The production of a box is very difficult and complicated. It all depends on what you are shipping and where you are shipping it to. If you are shipping a big heavy item you will need a big sturdy box if you are shipping a product far distance you may need something like a crate. It all depends on the size. Box dimensions are displayed as: Length x Width x Depth that determines how big or small the box may be.

For example let s say AmazonB® ships a smartphone to me I ll have to measure the smartphones length width and depth and multiply them all together to get the total area of the phone. If they make the boxes too expensive it can lead to Apple losing more money than they earn. One way Apple makes the Iphone ten box an inexpensive box by keeping all of the items tight in. That means there will be no use for extra foam or other excessive items to keep the phone from breaking or cracking (discluding thin plastic around

Comparativist scholarship conventionally gives unbridled primacy to external material interests chiefly votes and rents as proximately shaping political behaviour These logics tend to explicate elite decision making around elections and pork barrel politics but fall short in explaining political conduct during credibility crises such as democratic governments facing anti corruption movements In these instances Baloch shows elite ideas for example concepts of the nation or technical diagnoses of socioeconomic development dominate policymaking Scholars leverage these arguments in the fields of international relations American politics and the political economy of development But an account of ideas activating or constraining executive action in developing democracies

where material pressures are high is found wanting Resting on fresh archival research and over 120 original elite interviews When Ideas Matter traces where ideas come from how they are chosen and when they are most salient for explaining political behaviour in India and similar contexts

Handbook of East Asian Popular Culture Koichi Iwabuchi, Eva Tsai, Chris Berry, 2016-12-01 Since the 1990s there has been a dramatic increase in cultural flows and connections between the countries in the East Asian region. Nowhere is this more apparent than when looking at popular culture where uneven but multilateral exchanges of Japanese, Korean, Taiwanese, Hong Kong, and Chinese products have led to the construction of an East Asian Popular Culture. This is both influenced by and in turn influences the national cultures and generates transnational co-production and reinvention. As East Asian popular culture becomes a global force, it is increasingly important for us to understand the characteristics of contemporary East Asian popular culture and in particular its transnational nature. In this handbook, the contributors theorize East Asian experiences and reconsider Western theories on cultural globalization to provide a cutting edge overview of this global phenomenon. The Routledge Handbook of East Asian Popular Culture will be of great interest to students and scholars of a wide range of disciplines including Cultural Studies, Media Studies, Communication Studies, Anthropology, Sociology, and Asian Studies in general.

100 years of European Philosophy Since the Great War Matthew Sharpe, Rory Jeffs, Jack Reynolds, 2017-02-14 This book is a collection of specifically commissioned articles on the key continental European philosophical movements since 1914. It shows how each of these bodies of thought has been shaped by their responses to the horrors set in train by World War I and considers whether we are yet post-war. The outbreak of World War I in August 1914 set in chain a series of crises and re-configurations which have continued to shape the world for

a century industrialized slaughter the end of colonialism and European empires the rise of the USA economic crises fascism Soviet Marxism the gulags and the Shoah Nearly all of the major movements in European thinking phenomenology psychoanalysis Hegelianism Marxism political theology critical theory and neoliberalism were forged in or shaped by attempts to come to terms with the global trauma of the World Wars This is the first book to describe the development of these movements after World War I and as such promises to be of interest to philosophers and historians of philosophy around the world *The Transformation of Citizenship, Volume 1* Juergen Mackert, Bryan S. Turner, 2017-03-16 The Transformation of Citizenship addresses the basic question of how we can make sense of citizenship in the twenty first century These volumes make a strong plea for a reorientation of the sociology of citizenship and address serious threats of an ongoing erosion of citizenship rights Arguing from different scientific perspectives rather than offering new conceptions of citizenship as supposedly more adequate models of rights membership and belonging they deal with both the ways citizenship is transformed and the ways it operates in the face of fundamentally transformed conditions This volume Political Economy discusses manifold consequences of a decades long enforcement of neo liberalism for the rights of citizens As neo liberalism not only means a new form of economic system it has to be conceived of as an entirely new form of global regional and national governance that radically transforms economic political and social relations in society Its consequences for citizenship as a social institution are no less than dramatic Against the background of both manifest and ideological processes the book looks at if citizenship has lost the basis it has rested upon for decades or if the institution itself is in a process of being fundamentally transformed and restructured thereby changing its meaning and the significance of citizens rights This book will appeal to academics working in the field of political theory political sociology and European studies
