**Contract Management** Alain Brunet, Franck César, 2021-07-30 This book presents the latest findings relating to behavioral economics and the digital tools applied to contract management There has been a decisive change in the role of contracts in the past decade with contracts being transformed from purely legal necessities designed to protect against worst case scenarios into tools for optimizing ongoing and mutually profitable business relationships with customers There is an increasing emphasis on tight contracts where time risk and additional costs are passed on to the prime contractor who may suffer heavy penalties in the event of non performance Contracts shape the behavior of the parties involved and as such have a major impact on project success The contract manager's goals are to protect the interests of the company and its shareholders by minimizing the company's financial and contractual liabilities and to maximize its profitability while ensuring end user satisfaction The contract is usually written before the design is fully developed and there is often a mismatch between contractual specifications and what the customer actually wants Good contract management entails preserving the rights of the contractor by ensuring all parties respect their contractual obligations providing advice to the project managers and engineering team preparing profitable amendments to contracts or change requests maintaining good record keeping in the event that claims arise filing notices when necessary and guiding the project to a profitable conclusion Like the ancient Chinese game of Go moves made early in the game notification of events can shape the nature of a potential conflict one hundred moves later arbitration threat Contract management can also smooth the relationship between partners allowing well balanced don't trade a dollar for a penny contracts to be managed through an established process rather than as sporadic events we cannot claim to be in control of our business if we are not in control of the contracts on which it depends Managing a contract with a mix of incomplete manuals fragmented

information and poor planning can drive companies to reinvent the wheel Contract management promotes a three phase sequence to streamline information flows across the contract lifecycle from the bid phase to performance project closeout and final payments      Partnering with Microsoft Ted Dinsmore,2005-10-06 Advance Praise for Partnering with Microsoft Partnering with Microsoft is the first great book about the breathtaking culture opportunity and roadmap for joining Microsoft s 850 000 partners cutting an impressive B swath in the marketpl      Marketing Alignment Mac McKinley,2002-10 Business executives must ensure that their corporate positioning product positioning value propositions sales channel strategies messaging and targeting are all in true alignment with each other as well as the expectations of a target market

**Pharmaceutical Competitive Intelligence for the Regulatory Affairs Professional** Raymond A. Huml,2012-06-15 This Brief defines competitive intelligence CI as a tool for making investment decisions within the pharmaceutical industry It provides an overview of processes that the regulatory affairs professional must take into account when evaluating data impacting product based risk evaluations These apply particularly to evaluations that focus on outputs such as regulatory approval or the commercial impact of product labeling on the sales forecast over a limited timeframe The Brief also provides an overview of intellectual property assessment that can impact a product s lifespan on the market due to patent protection itself or loss of patent protection or via regulatory exclusivity Case examples are discussed to illustrate the importance of keeping up with the ever changing regulations and how to interpret them in the context of CI In addition there is a section on virtual data rooms VDRs which currently function as the cornerstone of due diligence investigations While aimed primarily at regulatory affairs professionals in the United States this publication provides a useful adjunct for other pharmaceutical executives especially those new to product based investments and regulatory affairs professionals in other regions

*Optimization of Pharmaceutical R&D Programs and Portfolios* Zoran Antonijevic,2014-10-10 Very little has been published on optimization of pharmaceutical portfolios Moreover most of published literature is coming from the commercial side where probability of technical success PoS is treated as fixed and not as a consequence of development strategy or design In this book there is a strong focus on impact of study design on PoS and ultimately on the value of portfolio Design options that are discussed in different chapters are dose selection strategies adaptive design and enrichment Some development strategies that are discussed are indication sequencing optimal number of programs and optimal decision criteria This book includes chapters written by authors with very broad backgrounds including financial clinical statistical decision sciences commercial and regulatory Many authors have long held executive positions and have been involved with decision making at a product or at a portfolio level As such it is expected that this book will attract a very broad audience including decision makers in pharmaceutical R however with a few exceptions they require a relatively basic knowledge of statistics by a reader      *Software Business* Pasi Tyrväinen,Slinger Jansen,Michael A. Cusumano,2010-06-18 The advancement of the software industry has had a substantial impact not only on productivity and on GDP growth globally

but also our daily work and life Software business refers to commercial activity of the software industry aimed at generating income from delivery of software products and software services Although software business shares common features with other international knowledge intensive businesses it carries many inherent features making it an intriguing and challenging domain for research Until now however software business has received little attention from the academic community The First International Conference on Software Business ICSOB 2010 was organized in Jyvaskyla during June 21-23 2010 This inaugural conference brought together a strong Program Committee of 52 members with research disciplines from various fields of business management and technology management as well as international with members coming from 17 countries from South and North America to Europe India and Australia We received 35 research paper submissions The papers went through a double blind review process producing at least three reviews for each accepted paper The Program Committee accepted 13 submissions to be presented as full papers in the conference equaling 37% of the submissions In addition ten papers were accepted as short papers The accepted papers represent the wide variety of research activity on software business For the purposes of the conference program the papers were organized under eight themes business models business management ecosystems education and research internationalization open source software and social media product management and software as a service In addition to the paper sessions the conference program included three keynote presentations and a Business Innovation Track containing best practice presentations from the software industry The conference program also included two workshops three tutorials and an adjunct meeting of the Cloud Software Consortium

*From Summits to Solutions* Hiroshi Kato, Raj M. Desai, Homi Kharas, 2018-07-24 A positive agenda for achieving the Sustainable Development Goals by 2030 All 193 member nations of the United Nations agreed in September 2015 to adopt a set of seventeen Sustainable Development Goals to be achieved by 2030 Each of the goals in such areas as education and health care is laudable in and of itself and governments and organizations are working hard on them But so far there is no overall positive agenda of what new things need to be done to ensure the goals are achieved across all nations In a search of fresh approaches to the longstanding problems targeted by the Sustainable Development Goals the Japan International Cooperation Agency and the Global Economy and Development program at Brookings mounted a collaborative research effort to advance implementation of Agenda 2030 This edited volume is the product of that effort The book approaches the UN's goals through three broad lenses The first considers new approaches to capturing value Examples include Nigeria's first green bonds practical methods to expand women's economic opportunities benchmarking to reflect business contributions to achieving the goals new incentives for investment in infrastructure and educational systems that promote cross sector problem solving The second lens entails new approaches to targeting places including oceans rural areas fast growing developing cities and the interlocking challenge of data systems including geospatial information generated by satellites The third lens focuses on updating governance broadly defined Issues include how civil society can

align with the SDG challenge how an advanced economy like Canada can approach the goals at home and abroad what needs to be done to foster new approaches for managing the global commons and how can multilateral institutions for health and development finance evolve
