Death by Government R. J. Rummel, 2018-02-06 This is R. J. Rummel's fourth book in a series devoted to genocide and government mass murder or what he calls democide He presents the primary results in tables and figures as well as a historical sketch of the major cases of democide those in which one million or more people were killed by a regime In Death by Government Rummel does not aim to describe democide itself but to determine its nature and scope in order to test the theory that democracies are inherently nonviolent Rummel discusses genocide in China Nazi Germany Japan Cambodia Turkey Yugoslavia Poland the Soviet Union and Pakistan He also writes about areas of suspected genocide North Korea Mexico and feudal Russia His results clearly and

decisively show that democracies commit less democide than other regimes The underlying principle is that the less freedom people have the greater the violence the more freedom the less the violence Thus as Rummel says The problem is power The solution is democracy The course of action is to foster freedom Death by Government is a compelling look at the horrors that occur in modern societies It depicts how democide has been very much a part of human history Among other examples the book includes the massacre of Europeans during the Thirty Years War the relatively unknown genocide of the French Revolution and the slaughtering of American Indians by colonists in the New World This riveting account is an essential tool for historians political scientists and scholars interested in the study of genocide *From Carnac to Callanish* Aubrey Burl, Dr Aubrey Burl, 1993-01-01 This book discusses the lines of standing stones that until now have been the neglected wonders of prehistoric Europe rows that were foci of rituals in Britain Ireland and Brittany for over two thousand years Places such as Carnac in Brittany and Callanish in the Hebrides are visited by many visitors each year but before now there has been no book that seriously explains the history significance and background to these impressive sites Aubrey Burl shows that the settings vary from pairs of isolated stones in the far south west of Ireland to networks of long lines in Scotland Dartmoor and Brittany and describes the types in a sequence of architectural chapters that stress the increasing social and commercial connections between regions hundred of miles apart He uses information from a wide variety of sources excavation reports megalithic art astronomical analyses and legends to provide explanations of why the rows were erected when and what they may have been used for **Isaiah-Malachi** ,1909 *The Self-interpreting Bible* ,1896 **Charles Bonnet and the Order of the Known** L. Anderson, 2012-12-06 Charles Bonnet began his career as a naturalist from an early age establishing a reputation as a careful observer It is for those youthful observations as well as for some suggestive speculations proposed relative to this field that he is best remembered in English speaking countries regarding the taxonomic demands of natural history he refurbished the idea of a chain of beings regarding the question of generation he marshaled evidence in support of preformation theory and regarding the analysis of the physiology of the nervous system he advanced a theory that individual nerve fibers receive and retain specific sensations Following his loss of eyesight in his mid twenties Bonnet entered a more reflective period turning to philosophy and pondering the nature of human understanding considerations he had formerly disdained but that now seemed a natural outgrowth of his reflections on nature This essay focuses on the philosophical and psychological works of the later period the period in which he wrote all his major books By giving these writings a broader exposure it has been one of my hopes that Bonnet's audience would also be broadened releasing him so to speak from the charge of historians of science so that he might find his way in general books on the Enlightenment from scattered footnotes into the texts themselves **Cana of Galilee, Damascus, Ephesus, Corinth, Thessalonica, Athens, Rome, Etc. References, Explanatory Notes, and Tabulated Statistics by John Brown. The Self-interpreting Bible** ,1896 **The Self-interpreting Holy Bible** ,1873 **Sisters in Sorcery** Alea Henle, 2022-12-15

A swan turns into a naked man A museum formed of everything ever lost and forgotten from treasures to torment A web containing past present and future Three otherwise ordinary sisters encounter magic Viola dives into a twisted version of Swan Lake plus The Magic Flute at college in Swan Shadow Bea explores the depths of loss and remembrance in The Museum of All Things Lost Forgotten Rose lacks magic but manages to make a difference in The Webmasters of Fate Contains previously published works

The Self-interpreting Bible, Containing the Old and New Testaments John Brown, 1791

Amnesiac Selves Nicholas Dames, 2001-06-14 With Joyce Proust and Faulkner in mind we have come to understand the novel as a form with intimate ties to the impulses and processes of memory This study contends that this common perception is an anachronism that distorts our view of the novel Based on an investigation of representative novels Amnesiac Selves shows that the Victorian novel bears no such secure relation to memory and in fact it tries to hide evade and eliminate remembering Dames argues that the notable scarcity and distinct unease of representations of remembrance in the nineteenth century British novel signal an art form struggling to define and construct new concepts of memory By placing nineteenth century British fiction from Jane Austen to Wilkie Collins alongside a wide variety of Victorian psychologies and theories of mind Nicholas Dames evokes a novelistic world and a culture before modern memory one dedicated to a nostalgic evasion of detailed recollection which our time has largely forgotten
