Jelena Subotić,2025-06-26 An illuminating exploration of the relationship between the restitution of looted art global status and the international construction of national cultural heritage Why is art restitution a matter of politics How does the artwork displayed in national museums reflect the international status of the state that owns it Why do some states agree to return looted art and others resist National art collections have long been a way for states to compete with each other for status prestige and cultural worth in international society In many former imperial nations however these collections include art looted during imperial expansions and colonial occupations While this was once a sign of high international standing the markers of such status particularly in the context of art have since significantly changed A new international legal and normative architecture governing art provenance developed after World War II and became institutionalized in the 1990s and 2000s Since then there have been national and global social movements demanding the return of looted art This shift has established not only that looting is wrong but more importantly that restitution is morally right As a result of this reframing of what it means to own art an artifact s historical provenance has become a core element of its value and the search for provenance and demands for restitution a direct threat to state status The same objects that granted states high international status now threaten to provoke status decline In *The Art of Status* Jelena Suboti examines this relationship between the restitution of looted art and international status with a focus on the Parthenon Elgin Marbles the Benin Bronzes and a collection of paintings looted during the Holocaust that are now housed at the Serbian National Museum Suboti tells the story of these artworks how they were looted how they ended up on display in national museums and how the art restitution disputes have unfolded While these cases are different in terms of their historical context of looting and ownership claims the movements for their restitution and resistance to it illustrate the larger questions of how national cultural heritage is internationally constructed and how it serves states desire for international status and prestige An in depth and nuanced account of art restitution disputes *The Art of Status* illuminates the shifting political significance of art on the international stage from ownership to restitution

Sparta's First Attic War Paul Anthony Rahe,2019-08-06 A companion volume to *The Spartan Regime* and *The Grand Strategy of Classical Sparta* that explores the collapse of the Spartan Athenian alliance During the Persian Wars Sparta and Athens worked in tandem to defeat what was in terms of relative resources and power the greatest empire in human history For the decade and a half that followed they continued their collaboration until a rift opened and an intense strategic rivalry began In a continuation of his series on ancient Sparta noted historian Paul Rahe examines the grounds for their alliance the reasons for its eventual collapse and the first stage in an enduring conflict that would wreak havoc on Greece for six decades Throughout Rahe argues that the alliance between Sparta and Athens and their eventual rivalry were extensions of their domestic policy and that the grand strategy each articulated in the wake of the Persian Wars and the conflict that arose in due course grew out of the opposed material interests and moral imperatives inherent in their different regimes

Pritchard,2024-02-01 In classical Athens a funeral speech was delivered for dead combatants almost every year the most famous being that by Pericles in 430 BC In 1981 Nicole Loraux transformed our understanding of this genre Her *The Invention of Athens* showed how it reminded the Athenians who they were as a people Loraux demonstrated how each speech helped them to maintain the same self identity for two centuries But *The Invention of Athens* was far from complete This volume brings together top ranked experts to finish Loraux's book It answers the important questions about the numerous surviving funeral speeches that she ignored It also undertakes a comparison of the funeral oration with other genres that is missing in her famous book What emerges is a speech that had a much greater political impact than Loraux thought This volume puts the study of war in Athenian culture on a completely new footing

*Serving Athena* Julia L. Shear,2021-03-11 In ancient Athens the Panathenaia was the most important festival and was celebrated in honour of Athena from the middle of the sixth century BC until the end of the fourth century AD This in depth study examines how this all Athenian celebration was an occasion for constructing identities and how it affected those identities Since not everyone took part in the same way this differential participation articulated individuals relationships both to the goddess and to the city so that the festival played an important role in negotiating what it meant to be Athenian and non Athenian Julia Shear applies theories of identity formation which were developed in the social sciences to the ancient Greek material and brings together historical epigraphical and archaeological evidence to provide a better understanding both of this important occasion and of Athenian identities over the festival's long history [Martyred for the Church](#) Justin Buol,2018-09-21 In this study Justin Buol analyzes the writings connected with the deaths of Ignatius of Antioch Polycarp of Smyrna and Pothinus of Lyons in light of earlier accounts of the noble deaths of military political and religious leaders from Greco Roman literature and the Bible which record benefits accruing to a group on account of its leader's death The author argues that the accounts of these three bishops' martyrdoms draw upon those prior models in order to portray the bishops as dying to unite protect and strengthen the Church oppose false teaching and apostasy and solidify the teaching role of the episcopal office Finally by providing a foundation for Irenaeus to argue for apostolic succession these second century bishop martyrs also help form a lasting contribution to the growth of episcopal power *Seeing Color in Classical Art* Jennifer M. S. Stager,2022-12-15 The remains of ancient Mediterranean art and architecture that have survived over the centuries present the modern viewer with images of white the color of the stone often used for sculpture Antiquarian debates and recent scholarship however have challenged this aspect of ancient sculpture There is now a

consensus that sculpture produced in the ancient Mediterranean world as well as art objects in other media were in fact polychromatic Color has consequently become one of the most important issues in the study of classical art Jennifer Stager's landmark book makes a vital contribution to this discussion Analyzing the dyes pigments stones earth and metals found in ancient art works along with the language that writers in antiquity used to describe color she examines the traces of color in a variety of media Stager also discusses the significance of a reception history that has emphasized whiteness revealing how ancient artistic practice and ancient philosophies of color significantly influenced one another
