

# NON-STANDARDIZED FIELD SOBRIETY TESTS

## COUNTING BACKWARDS TEST

Upon instruction from the police officer, you will be directed to stand with your arms at your sides and to count backward from a specific number. The police officer may ask you to count in reverse order from a completely random set of numbers, such as counting backward from the number 68 to the number 32. During the test, the police officer will look for signs of impairment, including the inability to count, starting or stopping the test too early, and failing to follow the test instructions.

## PORTABLE BREATH TEST

A portable breath test or preliminary breath test (PBT) is a device law enforcement officers use to detect the presence of alcohol in individuals suspected of driving while impaired. The PBT is often used in addition to other FSTs to establish probable cause for arrest for DUI. A PBT will often produce an inaccurate test result if the driver has residual alcohol in their mouth from mouthwash or cough syrup. A PBT is not calibrated or tested for accuracy. Therefore, the test result is not admissible as evidence in a DUI trial.

## FINGER COUNT TEST

The police officer will ask you to touch the tip of your thumb in turn to the end of each finger on the same hand while simultaneously counting from 1 to 4. You will then be required to simultaneously reverse direction on your fingers while counting from 4 to 1. During the test, the police officer will look for signs of impairment, including the inability to follow the instructions, the failure to touch one's fingers as instructed, the inability to perform the correct number of sets, and stopping the test before being required to do so.

## ALPHABET TEST

You will be asked by the police officer to recite part of the alphabet from the beginning, starting at a letter other than the letter A and stopping at a letter other than the letter Z. During the test, the police officer will look for signs of impairment, including slurred speech, an inability to correctly recite the alphabet, the starting of the test too soon and a failure to follow directions.

## FINGER-TO-NOSE TEST

You will be instructed by the police officer to bring the tip of your index finger to the end of your nose. At the same time, your eyes are closed, and your head is tilted slightly back. You must attempt to touch the tip of your nose 3 times with each hand. During the test, the police officer will look for signs of impairment, including the driver's inability to follow the instructions, swaying, tremors, the inability to hold the finger directly on the tip of the nose, and poor depth perception.

## ROMBERG BALANCE TEST

The police will instruct you to stand with your feet together while leaning your head back and closing your eyes with your arms at your side. You will be asked to hold this position for approximately 30 seconds. During the test, the police officer will look for signs of impairment, including swaying, eyelid tremors, and an inability to accurately estimate 30 seconds.

## **Standardized Field Sobriety Training Manual 2006:**

*A MANUAL OF PRIVATE INVESTIGATION TECHNIQUES* William F. Blake, 2013-02-01 This book will help the private investigator reevaluate business opportunities and identify goals for the future. The world of the private investigator is constantly changing due to the introduction of various legal requirements that have restricted or eliminated some of the methods available for obtaining information such as the various privacy protection acts. Additionally, most private investigators have restricted their business activities to a response mode that is conducting inquiries after an incident has occurred. Their preventive skills have been ignored to their financial detriment. As restrictions continue to be placed on private investigative activities, private investigators need to reevaluate personal skills and discover how these may relate to expanding their services. This book provides the necessary information for learning about these new skill areas and provides the necessary strategies for their implementation. Some of the topics cover crime and loss prevention strategies, risk assessment and prevention strategies. Many other topics are also covered such as that of the expert witness. This is not a difficult status to attain but requires unique skill sets and experience and can be highly lucrative. Crises management is another skill set that is explored here. It not only identifies potential risk areas through risk assessment activities but includes development and implementation of preventive measures and shows how the private investigator can assist in restoring business operations to their normal levels. This book will be of enormous help to private investigators who wish to develop these sophisticated investigative business skills and preventive services in order to meet these challenges for surviving and thriving in this modern age industry.

offer some practical pointers on using the Rules The book itself has been designed to make it as useful as possible to the harried judge counsel and student who must quickly find the law Following each Rule is an editorial commentary on the Rule explaining how the Rule works what the Texas courts have said about the Rule and how it compares with the Federal Rule because Texas courts often review federal precedent where they find it helpful in applying a Texas Rule When appropriate practical pointers are also provided on how to use the Rule Where the Rules apply in the same fashion for both civil and criminal cases those points are discussed together On the other hand where they diverge the authors have used separate headings for Civil and Criminal when that seems appropriate One of the objectives of the Editorial Analysis in this text is to deal with the interrelationships of the various Rules The authors have noted those areas where the Rules differ from pre Rules case law or statutory provisions Some of the Rules changed the prior Texas evidence law and although many of the Texas Rules agree with the Federal Rules a number differ significantly **Jones on Evidence** Burr W.
