Philip's Guide to the Night Sky Philip's Maps, Sir Patrick Moore, 2012-05-21 Find your way around the night sky with this handy guide to stargazing for the complete novice. In Philip's Guide to the Night Sky, Sir Patrick Moore explains how to find the most famous constellations and the brightest stars and when to look for them. Clear star maps showing stars visible to the naked eye help you to navigate the skies. The maps are suitable for use in Britain, Ireland, northern Europe, and Canada. Sir Patrick introduces the wonders of the night sky to absolute beginners in his characteristically entertaining and informative style. The Moon, the planets, the Sun, and the stars are explained in non-technical language, while the constellations are described with the help of star maps and tables. The four main chapters in Philip's Guide to the Night Sky are devoted to what's on view in each season of the year. The information is appropriate for observers in Britain and Ireland, northern Europe, and Canada; it will also be helpful a little outside these latitudes. Using prominent patterns such as the Plough and Orion, Sir Patrick teaches the reader to star-hop from constellation to constellation, thus learning to navigate the night sky. Star maps and photographs illustrate and clarify what will be on view. Philip's Guide to the Night Sky is an ideal introduction to stargazing, suitable for all ages and with no need for anything more technical than the naked eye.

Stargazing with Binoculars Robin Scagell, David Frydman, 2008 A practical and concise guide to viewing the night sky through binoculars that includes information on choosing and using binoculars, what to observe, city vs. country viewing, and information about accessories.

Choosing & Using Binoculars Neil T. English, 2023-12-05 Binoculars are life-enhancing instruments uniquely capable of bringing the intricacies of nature into sharp focus. Whether it be birds, majestic lakes and seas, alpine vistas, wild animals, or exploring the glories of the night sky, anyone interested in buying binoculars today will be faced with a bewildering number of different models to choose from. This book walks the reader through the fascinating world of binoculars, past and present, while exploring all of the main binocular types, their desirable features, how to test out and narrow down the choices a prospective customer should make, as well as looking at some of the best and most sought-after binoculars money can buy. Uniquely experienced writer and binocular enthusiast Dr. Neil English takes the pain out of narrowing down the search for your ideal binocular, whether your budget is 50 or 5,000. Dr. English explores many of the timeless beauties of the binocular world, crafted by top European and Japanese manufacturers such as Swarovski, Zeiss, Nikon, Leica, and others. Sumptuously illustrated throughout with full-color images, *Choosing & Using Binoculars* decodes all the technical jargon without sacrificing accuracy and presents the world's best compendium of binocular literature for the birder, hunter, inveterate traveler, nature enthusiast, and star gazer.
