Learning with Others Clifton Conrad,Todd Lundberg,2022-03-15 How can colleges and universities engage students in ways that prepare them to solve problems in our rapidly changing world Most American colleges and universities assimilate students into highly competitive undergraduate experiences By placing achievement for personal and material gain as the bedrock of a college education these institutions fail to educate students to become collaborative learners people who are committed and prepared to join with others in developing promising solutions to problems that they share with others Drawing on a three year study of student persistence and learning at Minority Serving Institutions Clifton Conrad and Todd Lundberg argue that student success in college should be redefined by focusing on the importance of collaborative learning over individual achievement Engaging students in shared real world problem solving Conrad and Lundberg assert will encourage them to embrace interdependence and to value and draw on diverse perspectives Learning with Others presents a set of core practices to empower students to enter nourish and sustain collaborative learning and outlines how to blend the roles and responsibilities of faculty staff and students how to adopt best practices for receiving and

giving feedback on problem solving and how to anchor a curriculum in shared problem solving Bringing together lessons learned from more than 300 interviews along with notes from 14 campus visits 3 national convenings and examples from across our nation's colleges and universities Conrad and Lundberg explore ways in which successful antiracist networks of problem solvers are learning to contribute to the flourishing of their communities on campus and far beyond Outlining strategies for identifying and dismantling barriers to participation Learning with Others will pique interest among faculty students and administrators in higher education and a wide range of external stakeholders from families and communities to policymakers and funders

Biological Approaches to Regenerative Soil Systems Norman Uphoff, Janice Thies, 2023-10-27

Agriculture in the 21st century will need considerable modification to remain both productive and sustainable Greater production is needed to meet the needs of our still growing populations and to combat hunger and poverty Declines in soil health and the pollution of water sources are making many of our production systems less tenable These adverse trends are exacerbated more and more by the impacts of climate change There are fortunately alternative methods available for agricultural practice that can countervail these constraints Biological Approaches to Regenerative Soil Systems brings together the work of both researchers and practitioners to map out better approaches to contemporary agriculture that draw upon both old and new knowledge It presents the science that underlies more biologically driven strategies as well as contemporary innovative experiences in diverse parts of the world Both accepted research and these varied experiences encourage confidence that these approaches not relying primarily on the introduction of new varieties and on exogenous inputs can succeed This book updates and revises a preceding volume Biological Approaches to Sustainable Soil Systems published by CRC Press in 2006 So much has been learned and done on this subject in the past decade and a half that a second edition was warranted For instance the first edition was published knowledge about plant soil microbiomes which are a frequent focus in this book has mushroomed Because sustainability is a broad term and an end state the editors preferred to assemble expertise regarding regenerative agriculture which is concerned with the means for achieving sustainability The concept of regenerative soil systems entities that are more complex and multifaceted than soil alone also incorporates a concern with having more resilient agricultural systems ones that are better able to cope with the multiple stresses of climate change that are foreseen for the decades ahead The book's chapters representing a wide range of disciplines were contributed by 84 scientists and practitioners from 20 countries Although they come from persons with in depth knowledge of their respective fields the chapters are written to be accessible to readers who are not trained in the specialized subjects Taken together the chapters provide students researchers practitioners planners and policy makers with a comprehensive understanding of both the science and the steps needed to regenerate and sustain soil systems around the world for the long term benefit of humankind and the environment

State, Nationalism, and Islamization Raja M. Ali Saleem, 2017-07-11

This book argues that Islam's role in state nationalism is the best predictor of the Islamization of government using two most

different cases Turkey which was an aggressively secular country until recently and Pakistan a country that is synonymous with Islamization It establishes a causal link between Islam's role in state nationalism and Islamization of government during various periods of the history of both countries The indicators used to establish the causal link between Islam's role in state nationalism and Islamization are the presence of Islamic provisions in the constitution Islam inspired national symbols Islamic images on the national currency Islamic basis of family law a Department of Religious Affairs and governmental support for religious education The book concludes by identifying three causal mechanisms legitimacy mobilization and authenticity that link Islam's role in state nationalism and the Islamization of government Knowledge for Social Change

Lee Benson, 2017-07 Employing history social theory and a detailed contemporary case study Knowledge for Social Change argues for fundamentally reshaping research universities to function as democratic civic and community engaged institutions dedicated to advancing learning and knowledge for social change The authors focus on significant contributions to learning made by Francis Bacon Benjamin Franklin Seth Low Jane Addams William Rainey Harper and John Dewey as well as their own work at Penn's Netter Center for Community Partnerships to help create and sustain democratically engaged colleges and universities for the public good Knowledge for Social Change highlights university assisted community schools to effect a thoroughgoing change of research universities that will contribute to more democratic schools communities and societies The authors also call on democratic minded academics to create and sustain a global movement dedicated to advancing learning for the relief of man's estate an iconic phrase by Francis Bacon that emphasized the continued betterment of the human condition and to realize Dewey's vision of an organic Great Community composed of participatory democratic collaborative and interdependent societies Designing Ogden, the Life and Work of Leslie Hodgson

Paul Clemens Murschetz, Roland Teichmann, Matthias Karmasin, 2018-04-01 This book is an analysis of the specificities of public film funding on an international scale It shows how public funding schemes add value to film making and other audio visual productions and provides a comprehensive analysis of today's global challenges in the film industry such as industry change digital transformation and shifting audience tastes Based on insights from fields such as cultural economics media economics media management and media governance studies the authors illustrate how public spending shapes the financial fitness of national and international film industries This highly informative book will help both scholars and practitioners in the film industry to understand the complexity of issues and the requirements necessary to preserve the social benefits of film as an important cultural good **Constructing the Uzbek State**

Marlene Laruelle, 2017-12-20 Over the past three decades Uzbekistan has attracted the attention of the academic and policy

communities because of its geostrategic importance its critical role in shaping or unshaping Central Asia as a region its economic and trade potential and its demographic weight every other Central Asian being Uzbek Uzbekistan s political social and cultural evolutions largely exemplify the transformations of the region as a whole And yet more than 25 years after the collapse of the Soviet Union evaluating Uzbekistan s post Soviet transformation remains complicated Practitioners and scholars have seen access to sources data and fieldwork progressively restricted since the early 2000s The death of President Islam Karimov in power for a quarter of century in late 2016 reopened the future of the country offering it more room for evolution To better grasp the challenges facing post Karimov Uzbekistan this volume reviews nearly three decades of independence In the first part it discusses the political construct of Uzbekistan under Karimov based on the delineation between the state the elite and the people and the tight links between politics and economy The second section of the volume delves into the social and cultural changes related to labor migration and one specific trigger the difficulties to reform agriculture The third part explores the place of religion in Uzbekistan both at the state level and in society while the last part looks at the renegotiation of collective identities

The Accelerating Transport Innovation Revolution George Giannopoulos, John F. Munro, 2019-04-17 The Accelerating Transport Innovation Revolution A Global Case Study based Assessment of Current Experience Cross sectorial Effects and Socioeconomic Transformations offers a comprehensive view of current state of the art and practices around the world to create innovation on a revolutionary scale and connect research to commercial exploitation of its results It offers a fascinating new model of the innovation process based on theories of biological ecosystems general systems theory and basins of attraction represented through space time graphs well known in mathematics Furthermore it considers through a number of dedicated chapters key issues and elements of innovation ecosystems such as Causal Factors and system constraints affecting the development and sustainability of innovation ecosystems Chapter 4 Review of innovation organization and governance in key countries and regions Chapter 5 the role of technological Spillovers Chapter 6 Collection and use of data for innovation monitoring and benchmarking Chapter 7 Intellectual Property protection between competing ecosystems Chapter 8 Economics of innovation Chapter 9 Public and private sector involvement in Transport innovation creation Chapter 10 the role of the individual entrepreneur innovator in energizing change Chapter 11 Finally in Chapter 12 there is a thorough summary of key findings This book uses a paradigmatic approach to augment the innovation ecosystem model of innovation that integrates beliefs and learning into the innovation ecosystems model It therefore includes ten case studies from the U S Europe and Asia detailing how innovation is created across continents and different ecosystems and what are the critical lessons to be learned It does this effectively at five different levels of analysis i e the individual innovator entrepreneur level the organization level government agency or company the regional ecosystem level the nation state level and the global systemic or international level Each level of analysis reveals unique features of the innovation landscape and the ten case studies allow the reader to assess when and

where specific enablers are facilitating innovation especially on a revolutionary scale The need for the book came from the realization that despite the billions of dollars spent on various research programs over the past 20 years especially in the public sector there have been few clear and tangible efforts directed at exploring how innovation production increasingly occurs and the critical factors necessary to sustain large scale revolutionary change as the future unfolds Thus a primary theme of the book is that understanding how research results translate into market innovation and implementation especially understanding the nature of revolutionary innovation is as important as the creation of innovations themselves While the focus of the book is on Transportation the concepts and recommendations presented apply to other fields too **2016**
