Order of the Universe

Universe, Galaxy, Solar System, Stars, Planet

- Universe - 13.7 billion years old - began with Big Bang
- Galaxy - collections of billions of stars. Ours is called the Milky Way. We are on the outside arm of this spiral shaped galaxy.
- Solar System - a star that has planets and moons revolving around it
- Star - only objects in space that makes their own light. They do this through nuclear fusion.
- Planets - round objects that directly revolve around the star.

Happened about 13.7 billion years
ago

Universe is still expanding and
cooling from this explosion

**Big Bang
Theory**

The universe began when an
extremely dense concentration of
matter (one single atom) that
exploded

Evidence

Red shift - when we look at distant galaxies
we see that their spectrum is shifting to the
longer wave red color. This means they are
moving away from us.

Cosmic Background Radiation - the light
remains from the Big Bang have now become so
stretched out from expansion that they
are microwaves.

Doppler Effect - waves that are moving away from
us are longer because they are being stretched.
When waves are moving towards us, they are
shorter because they are being compressed.

Blue shift - moving
towards us

Resources for Teaching Middle School Science Smithsonian Institution, National Academy of Engineering, National Science Resources Center of the National Academy of Sciences, Institute of Medicine, 1998-04-30. With age appropriate inquiry centered curriculum materials and sound teaching practices middle school science can capture the interest and energy of adolescent students and expand their understanding of the world around them. *Resources for Teaching Middle School Science* developed by the National Science Resources Center NSRC is a valuable tool for identifying and selecting effective science curriculum materials that will engage students in grades 6 through 8. The volume describes more than 400 curriculum titles that are aligned with the National Science Education Standards. This completely new guide follows on the success of *Resources for Teaching Elementary School Science* the first in the NSRC series of annotated guides to hands on inquiry centered curriculum materials and other resources for science teachers. The curriculum materials in the new guide are grouped in five chapters by scientific area: Physical Science, Life Science, Environmental Science, Earth and Space Science, and Multidisciplinary and Applied Science. They are also grouped by type: core materials, supplementary units, and science activity books. Each annotation of curriculum material includes a recommended grade level, a description of the activities involved, and of what students can be expected to learn, a list of accompanying materials, a reading level, and ordering information. The curriculum materials included in this book were selected by panels of teachers and scientists using evaluation criteria developed for the guide. The criteria reflect and incorporate goals and principles of the National Science Education Standards. The annotations designate the specific content standards on which these curriculum pieces focus. In addition to the curriculum chapters, the guide contains six chapters of diverse resources that are directly relevant to middle school science. Among these is a chapter on educational software and multimedia programs, chapters on books about science and teaching, directories and guides to science trade books and periodicals for teachers and students. Another section features institutional resources. One chapter lists about 600 science centers, museums, and zoos where teachers can take middle school students for interactive science experiences. Another chapter describes nearly 140 professional associations and U.S. government agencies that offer resources and assistance. Authoritative, extensive, and thoroughly indexed, and the only guide of its kind, *Resources for Teaching Middle School Science* will be the most used book on the shelf for science teachers, school administrators, teacher trainers, science curriculum specialists, advocates of hands on science teaching, and concerned parents.
