Doctoring Dying Angela Smith,2013-10-21
Doctoring Dying is a cautionary tale for anybody with assets and a family or government that wants you to sign over those assets before you are dead It highlights the perils of signing away decision making rights through EPAs EPGs and AHDs or Living Wills Doctoring Dying summarises the inappropriate capacity assessment process routinely undertaken by doctors and which the Western Australian State Administrative Tribunal SAT steadfastly relies upon when making a ruling as to whether someone does or doesn t have capacity to make decisions for themselves And if SAT gets it wrong which routinely happens the disempowered victim can look forward to joining the ranks of similar victims whose entire lives have been ruined Attempt to protest your innocence or capacity and you can expect to be declared as exhibiting behavioural symptoms of dementia and end up chemically restrained in a locked ward

Choca, Eric J. Van Denburg,2013-10-28 First published in 1996 The revised and expanded third edition of the Manual for Clinical Psychology Trainees is directed primarily to graduate psychology students although it will prove valuable for everyone involved in patient care This book presents easily understood brief guidelines for each step in the provision of psychological services The authors do not attempt to document every possible approach to every potential issue instead their goal is to clear a path through a complex and multilayered field By targeting the discussion in this way the format allows for the provision of actual methods that work thus enabling the newcomer to accomplish a variety of clinical tasks The authors draw upon their extensive firsthand experience in training to offer essential guidelines for effective clinical work This concise easy to use edition has been thoroughly updated to take into account the numerous advances that have occurred in the field since the previous edition was published in 1988 New to this edition are chapters addressing supervision in clinical psychology and research in a practicum setting Plentiful examples of the interviews reports and records that the practitioner is called upon to conduct or compile are included throughout the text In addition there are

extensive tables detailing various syndromes as well as tests and classes of medication

Principles of Assessment and Outcome Measurement for Occupational Therapists and Physiotherapists Alison Laver Fawcett, 2013-03-15 This textbook on assessment and outcome measurement is written for both occupational therapy and physiotherapy students and qualified therapists. It begins by defining what is meant by assessment, outcome evaluation and measurement and discussing the complexity of therapy assessment and measurement including the challenge of measuring human behaviour and the impact of factors such as task demand and context including the environment. Methods of data collection e.g. observation, interview, standardised testing and sources e.g. self-report proxy for collecting information about clients are then reviewed and the main purposes of assessment e.g. descriptive, evaluative, predictive, discriminative presented. The book then addresses the topics of standardisation, levels of measurement, reliability, validity and clinical utility. There is a chapter describing and applying models for categorizing levels of function to aid assessment and measurement. The concept of clinical reasoning and reflective practice is then explored. Application of principles is supported through detailed case studies and worksheets and the criteria for test critique and guidelines for choosing a particular assessment approach are discussed.

Manual of Clinical Psychopharmacology for Nurses Laura G. Leahy, Christian G. Kohler, 2013-05-07 Manual of Clinical Psychopharmacology for Nurses offers a holistic approach to psychopharmacological prescribing from a nursing perspective and is the only text designed especially for Psychiatric Mental Health Advanced Practice Registered Nurses (PMHAPRNs). The Manual is grounded in the belief that given their nursing background and their personalized approach to the individual PMHAPRNs are uniquely qualified to offer symptom-based treatment within the context of an individual's medical and psychological care. A comprehensive resource for advanced practice nurses, mental health practitioners, general practitioners and consumers, this book possesses many useful features including the following: A logical, easy-to-use format that guides the reader through the most common psychiatric conditions, presenting the diagnostic criteria and neurobiology of the relevant disorder; pharmacological choices and recommendations on monitoring side effects to consider and treatment of special populations including those with medical illnesses; A special chapter devoted to culturally sensitive psychopharmacology that offers information on the role of culture in mental health, wellness and illness and provides culturally sensitive assessment techniques and other treatment strategies PMH nurses can use to minimize stigma, address health care disparities and improve patient adherence, satisfaction and outcomes; A chapter that addresses complementary and alternative pharmacotherapies, vital because a significant percentage of patients may be using herbal preparations which present serious

implications for the prescribing clinician Appendices covering drug dosing equivalencies pharmacogenetics psychiatric rating scales and other helpful resources The core philosophy of the advanced practice nursing field is that health care should be individualized focusing not only on patients conditions but also on the effects those conditions have on patients lives and the lives of their families The Manual of Clinical Psychopharmacology for Nurses offers readers the most current information on psychopharmacological treatment in an accessible easy to use format grounded in the principles and practices of holistic nursing
