

# T-65 X-WING

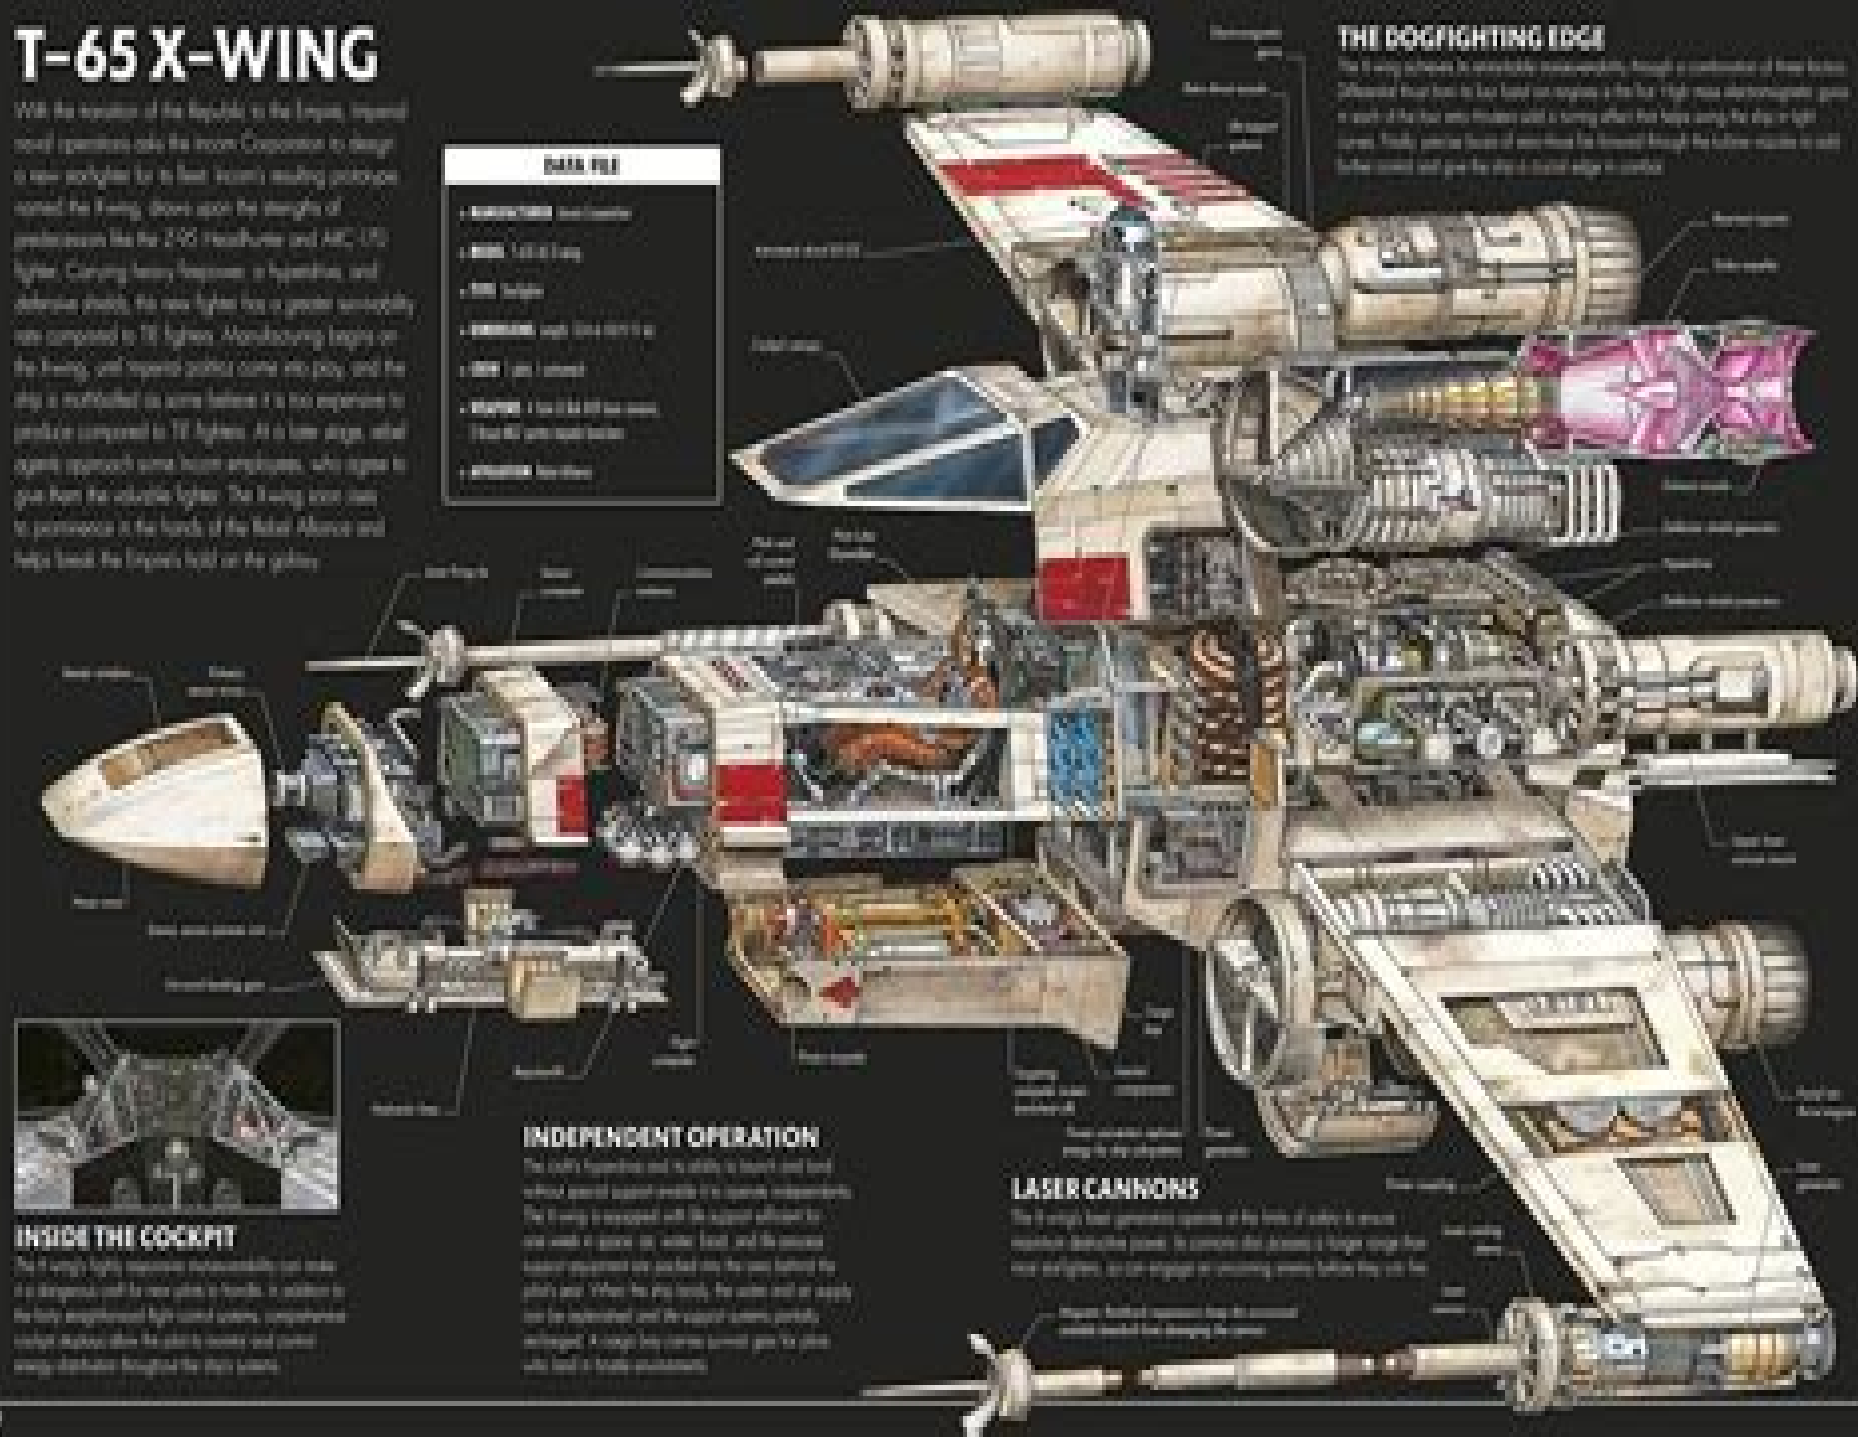

With the invasion of the Republic by the Empire, Imperial naval operations take the form Corporation to design a new fighter for its fleet. Yoda's leading principles inspired the X-wing, drawing upon the strengths of predecessors like the Z-95 Headhunter and ARC-170 fighter. Carrying heavy firepower, a hyperdrive, and defensive shields, the new fighter has a greater versatility rate compared to TIE fighters. Manufacturing begins on the X-wing, and Imperial orders come into play, and the ship is manufactured as soon as before it is too expensive to produce compared to TIE fighters. At a later stage, initial reports approach some Imperial engineers, who agree to give them the valuable fighter. The X-wing soon flies to prominence in the hands of the Rebel Alliance and helps break the Empire's hold on the galaxy.

- **ROLE:** Fighter

## THE DOGFIGHTING EDGE

The X-wing achieves its remarkable maneuverability through a combination of three factors. Different from most in the fleet, the X-wing has high mass electromagnetic guns in each of the four main thrusters and a strong effect that helps using the ship in tight corners. Finally, the X-wing's four main thrusters are housed through the hollow nacelles in order to better control and give the ship a much more edge in combat.

## INSIDE THE COCKPIT

The X-wing's highly responsive maneuverability can make it a dangerous and fast-moving force. In addition to the fully strengthened light control console, comprehensive cockpit features allow the pilot to control and control energy distribution throughout the ship's systems.

## INDEPENDENT OPERATION

The X-wing's independence and its ability to launch and land without ground support make it a highly independent. The X-wing is equipped with its own support system for use in space, on water, land, and the ocean. Support equipment is packed into the ship behind the pilot's seat. When the ship lands, the water tank or supply can be refueled and the support system, possibly refueled. A single X-wing carries enough fuel for the ship to land in hostile environments.

## LASER CANNONS

The X-wing's four powerful cannons are the main source of its offensive power. Its cannons also possess a larger range than most fighters, so can engage an incoming enemy before they can fly.

Major fuel tanks are located in the main nacelles, providing the ship with a large range of movement.
