditions of military personnel The Committee further documented the current process by developing case studies around exposures and health conditions for which presumptions had been made Improving the Presumptive Disability Decision Making Process for Veterans explains recommendations made by the committee general methods by which scientists as well as government and other organizations evaluate scientific evidence in order to determine if a specific exposure causes a health condition

The Public-Private Health Care State Rosemary A. Stevens,2009-06-30 The distinctive mixing and continuous remixing of public and private roles is a defining feature of health care in the United States The Public Private Health Care State explores the interweaving of public and private enterprise in health care in the United States as a basis for thinking about health care in terms of its history and its continuing evolution today Historian and policy analyst Rosemary Stevens has selected and edited seventeen essays from both her published and unpublished work to illustrate continuing themes such as the flexible meanings of the terms public and private and how useful their ambiguity has been and is the role of ideology as ratifying rather than preordaining change and the common behavior of public leaders and corporate entities in the face of fiscal opportunity The topics covering the period of 1870 through the twenty first century represent Stevens research interests in hospital history and policy the medical profession government policy and paying for health care The volume also considers her involvement with policy

questions which include health services research health maintenance organizations and physician workforce policy Section I demonstrates the long history of state government involvement with private not for profit hospitals from the 1870s through the 1930s Section II examines the federal role in health care from the 1920s through the 1970s including the establishment of veterans hospitals and the implementation of Medicaid Section III shows how shifting governmental roles require constantly changing organizing rhetoric whether for inventing a federal role for health services research and HMOs regionalization in the 1970s or defining civil rights and equity as mobilizing vehicles in the 1980s Section IV examines growing concerns from the 1970s through the present about the traditional public role of the largely private medical profession Section V returns to the ambiguous public private status of not for profit hospitals buffeted in the 1980s and 1990s by assumptions about the efficiency of the market *Soldiers*, 2000 *Soldiers to Citizens* Suzanne Mettler, 2007-09-10 Drawing on extensive interviews and surveys with hundreds of members of the greatest generation Suzanne Mettler finds that by treating veterans as first class citizens and in granting advanced education the G I Bill inspired them to become the active participants thanks to whom memberships in civic organizations soared and levels of political activity peaked

Renegotiating First World War Memory Ashley Garber, 2021-06-29 First World War based ex servicemen s organisations found themselves facing an existential crisis with the onset of the Second World War This book examines how two such groups the British and American Legions adapted cognitively to the emergence of yet another world war and its veterans in

the years 1938 through 1946 With collective identities and socio political programmes based in First World War memory both Legions renegotiated existing narratives of that war and the lessons they derived from those narratives as they responded to the unfolding Second World War in real time Using the previous war as a learning experience for the new one privileged certain understandings of that conflict over others inflecting its meaning for each Legion moving forward Breaking the Second World War down into its constituent events to trace the evolution of First World War memory through everyday invocations this unprecedented comparison of the British and American Legions illuminates the ways in which differing international national and organisational contexts intersected to shape this process as well as the common factors affecting it in both groups The book will appeal most to researchers of the ex service movement First World War memory and the cultural history of the Second World War *Hygeia* ,1944
