interplay of race ethnicity class and gender the global scope of many problems and how researchers take an evidence based approach to studying problems Sex, Drugs, and Body Counts Peter Andreas, Kelly M. Greenhill, 2011-01-15 At least 200 000 250 000 people died in the war in Bosnia There are three million child soldiers in Africa More than 650 000 civilians have been killed as a result of the U S occupation of Iraq Between 600 000 and 800 000 women are trafficked across borders every year Money laundering represents as much as 10 percent of global GDP Internet child porn is a 20 billion a year industry These are big attention grabbing numbers frequently used in policy debates and media reporting Peter Andreas and Kelly M Greenhill see only one problem these numbers are probably false Their continued use and abuse reflect a much larger and troubling pattern policymakers and the media naively or deliberately accept highly politicized and questionable statistical claims about activities that are extremely difficult to measure As a result we too often become trapped by these mythical numbers with perverse and counterproductive consequences This problem exists in myriad policy realms But it is particularly pronounced in statistics related to the politically charged realms of global crime and conflict numbers of people killed in massacres and during genocides the size of refugee flows the magnitude of the illicit global trade in drugs and human beings and so on In Sex Drugs and Body Counts political scientists anthropologists sociologists and policy analysts critically examine the murky origins of some of these statistics and trace their remarkable proliferation They also assess the standard metrics used to evaluate policy effectiveness in combating problems such as terrorist financing sex trafficking and the drug trade The Routledge Handbook of Chinese Criminology Liqun Cao, Ivan Y. Sun, Bill Heberton, 2013-07-24 As the world's second largest economy China has made great progress in developing criminology The Routledge Handbook of Chinese Criminology aims to be a key reference point to summarize the large body of literature in both Chinese and English about various aspects of crime and its control in China for international scholars with an interest in the development of criminological research on and in the Greater China region and for everyone with a broad interest in international criminology The editors of the handbook have selected authoritative contributors recognized for their research and scholarship on China Hong Kong Macao and Taiwan This handbook consists of five sections An account of the development of criminology as an academic discipline in modern China as well as some of the unique theories strategies or philosophies of crime control that have emerged An analysis of the criminal justice system in China including the police the courts corrections juvenile justice and the death penalty An exploration of the issues and problems in conducting research in China Reflections on the nature of crime and criminality in China including drugs prostitution human trafficking corruption floating population domestic violence and white collar crime An account of crime and criminal justice in Taiwan Hong Kong and Macao The book presents a coherent and comprehensive collection of essays on current research and theory in criminology crime and justice in China and Greater China and the Editors Introduction and Conclusion provide further contextualisation of the Handbook's key themes Picturing the Uncertain World Howard Wainer, 2009 From the publisher This book

explores how graphs can serve as maps to guide us when the information we have is ambiguous or incomplete Using a visually diverse sampling of graphical display from heartrending autobiographical displays of genocide in the Kovno ghetto to the Pie Chart of Mystery in a New Yorker cartoon Wainer illustrates the many ways graphs can be used and misused as we try to make sense of an uncertain world Picturing the Uncertain World takes readers on an extraordinary graphical adventure revealing how the visual communication of data offers answers to vexing questions yet also highlights the measure of uncertainty in almost everything we do Are cancer rates higher or lower in rural communities How can you know how much money to sock away for retirement when you don't know when you'll die And where exactly did nineteenth century novelists get their ideas These are some of the fascinating questions Wainer invites readers to consider Along the way he traces the origins and development of graphical display from William Playfair who pioneered the use of graphs in the eighteenth century to instances today where the public has been misled through poorly designed graphs
