Non-Combatant Immunity as a Norm of International Humanitarian Law Judith Gail Gardam, 2023-11-27 Despite the advances made by the international community to outlaw the resort to force by the United Nations Charter armed conflicts both international and non international are a fact of every day life The civilian casualties from such conflicts have assumed catastrophic proportions Little attention however has been paid by scholars to the treatment of noncombatants in armed conflict and the place in international law of the principle fundamental to the law of armed conflict noncombatant immunity This work aims to remedy this omission The author analyses in detail the content of the customary and conventional rules that give effect to this principle in both international and non international armed conflict The importance of such a study is highlighted by the recent Gulf conflict where so many of the States were not bound by the most recent treaty rules protecting noncombatants

Customary International Humanitarian Law Jean-Marie Henckaerts, Louise Doswald-Beck, International Committee of the Red Cross, 2005 Customary International Humanitarian Law Volume I Rules is a comprehensive analysis of the customary rules of international humanitarian law applicable in international and non international armed conflicts In the absence of ratifications of important treaties in this area this is clearly a publication of major importance carried out at the express request of the international community In so doing this study identifies the common core of international humanitarian law binding on all parties to all armed conflicts

Essays on Law and War at the Fault Lines Michael N. Schmitt, 2011-11-15 This collection of essays by Professor Michael N Schmitt of Durham University draws together those of his articles published over the past two decades that have explored particular fault lines in the law of armed conflict As such they examine the complex interplay between warfare and law seeking to identify where the law and warfare appear to diverge and where such apparent divergence can be accommodated through contextual interpretation of the law Each essay examines a particular issue in either the jus ad bellum the law governing resort to force or jus in bello international humanitarian law that has proven contentious in terms of applying extant norms to the evolving face of armed conflict Among the topics addressed are counter terrorism cyber operations asymmetrical warfare assassination environmental warfare and the participation of civilians in hostilities

The Relationship Between State and Individual Responsibility for International Crimes Béatrice I.

Bonafè,2009 This book offers a unique comparison between state and individual responsibility for international crimes and examines the theories that can explain the relationship between these two regimes The study provides a comprehensive and systematic analysis of the relevant international practice from the standpoint of both international criminal law and in particular the case law of international criminal tribunals and state responsibility The author shows the various connections and issues arising from the parallel establishment of state and individual responsibility for the commission of the same international crimes These connections indicate a growing need to better co ordinate these regimes of international responsibility The author maintains that a general conception according to which state and individual responsibility are two separate sets of secondary rules attached to the breach of the same primary norms can help to solve the various issues relating to this dual responsibility This conception of the complementarity between state and individual responsibility justifies co ordination and consistent application of these two different regimes each of which aims to foster compliance with the most important obligations owed to the international community as a whole

U.S. Military Operations Geoffrey S. Corn,Rachel E. VanLandingham,Shane R. Reeves,2016 In U S Military Operations Law Policy and Practice a distinguished group of military experts comprehensively analyze how the law is applied during military operations on and off the battlefield The authors focus on how the law is actually implemented in a wide swath of military activities

International Criminal Law: Cases and Commentary Antonio Cassese,2011-02-24 The decisions presented in the book are helpfully accompanied by short introductions setting out the circumstances of each case and brief commentaries on the importance of the decision and principles illustrated Book Jacket

Intersections in International Cultural Heritage Law Anne-Marie Carstens,Elizabeth Varner,2020-05-15 The recent spate of threats to cultural heritage including in Iraq Mali Nepal Syria and Yemen has led to increased focus on the sources of international cultural heritage law This edited volume shows that international cultural heritage law is not a discrete and contained body of law but one whose component parts are drawn from diverse fields of public international law It shows how cultural heritage law has been shaped by its interaction with other areas of international law and how it has contributed to international law in turn In this volume scholars and practitioners explore some of the primary points of intersection between international cultural heritage law and public international law Chapters explore intersections with the law of armed conflict international and transnational criminal law international human rights the international movement regulation and restitution of cultural artefacts and the UN system The result is a cohesive collection that not only explores many facets of the intersections of cultural heritage law and public international law but also examines how the regimes operate together and how the relationship between them largely facilitates but also sometimes hinders the development of international law governing the protection of cultural heritage

The Development and Principles of International Humanitarian Law Michael N. Schmitt,2017-07-05 The essays selected for the first part of this volume offer an insight into the development as distinguished from the history of

international humanitarian law The focus of the majority of the works reprinted here is on an analysis of the adequacy of the law as it stood at the time of the respective publication and in the light of existing contemporary armed conflicts and military operations Thus the reader is afforded an in depth look at the early roots of international humanitarian law the continuing relevance of that body of law despite advances in weapons technology and the efforts to progressively develop it International humanitarian law s development cannot be considered in isolation from its principles The essays selected for the second part of the volume deal with the two fundamental principles underlying all of international humanitarian law humanity and military necessity The articles on the principles of humanity include reflections on the famous Martens Clause and the analyses of military necessity take no account of *Kriegsraison* Moreover they offer proof of the customary character of the principle of distinction in land air and naval warfare Necessity, Proportionality and the Use of Force by States Judith Gardam, 2004-11-18 There has been considerable debate in the international community as to the legality of the forceful actions in Kosovo in 1999 Afghanistan in 2002 and Iraq in 2003 under the United Nations Charter There has been consensus however that the use of force in all these situations had to be both proportional and necessary Against the background of these recent armed conflicts this 2004 book offers the first comprehensive assessment of the twin requirements of proportionality and necessity as legal restraints on the forceful actions of States It also provides a much needed examination of the relationship between proportionality in the law on the use of force and international humanitarian law Judicial Reports / Recueils judiciaires 2000 Int.
