The Middle East In The World Economy 1800 1914:

The Middle East in the World Economy, 1800-1914 Roger Owen, 1987 Examines the growth and transformation of the Middle East economy during the 19th and early 20th centuries The text looks at how the region's economic structures were fundamentally altered by the growing impact of European trade and finance and by the internal reforms of the rulers of Egypt It also examines in detail the impact of this process on the four central areas of the Middle East The result the author argues was the creation of a fixed pattern of agricultural industrial and financial activity The states formed after the collapse of the Ottoman Empire found that altering this pattern in their attempts to promote a less dependent form of development was fraught with difficulty and the problems they faced and their different approaches are still highly relevant to the Middle East's economic development today

Constructing International Relations in the

Arab World Fred Lawson, 2006 This book explores the emergence of an anarchic states system in the twentieth century Arab

world Following the collapse of the Ottoman Empire Arab nationalist movements first considered establishing a unified regional arrangement to take the empire's place and present a common front to outside powers But over time different Arab leaderships abandoned this project and instead adopted policies characteristic of self-interested territorially limited states In his explanation of this phenomenon the author shifts attention away from older debates about the origins and development of Arab nationalism and analyzes instead how different nationalist leaderships changed the ways that they carried on diplomatic and strategic relations He situates this shift in the context of influential sociological theories of state formation while showing how labor movements and other forms of popular mobilization shaped the origins of the regional states system

Routledge Handbook of Global Economic History Francesco Boldizzoni, Pat Hudson, 2015-12-22 The Routledge Handbook of Global Economic History documents and interprets the development of economic history as a global discipline from the later nineteenth century to the present day Exploring the normative and relativistic nature of different schools and traditions of thought this handbook not only examines current paradigmatic western approaches but also those conceived in less open societies and in varied economic political and cultural contexts In doing so this book clears the way for greater critical understanding and a more genuinely global approach to economic history This handbook brings together leading international contributors in order to systematically address cultural and intellectual traditions around the globe Many of these are exposed for consideration for the first time in English The chapters explore dominant ideas and historiographical trends and open them up to critical transnational perspectives This volume is essential reading for both academics and students in economic and social history As this field of study is very much a bridge between the social sciences and humanities the issues examined in the book will also have relevance for those seeking to understand the evolution of other academic disciplines under the pressures of varied economic political and cultural circumstances on both national and global scales

Living in the Ottoman Ecumenical Community Markus Koller, Vera Costantini, 2008-07-31 This book dedicated to Suraiya Faroqhi shows that the early modern world was not only characterized by its having been split up into states with closed frontiers Writing history from the bottom by treating the Ottoman Empire and other countries as subjects of history reduces the importance of political borders for doing historical research Each social economic and religious group had its own world view and in most of the cases the borders of these communities were not identical with the political frontiers Regarding the Ottoman Empire and the other early modern states as systems of different ecumenical communities rather than only as political units offers a different approach to a better understanding of the various ways in which their subjects interacted In this context the term ecumenical community designates social religious and economic groups building up cross border communities Different ecumenical communities overlapped within the boundaries of a state

or in a specific area and gave them their distinctive characters This festschrift for Suraiya Faruqi aims to describe some of the close contacts between various ecumenical communities within and beyond the Ottoman borders **A Global Middle East** Liat Kozma, Cyrus Schayegh, Avner Wishnitzer, 2014-12-03 The start of the twentieth century ushered in a period of unprecedented change in the Middle East These transformations brought about by the emergence of the modern state system and an increasing interaction with a more globalized economy irrevocably altered the political and social structures of the Middle East even as the region itself left its mark on the processes of globalization themselves As a result of these changes there was an intensification in the movement of people commodities and ideas across the globe commercial activity urban space intellectual life leisure culture immigration patterns and education nothing was left untouched It shows how even as the Middle East was responding to increased economic interactions with the rest of the world by restructuring not only local economies but also cultural political and social institutions the region's engagement with these trends altered the nature of globalization itself This period has been seen as one in which the modern state system and its oftentimes artificial boundaries emerged in the Middle East But this book highlights how despite this it was also one of tremendous interconnection Approaching the first period of modern globalization by investigating the movement of people objects and ideas into around and out of the Middle East the authors demonstrate how the Middle East in this period was not simply subject or reactive to the West but rather an active participant in the transnational flows that transformed both the region and the world A Global Middle East offers an examination of a variety of intellectual and more material exchanges such as nascent feminist movements and Islamist ideologies as well as the movement of sex workers across the Mediterranean and Jewish migration into Palestine A Global Middle East emphasises this by examining the multi directional nature of movement across borders as well as this movement's intensity volume and speed By focusing on the theme of mobility as the defining feature of modern globalization in the Middle East it provides an essential examination of the formative years of the region
