Standardization Potential Within The Marketing Mix In Central Europe:

Contingency Factors of Marketing-Mix Standardization Roxana Codita, 2011-02-07 This study addresses the marketing mix standardization issue in the Central and Eastern European context Special consideration is given to the construct of product cultural specificity for which a new measure is proposed International Marketing Mix Management Tobias Richter, 2012 For years academicians and marketing directors have debated the marketing standardisation versus adaptation of international marketing strategy Despite the great importance of the topic the debate remains unresolved At the same time the continuing globalisation of markets and the growing importance of the emerging BRIC markets make an optimal management of international marketing efforts a necessity Therefore this study offers on the basis of a solid theoretical framework and sound methodological operationalization empirical findings on how to successfully manage both the international marketing mix and the related marketing process in world markets In particular the marketing strategy pursued by multinational corporations are analysed and compared as well as empirical findings relating to financial and non financial performance measures are provided Market Entry Strategies in Eastern Europe in the Context of the European Union Michael Klug, 2007-11-03 There are many reasons why firms decide to extend their business operations by entering foreign markets Whether it is a defensive step aimed at avoiding the consequences of saturating domestic markets or an offensive strategy based on the expectations of unusual profits the most common market entry drivers are widely discussed and understood What remains open is the most intriguing question of the selection of a particular market entry mode and the factors determining the right choice On a theoretical ground the problem may be reduced to the issue of how many links of the Value Chain should be moved abroad in the process of international expansion In practical terms the choice of a market entry mode means a set of decisions taken in each particular case of a firm going international The complexity of the task involves many different areas like the amount of risk the scope of control the level of capital involvement and financial efficiency This is one of the reasons why there is no universal theory explaining the optimal way of making a successful market entry The multitude of views on this subject does not make the question easier **International Business Review** European International Business Academy, 2004 Challenges For the Trade in Central and Southeast Europe Sanda Renko, Blazanka Knezevic, 2013-10-01 This volume focuses on Central and Southeast Europe and explores the dynamic and complex area of distributive trade on markets which have recently undergone a huge transformation Papers in the volume employ both quantitative and qualitative research methods and focus on retailing international trade relationships between retailers and supplier **CIM Coursebook 03/04 Marketing Fundamentals** Frank Withey, 2013-05-13 Each coursebook includes access to MARKETINGONLINE where you can Annotate customise and create personally tailored notes using the electronic version of the coursebook Receive regular tutorials on key topics Search the coursebook online for easy access to definitions and key concepts *Proceedings of IAC 2017 in Vienna* group of authors, 2017-08-15 International Academic

European Standardisation of Services and its Impact on Private Law Barend Van Leeuwen,2017-02-23 With the New Approach the EU has incorporated European standardisation in its

regulatory approach to improve the free movement of goods Such a New Approach does not exist for services Nevertheless a significant number of European services standards have been made This book focuses on European standardisation of services and its impact on private law Two services sectors are analysed the healthcare sector and the tourism sector The core chapters of the book contain a number of case studies based on empirical research in these sectors The first part discusses how European services standards interact with existing legal regulation at the European and national level It is shown that at the European level there is no clear legal framework in which European services standards are adopted This has an impact on their application in private law which is the main theme of the second part of the book Moreover there is a real risk that European services standards create obstacles to free movement This will prevent their successful application in private law
