From #RhodesMustFall Movements to #HumansMustFall Movements, Artwell Nhemachena, Jairo Kangira, 2021-05-14. Might it be possible that the world is being migrated into an era where the imperial periphery will be increasingly governed through Artificial Intelligence? AI and robotics designed to replace human beings. Celebrated as efficient, strong, unfailing, tireless, precise and beyond corruption, AI and robots are set to replace African leaders who are imperially deemed to be and consistently condemned as corrupt, failed, weak and inefficient. But if these AI and robots are neo imperial tools and machinations, the million dollar question is whether empire is not returning to recolonise the supposedly inefficient Africans via the new technologies and machinism. Where Africans once celebrated their liberation war movements, empire has emplaced what it calls liberation technologies designed to supposedly liberate African youths from their own states and governments led by liberation movements. Where Africans once celebrated their liberation war movements, empire has placed its own NGOs, CSOs, spewing

liberal ideologies designed to ostensibly liberate African youths from their own supposedly failed and corrupt states and government leaders With African youths citizens allying not with their liberation movements but with the liberation technologies and liberal NGOs CSOs it is not surprising why African citizens oppose their states led Fast Track Land Redistribution Programmes while ironically they happily celebrate Fast Tracked COVID 19 Vaccines Positing the notion of HumansMustFall movements this book underscores ways in which empire is in a process of eternal return to 21st century Africa The book is crucial for scholars and activists in political science government studies sociology anthropology cultural studies history languages and communication studies security studies military studies and development studies The African Union (AU) Konstantinos D. several cases of the Canadian aerospace giant's work in the high speed rail sector in South Africa China Tibet and Israel Palestine and argues that these projects are deepening existing social and political tensions By participating in these infrastructure projects Thomas argues Bombardier is both inserting itself into highly contested social and political climates and profiting from actions that further exacerbate existing conditions of dispossession and inequality Thomas also examines the various ways in which the Canadian state supports the work of Bombardier in these countries Centred around a theoretical framework that combines concepts of dispossession political economy and important interventions from the field of settler colonial studies Bombardier Abroad is a critical look at the problematic practices of a Canadian corporation and the ways in which the Canadian state is culpable
