**The Impact of Internal and External Influences on Memory and their Relevance to Legal Decisions** Fabiana Battista, Antonietta Curci, Ivan Mangiulli, Henry Otgaar, 2024-08-02 The fallibility of memory has been often demonstrated A plethora of studies has focused on external influences that can affect memory reports such as suggestive questioning Adopting different paradigms e.g. misinformation memory conformity the recurrent pattern of findings of these studies is that suggestion can make people prone to falsely recall details that were never experienced i.e. commission errors false details In addition suggestion can make them unable to recall truly experienced events or event related details However internal influences can also affect memory One such internal influence is deception In the last decade several studies have investigated how memory can be affected by deception Specifically these studies have shown that a person who has intentionally deceived the listener about an experienced event subsequently when the person comes forward with the truth shows an impaired memory for such an event This line of research examined the detrimental effects on memory by taking into account different strategies to deceive e.g. false denials feigned amnesia and fabrication and found that the memory outcomes due to deception can vary based on the strategy used to deceive A number of studies has also demonstrated that another type of deception known as self deception can influence our memory This strategy relies on the act of deceiving our own selves and seems to reduce the recall of negative memories The understanding of the effects of external e.g. suggestion and internal e.g. deception self deception on memory is important not only in order to gain more fundamental information on how memory works but also because of the relevance of memory functioning within the legal context Memory distortions for example inaccurate eyewitness testimony can lead to impactful legal decisions such as wrongful convictions Several studies have underlined the harmful consequences of distorted statements Additional support is found in databases from various worldwide associations who strive to obtain fair justice for people involved in wrongful convictions cases for instance [www.innocenceproject.org](http://www.innocenceproject.org) Therefore it is important that researchers continue to provide evidence on the mnemonic impact of internal and external factors that influence legal practitioners to help avoid miscarriages of justice

**Developing and Implementing Promising Practices and Programs for First-Generation College Students** Charmaine Troy, Karen Jackson, Ben Pearce, Diana Rowe, 2022-09-26 As first generation students gain greater access to higher education faculty and staff at colleges and universities must provide intentional engagement that supports their persistence and graduation This book serves as a guidebook for higher education practitioners seeking to implement or enhance first generation programming at their institutions The chapters provide detailed descriptions of the development implementation and assessment of programs and practices intended to support the success of first generation college students Authors share insights on building allies identifying and working through challenges and applicable takeaways for implementing similar practices and programs at

the reader's own institutions. Programming discussed in the book ranges in funding levels and includes activities such as faculty dinners, study abroad, bridge programs, living learning communities, peer mentoring, intrusive advising, and holistic well-being. This valuable resource helps higher education practitioners better support and position first-generation students for success.

**The Truth about College Admission** Brennan Barnard, Rick Clark, 2023-09-05 Updated and completely revised the ultimate family guide to managing a college search in a positive way. Is your family just starting to think about visiting colleges? Maybe you are in the throes of the college search, feeling stressed out and overwhelmed. Miss a deadline? Should you be looking in-state or out-of-state? Big school or small? How do you pay for it, and what is a FAFSA anyway? *The Truth about College Admission* is the easy-to-follow, comprehensive go-to guide for families. Brennan Barnard and Rick Clark, with combined decades of experience and insight from both the high school and university sides of the process, provide critical advice, thoughtful strategies, helpful direction, and invaluable reassurance during the long and often bewildering college admission journey. This book covers every important step: searching for colleges, creating a list of prospective schools, weighing financial considerations, crafting an application, learning what schools are looking for academically and outside the classroom, and understanding how colleges decide whom to accept. Helpful sections like *Try This*, *Talk About This*, and *Check In and Extra Credit* show your family how to have open and balanced conversations to keep everyone on the same page, feeling less stressed and actually enjoying the adventure together. This completely revised second edition includes new information on affordability and aid that addresses important financial considerations. It also explores changes in standardized testing and the impact of the COVID-19 pandemic. *The Truth about College Admission* is the practical and inspiring guidebook your family needs: an essential companion on the path toward acceptance to college.

**Pedagogical Psychology: Beyond the 21st Century** Gretchen M. Reeve, Stanley N. Bursten, 2015-07-22 *Frontiers in Psychology* is introducing a new research topic: Pedagogical Psychology. *Beyond the 21st Century*, which will be released as an online journal issue in summer 2014, has the purpose of publishing goal-oriented articles leading to improvement of teaching and learning at all levels of psychology education. Until perhaps 20 years ago, educational approaches to teaching were largely informed by a *Stand and Deliver* pedagogical attitude. The psychology of this approach has often invested unrealistic and unrealizable responsibilities in both teachers and students. With the emergence of electronic data sharing (e.g., the Internet) and global cooperation, competition, newer approaches to teaching have begun to supplement and sometimes replace the older model of teaching. These newer approaches have simultaneously taken advantage of technological advances, global changes, and an evolving understanding of successful student-mentor relationships. As the pedagogical models driven by these changes evolve into the 22nd century and beyond, what seems groundbreaking today will in hindsight be seen as hidebound. Thus, the major goal of *Beyond the 21st Century* will be to publish manuscripts which imaginatively but realistically anticipate future trends in teaching undergraduate psychology.

Types of manuscripts which are appropriate for Pedagogical Psychology should be visionary yet empirically and or theoretically based We welcome manuscripts in all domains of pedagogical psychology with a special interest on topics that are new or expected to evolve rapidly Such innovative topics include but are not limited to Online and hybrid teaching Massive Open Online Courses MOOCs How has student success improved with the introduction of online distance education Are there dangers associated with online distance education especially MOOCs How can student success be improved as technology evolves beyond the MOOC concept What technological advances will make psychology education available and useful for more and more diverse students How can the physical classroom be transformed into a student centered effective virtual environment Using the internet as resources for classes e g stat tutorials etc Uses of technology such as social media e g Facebook Twitter wikis and clickers in the classroom The challenge of teaching particular courses online such as psychology laboratory courses or practicums Seeking effective user feedback i e regarding user friendliness teaching effectiveness for online courses including MOOCs The Wikipedia initiative of the Association for Psychological Science Teaching Generation Me anticipating changing generational needs Teaching international students Teaching non traditional age students Undergraduate research projects Integrating multiculturalism into all courses Infusing social justice issues into psychology courses Creating opportunities for interdisciplinary learning Teaching techniques for psychology courses which are often offered as electives rather than core curriculum e g evolutionary psychology psychology and the law cross cultural psychology health psychology positive psychology Assessing institutional student learning objectives across the curriculum Contingent faculty adjunct faculty lecturers in psychology departments Working with changing legislative accreditation constraints and unpredictable budgets Co Hosts of Pedagogy Gamification Elizabeth McMunn-Tetangco,2017-02-16 Games can seem to do the impossible reach patrons and drive traffic to projects and services But how can libraries use gamification and game elements to improve instruction and outreach or to encourage the use of particular areas and services In this guide readers will learn about how to structure game activities in order to best reach their patrons Chapters devoted to topics such as personalization goal setting working with partners games in instruction and assessment illustrate some of the many ways games can have an impact in libraries Everything in this book is presented from a practical point of view email templates real life examples and scenarios are included Games have a lot of potential for use in many different library services and this book will help you decide how they might work best for you From the first seeds of a project s beginning to its eventual maturation this book will help you develop implement and evaluate game style projects at your library
