Play It Again, Sam Samuel Jay Keyser, 2025-05-27 Why we enjoy works of art and how repetition plays a central part in the pleasure we receive Leonard Bernstein in his famous Norton Lectures extolled repetition saying that it gave poetry its musical qualities and that music theorists refusal to take it seriously did so at their peril *Play It Again Sam* takes Bernstein seriously In this book Samuel Jay Keyser explores in detail the way repetition works in poetry music and painting He argues for example that the same cognitive function underlies both how poets write rhyme in metrical verse and the way songwriters like Duke Ellington and Billy Strayhorn *Satin Doll* and Richard Rodgers and Lorenz Hart *My Funny Valentine* construct their iconic melodies Furthermore the repetition found in these tunes can also be found in such classical compositions as Mozart's *Rondo alla Turca* and his *German Dances* as well as in galant music in general The author also looks at repetition in paintings like Gustave Caillebotte's *Rainy Day in Paris* Andy Warhol's *Campbell's Soup Cans* and Jackson Pollock's drip paintings Finally the photography of Lee Friedlander *Roni Horn* and Osmond Giglia *Giglia's Girls in the Windows* is one of the highest grossing photographs in history are all shown to be built on repetition in the form of visual rhyme The book ends with a cognitive conjecture on why repetition has been so prominent in the arts from the Homeric epics through Duke Ellington and beyond Artists have exploited repetition throughout the ages The reason why is straightforward the brain finds the detection of repetition innately pleasurable *Play It Again Sam* offers experimental evidence to support this claim

You are what You Hear Harry Witchel, 2010 Pondering the musicality of everything from bird songs to the language he calls motherese Dr Witchel illustrates the power of music and addresses the questions Why do we have music What does music do to our emotions Can animals hear and understand music What does music do to your brain Why do people listen to sad music Why do some people like classical but others only like heavy metal Is there some essential feature to all music *You Are What You Hear* is an erudite and entertaining study that is unique in many ways No other book has thoroughly elaborated the connection between music and social territory in humans although in other music making species scientists have shown this connection to be clear cut Given the wealth of scientific evidence and historical narratives presented in *You Are What You Hear* an intellectual investigation of this avenue is long overdue Written by a psychobiologist the work straddles hard science

Gerald Goldstein,Paul David Nussbaum,Sue R. Beers,2013-06-29 In this volume of the series Human Brain Function Assessment and Rehabilitation we cover the area of how brain function is assessed with behavioral or neuropsychological instruments These assessments are typically conducted by clinical neuropsychologists or behavioral neurologists and so we made an effort to present the somewhat differing approaches to these two related disciplines Clinical neuropsychologists are psychologists who typically utilize standardized tests while behavioral neurologists are physicians who generally assess brain function as part of the clinical neurological evaluation Both approaches have much to offer The basic assumption of neuropsychological assessment is that the brain is the organ of behavior and therefore the condition of the brain may be evaluated with behavioral measures Neuropsychological tests are those measures found by research to be particularly sensitive to alterations in brain function An adequate neuropsychological test is a procedure that can be related to some objective measure of alteration in brain function Over the years these objective measures have changed but generally involve documentation through direct observation of brain tissue or through histological pathological neuroimaging or other laboratory procedures The methods described in the first two volumes of this series describe the neuroimaging procedures that are often used in the validation of neuropsychological tests Handbook of Research and Policy in Art Education Elliot

The Measurement of Intelligence Lewis Madison Terman, 1916 The constant and growing use of the Binet Simon intelligence scale in public schools institutions for defectives reform schools juvenile courts and police courts is sufficient evidence of the intrinsic worth of the method It is generally recognized however that the serviceableness of the scale has hitherto been seriously limited both by the lack of a sufficiently detailed guide and by a number of recognized imperfections in the scale itself The Stanford revision and extension has been worked out for the purpose of correcting as many as possible of these imperfections and it is here presented with a rather minute description of the method as a whole and of the
