

### Standardized Testing Essay

Standardized testing that has appeared in support of the effort at mass education in the mid 1800s continues to dominate the US educational system, causing some to describe Americans as a nation of “standardized-testing junkies” (Sacks, 2000). Indeed, large-scale testing has enabled the creation of more or less objective criteria for performance assessment nation-wide. On the other hand, it is this ‘more or less’ that arouses a storm of criticism from opponents of testing.

One of the problems associated with testing is that teachers and students are forced into spending class time budget on test preparation as opposed to real learning. It has been estimated that “in some Arizona school systems, for example, testing required by the state and individual districts already consumes 20% of a student’s total time in class” (Jorgenson et al., 2002). This time waste will likely be exacerbated with the passage of No Child Left Behind Act that will take testing to grades 3 to 8. Time spent on preparation for the test disrupts the normal flow of the course and makes the teacher devote time and effort to activities that are unrelated to the subject matter under investigation. Test drills are typically rather monotonous and thus time spent in test preparation can be used more effectively on creative tasks that will improve the student’s thinking abilities. Thus, tests do not improve performance – in fact, they decrease it through consuming time necessary for more meaningful activities.

Besides, testing often leads a desperate rush for results, increasing “pressure and stress on children, which sets them up for failure, lowered self-esteem and potential health risks” (Allison et al., 1998). The time of the school year spent in preparation for the test is full of stress for all participants of the process – teachers, children and parents. Too much of a child’s future depends on test scores, a responsibility often too grave for the young minds. This pressure can act depressing with regard to the child’s school performance as one will find it difficult to devote the same time and effort to other school tasks when test preparation takes up all the necessary time. This mounting stress can also depress the child’s performance in the test itself, which may deprive universities and colleges of some talented students who failed to demonstrate the proper resilience at this very young age – not the proof that they will not develop the
