The Routledge Handbook of Translation Studies and Linguistics Kirsten Malmkjær, 2017-12-14 The Routledge Handbook of Translation Studies and Linguistics explores the interrelationships between translation studies and linguistics in six sections of state-of-the-art chapters written by leading specialists from around the world. The first part begins by addressing the relationships between translation studies and linguistics as major topics of study in themselves, before focusing in individual chapters on the relationships between translation on the one hand and semantics, semiotics, and the sound system of language on the other. Part II explores the nature of meaning and the ways in which meaning can be shared in text pairs that are related to each other as first written texts and their translations, while Part III focuses on the relationships between translation and interpreting and the written and spoken word. Part IV considers the users of language and situations involving more than one language, and Part V addresses technological tools that can assist language users. Finally, Part VI presents chapters on the links between areas of applied linguistics and translation and interpreting. With an introduction by the editor and an extensive bibliography, this handbook is an indispensable resource for advanced students of translation studies, interpreting studies, and applied linguistics.

The Routledge Handbook of Translation and Religion Hephzibah Israel, 2022-12-19 The Routledge Handbook of Translation and Religion is the first to

bring together an extensive interdisciplinary engagement with the multiple ways in which the concepts and practices of translation and religion intersect. The book engages a number of scholarly disciplines in conversation with each other including the study of translation and interpreting, religion, philosophy, anthropology, history, art history, and area studies. A range of leading and emerging international specialists critically engage with changing understandings of the key categories translation and religion as discursive constructs, thus contributing to the development of a new field of academic study translation and religion. The 28 contributions, divided into six parts, analyze how translation constructs ideas, texts, or objects as sacred or for religious purposes, often in competition with what is categorized as non-religious. The part played by faith communities is treated as integral to analyses of the role of translation and religion. It investigates how or why translation functions in re-constructing and transforming religion, and for whom, and examines a range of sacred texts in translation from the written to the spoken, manuscript to print, paper to digital, architectural form to objects of sacred art, intersemiotic, scriptural texts, and where commentary, exegesis, and translation interweave. This Handbook is an indispensable scholarly resource for researchers in translation studies and the study of religions.
