Supreme Court of the State of New York , *Routledge Library Editions: Energy Resources* Various,2021-06-23 Reissuing works originally published between 1961 and 1990 this set of 12 books offers a selection of scholarship on the history of natural resources Many of the titles discuss the nuclear power debate from various angles while others look at coal or resources and energy in the third world **The Nuclear Power Decisions** Roger Williams,2019-03-27 Originally published in 1980 More so than any other energy resource nuclear power has the capacity to provide much of our energy needs but is highly controversial This book discusses the major British decisions in the civil nuclear field and the way they were made between 1953 and 1978 It spans the period between the decision to construct Calder Hall claimed as the world s first nuclear power station and the Windscale Inquiry claimed as the world s most thorough study of a nuclear project For the period up to 1974 this involves a study of the internal processes of British central government The private issues include the technical selection of nuclear reactors the economic arguments about nuclear power and the political clashes between institutions and individuals The public issues concern nuclear safety and the environment and the rights and opportunities for individuals and groups to protest about nuclear development The book demonstrates that British civil nuclear power decision making had many shortcomings and concludes that it was hampered by outdated political and administrative attitudes and machinery and that some of the central issues in the nuclear power debate were misunderstood by the decision makers themselves *Documents of the Senate of the State of New York* New York (State). Legislature. Senate,1902

Artistic Integration in Gothic Buildings Virginia Chieffo Raguin, Kathryn Brush, Peter Draper, 1995-01-01 In this collaborative work seventeen international scholars use contemporary methodologies to address the ways in which we understand Gothic church buildings today Artistic Integration in Gothic Buildings discusses major monuments that have traditionally stood at the core of medieval art historical studies the cathedrals of Durham Wells Chartres Reims Poitiers Strasbourg and Naumburg the abbey of Saint Denis and the Sainte Chapelle of Paris The contributors approach the subject from different specialties and methodologies within the field of art history as well as from the disciplines of history liturgical studies and theology Willibald Sauerl nder s overview acknowledges that since the early nineteenth century scholars have been confronted with monuments that no longer perform their original functions The moment of the creation of these great cages of stone filled with images in metal paint glass stone and textiles has passed as surely as Villon s snows of yesteryear Artistic intentions shifted continuously over the centuries as these great buildings were adapted to new situations historical cultural and religious Once the settings for complex and diversified rituals of religious social and political dimensions the buildings today stand in a completely different time frame and are experienced by a different audience This volume addresses the hermeneutics of the development of scholarship concerning the Gothic church reviewing the variable but largely exclusive agendas from the early nineteenth century to the present including those of Viollet le Duc Lef vre Pontalis M le Sedlmayr Von Simson Panofsky Grodecki and Bony The conclusion is that there is no way to return to the original Gothic cathedral or the original audience Artistic Integration in Gothic Buildings reassesses the traditional canon through a new pluralism of approaches and presents the Gothic church as an intricate and complex living monument that has been evolving over eight centuries and more **Annual Report** USA Patent Office, 1912
