The Painted Fire Anna Quicke, 2014-12-09 The Painted Fire is a dark love story set in England in the autumn and winter months of 1850 Lucius Steer is a young mute farmhand with no confidence inhibited by his condition and living an isolated life When he meets Florrie Carrington the outspoken and rebellious wife of a local aristocrat their lives become shaken up beyond recognition When events conspire to condemn her to a life of violence and abuse Lucius feels compelled to find the emotional strength and courage to help her Discovering dark and dangerous secrets that could damage the lives of everyone involved he must overcome his demons to battle for Florrie's freedom and his own *Painted Fire* Paul Willan, 1978

Last Fire Season follows her from the oak hills of Sonoma County to the redwood forests of coastal Santa Cruz to the pines and peaks of the Sierra Nevada as she seeks shelter bears witness to the devastation and tries to better understand fire's role in the ecology of the West As Martin seeks a way to navigate the daily experience of living in a damaged body on a damaged planet she comes to question her own assumptions about nature and the complicated connections between people and the land on which we live

Fire Stephen J. Pyne, 2013-06-01 For over 400 million years fire has been an integral force on our planet It can be as innocent as a bonfire or as destructive and lethal as a wildfire Human history is rife with fires that have leveled cities the Fire of Moscow in 1812 that destroyed seventy five percent of the city the Great Chicago Fire in 1871 that took down 17 000 buildings and the fire that obliterated San Francisco after the 1906 earthquake are just a few Fire is a force of nature that can consume everything in its wake and yet it also has tremendous powers of cleansing and renewal At the end of the day we can't live without it In *Fire* Stephen J Pyne offers a concise history of fire and its use by humanity explaining how fire has been at the core of hunting foraging farming herding urbanizing and managing nature reserves He depicts how it gave humans power in ancient times which resulted in humanity beginning to reshape the world for its own benefit He describes how fire was used by aboriginal societies and the ways agricultural societies added control over fuel but warns that our mastery of the science and art of fire has not given us complete control fire disasters throughout history have defined cultures and unexpected fires that begin as the result of other disasters have shocking effects Pyne traces fire's influence on landscapes art science and even climate exploring the power a simple spark has over our imaginations Lavishly illustrated with a host of rare and unexpected images *Fire* is a sizzling and accessible tale of our relationship with this primal natural force
