Harris,2015-09-22 Handbook of Home Health Care Administration Sixth Edition is a comprehensive text that reflects the current state of home health care administration With contributions from leading experts in the field it addresses key aspects of home health care including finance human resource development legal and ethical issues management information systems marketing quality management research and current technology for patient care Nursing Home Federal Requirements, 8th Edition James E. Allen,2014-07-09 The book lists all the federal requirements that are evaluated by state surveyors during the annual survey visit to nursing homes and for complaint visits The exhibit section contains forms used by surveyors to gather data during the survey visit Visually the format makes the regulations easy to read If nursing home staff used the book to prepare for a survey they would be well prepared Marcia Flesner PhD RN MHCA University of Missouri Columbia From Doody's

Review Nursing homes are now the most highly regulated environments in the United States in the service of maximizing the quality of each resident's life. This user friendly guide has been updated to provide all of the requisite information needed by nursing home staff to prepare for a visit from federal surveyors. It provides the most current federal guidelines and the procedures used by federal surveyors in certifying facilities for participation in Medicare and Medicaid funding. It describes every aspect and service of a nursing home that is subject to inspection and includes the nearly 20% of new requirements established during the past three years with an emphasis on the new Minimum Data Set 3.0. The guide not only presents federal requirements and explanatory guidelines but also explains how to best interpret these guidelines so nursing home staff can be optimally prepared for a survey visit. It reflects changes in regulations regarding end of life care, nasogastric tube regulations and rights to establish advance directives. The guide also provides information straight from CMS's Internet Only Manual New Features of Eighth Edition. Describes how to best use the updated manual. Focuses on Minimum Data Set 3.0. Explains clearly how to interpret the new requirements, 20% of which have been updated. Presents new quality measures. Includes new CMS forms. Reflects changes in regulations regarding end of life care, nasogastric tube regulations and rights to establish advance directives.

Restorative Care Nursing for Older Adults Barbara Resnick, 2004-07-28. The purpose of restorative care nursing is to take an active role in helping older adults maintain their highest level of function, thus preventing excess disability. This book was written to help formal and informal caregivers and administrators at all levels to understand the basic philosophy of restorative care and be able to develop and implement successful restorative care programs. The book provides a complete 6 week education program in restorative care for caregivers, many suggestions for suitable activities and practical strategies for motivating both older adults and caregivers to engage in restorative care. In addition, the book provides an overview of the requirements for restorative care across all settings, the necessary documentation and ways in which to complete that documentation.

Geriatric Medicine Michael R. Wasserman, Debra Bakerjian, Sunny Linnebur, Sharon Brangman, Matteo Cesari, Sonja Rosen, 2024-02-19. Both volumes sold as a combined set for a one time purchase. Older adults represent the most rapidly growing demographic in the U.S. and in many developed countries around the world. The field of geriatric medicine is still relatively young and is only recently seeing a significant increase in peer reviewed literature. Medicare and Medicaid expenditures related to older adults are nearly a trillion dollars a year in the US. How our healthcare system cares for older adults and how those older adults navigate an increasingly complex system is of the utmost importance. According to the Institute of Medicine, physicians and other healthcare professionals receive an inadequate amount of training in geriatric medicine. Geriatric medicine is based on the concept of delivering person centered care with a focus on function and quality of life. It is essential that physicians, nurse practitioners, physician assistants, pharmacists, social workers and other health care professionals all be knowledgeable about the geriatric approach to care. Geriatric medicine varies from most other fields in medicine. While many specialties function on the basis of evidence

based literature geriatricians and other clinicians caring for older adults must integrate relatively limited evidence with variable physiological changes and complex psychosocial determinants Geriatricians are used to caring for 90 year olds with multiple chronic illnesses Their variable physiology leads to uncertain responses to pharmacotherapy and their personal goals and wishes need to be incorporated into any plan of care Practicing geriatric medicine requires the ability to see patterns But it goes one step further as the rules are constantly in flux Every patient is an individual with particular needs and goals In order to provide true person centered care to older adults one has to incorporate these factors into the decision making process The proposed handbook is designed to present a comprehensive and state of the art update that incorporates existing literature with clinical experience Basic science and the physiology of aging create a background but are not the main focus This is because every chapter has been written through the lens of person centered care This book is about focusing on what matters to the person and how that is not always about pathology and physiology The reader generally will not find simple solutions to symptoms diseases and syndromes In fact the key to caring for geriatric patients is the ability to think both critically and divergently at the same time Geriatrics encompasses multiple disciplines and spans all of the subspecialties It requires knowledge of working within an interdisciplinary team It requires an appreciation of how quality of life varies with each individual and creates treatment and care plans that also vary And most of all it requires a firm commitment to first learning who the person is so that all of the necessary data can be analyzed and integrated into a true person centered plan of care This book aims to serve as an unparalleled resource for meeting these challenges Updated and revised from the previous edition this text features over 40 new peer reviewed chapters new references and a wide array of useful new tools that are updated on a regular basis by interdisciplinary and interprofessional experts in geriatric medicine
