The Origin Of Violence:

The Origin of Violence Fabrice Humbert, 2011 During a school trip to Buchenwald concentration camp a young French teacher comes across a photograph of a man whose resemblance to his own father Adrien is uncanny However the man has a different name and died in 1942 Returning to France he finds that the memory of the photograph refuses to leave him He decides to embark on a search for its subject which takes him to the Buchenwald archives to the heart of the Nazi machine but more disturbingly draws him into the dark heart of his own family Eventually he is brought face to face with his own capacity for violence A subtle moving book **The Origins of Violence** shows the limitless ways in which humans inflict harm on each other and how individual people not societies are the perpetrators **The Origins of Violence** Anatol

Rapoport, 1994-12-31 In this fundamental analysis Rapoport asks Why do we have wars Doesn't humanity always seem on the verge of self annihilation Is there something in human genetic structure that makes people want to kill each other Perhaps this impulse is a matter of good versus evil or just plain human nature Rapoport moves beyond clichés by claiming that the sources of modern violence reside in the imbalance between a lag in the system of values inherited from the past and the structure of science and technology that awaits no revision of values to move ahead As a result Rapoport argues that the study of war and peace should be considered a science just like biology or for that matter political science The same rules of empirical engagement and experimentation should apply Before we can have a theory of peace we need a methodology of conflict Using the writings of thinkers who have made significant contributions to the predominant ideas and ideals of our society Rapoport weaves together the strands of independent thought and research into a single thought provoking work After investigating the whys of violence using ideological psychological strategic and systemic perspective Rapoport moves to an in depth analysis of possible varieties of conflict resolution He explores such mechanisms as mediation education and applying the results of scientific research He documents the impact of ideologies countervailing dominant ones that place obstacles in the way of peacemaking Rapoport argues that conciliation and game theories can be utilized to replace the concept of winner take all or total victory **The Origins of Violence** is a needed contribution to our understanding of warfare and provides a forward looking perspective that can be of wide use to each of the policy sciences starting with military strategy and ending with international development **Out of the Darkness** Glenda Kaufman Kantor, 1997-07-18 Featuring

cutting edge information on family violence from the international arena **Out of the Darkness** pulls together into one seminal volume the work of emerging scholars and key figures in the field The book provides a comprehensive and interdisciplinary package of the newest generation of investigation and theory The contributors cover the latest controversial topics international studies theory methods assessment and interventions and ethical and cultural issues related to both child and partner abuse Chapters address pressing questions such as Is wife abuse declining Are child homicides increasing Does couple treatment work in violent marriages Several noteworthy findings emerge from this volume i **Routledge Library**

Colombo, 2023-07-31 *Evolution and the Human Animal Drive to Conflict* examines how fundamental universal animal drives such as dominance prevalence survival kinship and profit greed advantage whether of material or social nature provide the basis for the evolutionary trap that promotes the unstable conflictive dominant prone individual and

group human behaviours Examining this behavioural tension this book argues that while these innate features set up behaviours that lean towards aggression influenced by social inequalities the means implemented to defuse them resort to emotional and intellectual strategies that sponsor fanaticism and often reproduce the very same behaviours they intend to defuse In addressing these concerns the book argues that we should enhance our resources to promote solidarity accept cultural differences deter expansionist and uncontrolled profit drives and achieve collective access towards knowledge and progress in living conditions This entails promoting the redistribution of resources and creative labour access and avoiding policies that generate a fragmented world with collective and individual development disparities that invite and encourage dominance behaviours This resource redistribution asserts that it is necessary to reformulate the global set of human priorities towards increased access to better living conditions cognitive enhancement a more amiable interaction with the ecosystem and non aggressive cultural differences promote universal access to knowledge and enhance creativity and cultural convivence These behavioural changes entail partial derangement of our ancestral animal drives camouflaged under different cultural profiles until the species succeeds in replacing the dominance of basic animal drives with prosocial collective ones Though it entails a formidable task of confronting financial military and religious powers and cultural inertias human history is also a challenging continuous experience in these domains for the sake of our own self identity and self evaluation we should reject any suggestion of not continuing embracing slowly constructing collective utopias channelled towards improving individual and collective freedom and creativeness This book will interest academics and students in social cognitive and evolutionary psychology the neurosciences palaeoanthropology philosophy and anthropology
