

This announcement contains all the requirements for lab reports and lab ethics throughout the semester. Failing to follow the provided instructions will result in deduction of grades and further penalties:

Lab Ethics:

- Submit your report by the beginning of the next lab. Late penalty: 10% per day will be deducted from your report, don't accept lab report 4 days late after due day.
- You have one week to work on your report.

Lab Reports:

1. Abstract:

Briefly discuss what you are going to do in this lab, how do you achieve the goal of this lab, and what results are you expecting from this lab. **No longer than half page.**

2. Introduction Section:

Each time we start performing a new type of testing (compression, bending, ...), the report corresponding to that specific type of test should **contain theoretical background**.

It should contain separate paragraphs about each material type (ex, one paragraph for Aluminum grades, one for Steel grades, ...)

It should contain one finalizing paragraph that states what you are trying to achieve by performing the experiment.

3. Methods Section:

Include a picture of your setup/apparatus/fixtures while your sample is installed prior testing.

Instead of mentioning the dimensions, types, and number of specimens inside your text, you should **create a table** that contains all the information.

4. Results Section:

Include a **comprehensive table** (as shown on sample reports on eLearning), with appropriate units, and **significant figures** (ex, stress-strain, load-displacement, linear fitting of Young's modulus, offset lines for yield points, etc.)

discussed This chapter begins with defining a control system based on which momentum analysis of the flow system is explained The rest of the chapter is allotted to the force acting on a control system the linear momentum equation and the energy equation Chapter 4 also covers the hydraulic grade line and energy grade line experiment The effect of orifice and changing cross sectional area by using Bernoulli s equation is presented in Chapter 4 The application of the siphon is extended from Chapter 4 by applying Bernoulli s equation The last two chapters cover various topics in both internal and external flows which are of great importance in engineering design Chapter 5 deals with internal flow including Reynolds number flow classification flow rate measurement and velocity profile The last experiment in Chapter 5 is devoted to a deep understanding of internal flow concepts in a piping system In this experiment students learn how to measure minor and major head losses as well as the impact of piping materials on the hydrodynamics behavior of the flow Finally open channels weirs specific energy and flow classification hydraulic jump and sluice gate experiments are covered in Chapter 6

Writing Guide with Handbook Michelle Bachelor Robinson, Maria Jerskey, Toby Fulwiler, 2021-12-14 Writing Guide with Handbook aligns to the goals topics and objectives of many first year writing and composition courses It is organized according to relevant genres and focuses on the writing process effective writing practices or strategies including graphic organizers writing frames and word banks to support visual learning and conventions of usage and style The text includes an editing and documentation handbook which provides information on grammar and mechanics common usage errors and citation styles Writing Guide with Handbook breaks down barriers in the field of composition by offering an inviting and inclusive approach to students of all intersectional identities To meet this goal the text creates a reciprocal relationship between everyday rhetoric and the evolving world of academia Writing Guide with Handbook builds on students life experiences and their participation in rhetorical communities within the familiar contexts of personal interaction and social media The text seeks to extend these existing skills by showing students how to construct a variety of compelling compositions in a variety of formats situations and contexts The authors conceived and developed Writing Guide with Handbook in 2020 its content and learning experiences reflect the instructional societal and individual challenges students have faced The authors invite students and instructors to practice invitational discussions even as they engage in verbal and written argument Instructors will be empowered to emphasize meaning and voice and to teach empathy as a rhetorical strategy Students will be empowered to negotiate their identities and their cultures through language as they join us in writing discovering learning and creating This is an adaptation of Writing Guide with Handbook by OpenStax You can access the textbook as pdf for free at openstax.org Minor editorial changes were made to ensure a better ebook reading experience This is an open educational resources OER textbook for university and college students Textbook content produced by OpenStax is licensed under a Creative Commons Attribution 4.0 International License *Annual Report to Congress of the Atomic Energy Commission* U.S. Atomic Energy Commission, 1964 *Annual Report to Congress of the Atomic Energy*
