## **The Mysteries Of The Marco Polo Maps:**

**The Mysteries of the Marco Polo Maps** Benjamin B. Olshin, 2014-10-29 Concerns a collection of maps and associated documents claimed to be from Marco Polo's time or that of his daughters as many of the maps have the name or one or another of the three daughters on them. Discusses provenance, authenticity and history of the documents known to scholars as the Marco Polo Maps since 1948, here discussed fully for the first time. [The Mysteries of the Marco Polo Maps](#)

Benjamin B. Olshin, 2014-10-29 What's the truth behind the travels of Marco Polo? A fascinating tale about maps, history and exploration. *Times Literary Supplement* UK. In the thirteenth century, Italian merchant and explorer Marco Polo traveled from Venice to the far reaches of Asia; a journey he chronicled in a narrative titled *Il Milione*, later known as *The Travels of Marco Polo*. While Polo's writings would go on to inspire the likes of Christopher Columbus, scholars have long debated their veracity. Some have argued that Polo never even reached China, while others believe that he came as far as the Americas. Now there's new evidence for this historical puzzle: a very curious collection of fourteen little-known maps and related documents said to have belonged to the family of Marco Polo himself. Here, historian of cartography Benjamin B. Olshin offers the first credible, book-length analysis of these artifacts, charting their course from obscure origins in the private collection of Italian American immigrant Marcian Rossi in the 1930s to investigations of their authenticity by the Library of Congress, J. Edgar Hoover and the FBI, to the work of the late cartographic scholar Leo Bagrow, to Olshin's own efforts to track down and study the Rossi maps, all but one of which are in the possession of Rossi's great grandson. Are the maps forgeries, facsimiles, or modernized copies? Did Marco Polo's daughters, whose names appear on several of the artifacts, preserve in them geographic information about Asia first recorded by their father? Or did they inherit maps created by him? Did Marco Polo entrust the maps to an admiral with links to Rossi's family line? Or if the maps have no connection to Marco Polo, who made them, when, and why? Regardless of the maps' provenance, this tale takes us on a fascinating journey offering insights into Italian history, the age of exploration, and the wonders of cartography. Olshin's book tugs powerfully at the imagination of anybody interested in the Polo story, medieval history, old maps, geographical ideas, European voyages of discovery, and early Chinese legends. *The Wall Street Journal*

**Mapping Paradigms in Modern and Contemporary Art** Simonetta Moro, 2021-07-29 *Mapping Paradigms in Modern and Contemporary Art* defines a new cartographic aesthetic, or what Simonetta Moro calls *carto aesthetics*, as a key to interpreting specific phenomena in modern and contemporary art through the concept of poetic cartography. The problem of mapping, although indebted to the spatial turn of poststructuralist philosophy, is reconstructed as hermeneutics while exposing the nexus between topology, space, time, and memory. The book posits that the emergence of mapping as a ubiquitous theme in contemporary art can be attributed to the power of the cartographic model to constitute multiple worldviews that can be seen as paradigmatic of the postmodern and contemporary condition. This book will be of particular interest to scholars in art history, art theory, aesthetics, and cartography. **Cartography between Christian**

*Columbus* Al M. Rocca, 2023-02-20 The impact of Christopher Columbus's first transatlantic voyage launched an unprecedented explosion of European exploration Throughout the last 500 years scholars have recognized this transforming event and they have written extensively on the subject To date no American author has dedicated a book to Columbus's life before 1492 This biography does so with a focus on geographical experiences that affected his formulation of a transatlantic concept Incorporating extensive research from American and European scholars historians geographers anthropologists and cartographers the author proposes that Columbus systematically built a transatlantic voyage proposal from knowledge gained on previous voyages in the Mediterranean Sea and Eastern Atlantic Ocean The book's extensive use of maps place Columbus's actions on specific land and ocean locations Persons interested in gleaning more information about Columbus's maritime background will find a plethora of maps to visualize the extent of his early travels **Ancient Ocean Crossings**

Stephen C. Jett, 2017-06-06 Paints a compelling picture of impressive pre Columbian cultures and Old World civilizations that contrary to many prevailing notions were not isolated from one another In *Ancient Ocean Crossings* Reconsidering the Case for Contacts with the Pre Columbian Americas Stephen Jett encourages readers to reevaluate the common belief that there was no significant interchange between the chiefdoms and civilizations of Eurasia and Africa and peoples who occupied the alleged terra incognita beyond the great oceans More than a hundred centuries separate the time that Ice Age hunters are conventionally thought to have crossed a land bridge from Asia into North America and the arrival of Columbus in the Bahamas in 1492 Traditional belief has long held that earth's two hemispheres were essentially cut off from one another as a result of the post Pleistocene meltwater fed rising oceans that covered that bridge The oceans along with arctic climates and daunting terrestrial distances formed impermeable barriers to interhemispheric communication This viewpoint implies that the cultures of the Old World and those of the Americas developed independently Drawing on abundant and concrete evidence to support his theory for significant pre Columbian contacts Jett suggests that many ancient peoples had both the seafaring capabilities and the motives to cross the oceans and in fact did so repeatedly and with great impact His deep and broad work synthesizes information and ideas from archaeology geography linguistics climatology oceanography ethnobotany genetics medicine and the history of navigation and seafaring making an innovative and persuasive

multidisciplinary case for a new understanding of human societies and their diffuse but interconnected development

**Strange matter** Martin Bleisteiner, Jan-Peer Hartmann, Andrew James Johnston, 2025-09-02 Strange matter offers exciting new perspectives on the premodern fascination with materiality and the various ways in which the Middle Ages and subsequent periods experienced things in time Drawing on a wide selection of examples that range from medieval texts and artefacts of both European and non European origin to Macbeth's highly evocative meditation on bubbles the essays compiled in this volume look beyond the confines of the Anglophone world As they engage critically with the specific temporal otherness modernity has so often ascribed to medieval texts and artefacts the contributors also enter into productive dialogue with recent trends in criticism such as thing studies and the growing field of object biographies in cultural studies and museology

When Maps Become the World Rasmus Grønfeldt Winther, 2020-06-29 Map making and ultimately map thinking is ubiquitous across literature cosmology mathematics psychology and genetics We partition summarize organize and clarify our world via spatialized representations Our maps and more generally our representations seduce and persuade they build and destroy They are the ultimate record of empires and of our evolving comprehension of our world This book is about the promises and perils of map thinking Maps are purpose driven abstractions discarding detail to highlight only particular features of a territory By preserving certain features at the expense of others they can be used to reinforce a privileged position When Maps Become the World shows us how the scientific theories models and concepts we use to intervene in the world function as maps and explores the consequences of this both good and bad We increasingly understand the world around us in terms of models to the extent that we often take the models for reality Winther explains how in time our historical representations in science in cartography and in our stories about ourselves replace individual memories and become dominant social narratives they become reality and they can remake the world

on the same astronomical events that occur from 2012 to 2019 The world as we know it will be gone by 2020 Texts from ancient India tell us about great cycles of destruction The Egyptians told the same basic story with different names The Maya reveal another version of the story and were very clear about the timing of events from December 2012 to 2019 Your average American is no expert on these cultures but most people do have a Bible at home and the clearest details on what is about to happen can be found in the Bible if you don't let someone else tell you which parts you should focus on No this isn't what you were taught in Sunday school Religious leaders guide us between the raindrops of curious comments in the Bible We are discouraged from focusing on the parts they say we weren't meant to understand But if we stop glossing over these important passages we will understand a flood of details about the End Times Our leaders are not ignorant of these events The elite already know what is about to happen and they have made preparations most rational people would not believe because evidence is suppressed to avoid chaos They want us to remain ignorant or at least to believe that the details are secrets that cannot be known But the coming events and their timing are not secrets Years ago this book's publication would not have been tolerated by those in power But by now it doesn't matter much their plans are not going to be interfered with at this point Your plans however can still be formulated if you make the choice to understand Topics include Bible Prophecy Matthew 24 36 Knowing the hour and the day The Mayan Calendar and Mythology Pole Shifts Galactic Superwaves Ancient Egypt Ancient India World Mythology The Georgia Guidestones The real Star of Bethlehem and the exact birthday of Christ Calculating the Second Coming and Judgment Day more
