Townsend, 2020-07-12 This book examines the drivers behind great power security competition in space to determine whether realistic strategic alternatives exist to further militarization Space is an area of increasing economic and military competition This book offers an analysis of actions and events indicative of a growing security dilemma in space which is generating an intensifying arms race between the US China and Russia It explores the dynamics behind a potential future war in space and investigates methods of preventing an arms race from an international relations theory and military strategy standpoint The book is divided into three parts the first section offers a broad discussion of the applicability of international relations theory to current conditions in space the second is a direct application of theory to the space environment to determine whether competition or cooperation is the optimal strategic choice the third section focuses on testing the hypotheses against reality by analyzing novel alternatives to three major categories of space systems The volume concludes with a study of the practical limitations of applying a strategy centered on commercialization as a method of defusing the orbital security dilemma This book will be of interest to students of space power strategic studies and international relations Space Strategy in the 21st Century Eligar Sadeh, 2013-02-11 This book offers an overview of space

strategy in the 21st century The purpose of space strategy is to coordinate integrate and prioritize space activities across security commercial and civil sectors Without strategy space activities continue to provide value but it becomes difficult to identify and execute long term programs and projects and to optimize the use of space for security economic civil and environmental ends Strategy is essential for all these ends since dependence on and use of space is accelerating globally and space is integrated in the fabric of activities across all sectors and uses This volume identifies a number of areas of concern pertinent to the development of national space strategy including intellectual foundations political challenges international cooperation and space governance space assurance and political organizational and management aspects specific to security space strategy The contributing authors expand their focus beyond that of the United States and explore and analyse the

international developments and implications of national space strategies of Russia China Europe Japan India Israel and Brazil This book will be of much interest to students of space power and politics strategic studies foreign policy and International Relations in general *Statistical Abstract of the United States*, 2010 *Space Insurance and the Law* Harrington, Andrea J., 2021-07-31 This astute and comprehensive book provides in depth analysis of the space sector with an insurance as governance approach Chapters highlight and examine the key aspects of this important subject including space tourism risk mitigation and insurance requirements The author also gives a fresh and contemporary insight into topics such as the influences of international space law international air law and US domestic space law *Commerce, Justice, Science, and Related Agencies Appropriations for 2008* United States. Congress. House. Committee on Appropriations. Subcommittee on Commerce, Justice, Science, and Related Agencies, 2007 **Space and Defense Policy** Damon Coletta, Frances T. Pilch, 2009-10-16 This edited volume introduces the reader to the role of space in military and defense strategy and outlines some of the major foreign and domestic actors in the space arena as well as constraints of law and treaties on activities in space It also addresses science and technology as they relate to space policy The book addresses three main questions How does the realm of space fit into strategic thinking about national security How does policy regarding space develop and what considerations both in the United States and abroad figure prominently in calculations about space policy How do different states nations actors regard the role of space in their national security calculations and how do these policies impact each other This book fills a niche in the space policy field providing insights into space and strategy from international experts from the military academic and scientific communities A unique feature of the book is the chapter on science and technology which utilizes the latest information available concerning space utilization and exploration **Yearbook on Space Policy 2007/2008** Kai-Uwe Schrogl, Charlotte Mathieu, Nicolas Peter, 2010-07-19 At the time of nalsing this second volume of the Yearbook on Space Policy which covers the period mid 2007 to mid 2008 Europe is as visible and strong in the area of space activities as never before Its space probes are present on the Moon around Mars and on Saturn s Moon Titan and are chasing asteroids and comets Ariane V is the most successful commercial launch vehicle and more and more European space applications satellites are in operation Finally with the successful launch of the Columbus Orbital Facility COF the most prominent highlight of this period which is also depicted on the cover of this Yearbook and the rst Automated Transfer Vehicle ATV Europe has become a decisive player in human space ight This is accompanied by new policy initiatives on the ministerial level which have been bringing the European Space Agency and the European Union steadily closer Europe s outstanding development and positioning in the space eld is based not only on Europe s successful engineering and scienti c capabilities and capacities but also on the forceful political determination of all European actors to maintain and even further their engagement in the use of outer space And it is this political determination which provides the focus for this Yearbook on Space Policy The Yearbook describes and analyses the contexts and contents of space policy Its primary eld of investigation

is Europe but it also covers the whole range of global space activities and their influence on European endeavours
