Meeks, PhD, Neera R. Jain, MS, CRC, 2015-08-13 Describes how to meet the needs of health science students with disabilities

Students with disabilities studying health sciences face unique challenges within their educational environments that require distinct accommodations. This manual is a vital resource for administrators and faculty in health science programs that describes how to create accommodations that meet the needs of students with disabilities in academic health science settings. Grounded in federal disability law, case law, and Office for Civil Rights OCR determinations, this highly practical manual is written by experienced disability service providers from some of the most prestigious health science schools in the country. In a clear, well-organized format, they bring their expertise to bear on all aspects of disability and disability law in the health science setting. Citing legal cases and real-life scenarios, the manual describes best practices for good decision-making, how to avoid problems by implementing strong accessibility-focused policies, and how to resolve problems in difficult cases with a focus on providing effective services for students while protecting the institution from potential liability. Each chapter is replete with illustrative examples, including tips for creative accommodations, advice for troubleshooting, and specific guidance for working with students with all types of disabilities. The book describes the process for determining disability accommodations and provides examples of typical accommodations in didactic as well as clinical and laboratory settings. Tools provided in the text include sample letters and procedures, lists of nationwide professional resources, flowcharts, graphs, and worksheets to assist disability service providers with determining and implementing appropriate student accommodations. Additionally, it discusses myths about disability, the importance of professional communication around disability, and how to encourage a culture of disability acceptance within schools. With its concrete framework, this book will help disability service and administrative professionals move away from a mode of putting out fires and toward establishing a welcoming environment where students feel safe to disclose their disabilities early and seek the support and accommodations needed to facilitate equal access.

Key Features: Addresses all aspects of disability and disability law for students in the health science setting. Includes clearly written Do's and Don'ts. Presents examples of accommodations that are appropriate in the classroom, clinic, and laboratory. Provides easy-to-follow flowcharts and worksheets. Includes resources for students and legal case examples throughout.

The Trial Process Bruce Dennis Sales, 2013-11-11 As noted in the Preface to Volume 1 in this series the goal of Perspectives in Law and Psychology is to provide a forum for books aimed at systematically interfacing the two disciplines Toward this end Volume 1 presented a collection of original writings focused on the criminal justice system that grew out of a conference held at the University of Nebraska at Lincoln Because that volume was based on conference proceedings however an attempt was not made to provide thorough coverage of all law psychology issues in the criminal justice system rather it highlighted a select few issues that were currently being investigated by some of the outstanding people in the field This volume differs substantially from the first in that it attempts to bring together those psycholegal scholars who are doing the major research on the trial process today and provides broad coverage of critical research on the trial Thus the chapters not only provide an extensive review of existing literature in this field but also present new contributions by these scholars
