Handbook of Quality of Life in African Societies Irma Eloff, 2019-08-09 This handbook reflects on quality of life in societies on the continent of Africa. It provides a widely interdisciplinary text with insights on quality of life from a variety of scientific perspectives. The handbook is structured into sections covering themes of social context, culture and community, the environment and technology, health, education and family. It is aimed at scholars who are working towards sustainable development at the intersections of multiple scientific fields and it provides measures of both objective and subjective quality of life. The scholarly contributions in the text are based on original research and it spans fields of research such as cultures of positivity, wellbeing, literacy and multilingualism, digital and mobile technologies, economic growth, food and nutrition, health promotion, community development, teacher education and family life. Some chapters take a broad approach and report on research findings involving thousands and in one case millions of participants. Other chapters zoom in and illustrate the importance of specificity in quality of life studies. Collectively, the handbook illuminates the particularity of quality of life in Africa, the unique contextual challenges and the resourcefulness with which challenges are being mediated. This handbook provides empirically grounded conceptualizations about life in Africa that also encapsulate the dynamic, ingenious ways in which we as Africans enhance our quality of life.

Teacher Education in Diverse Settings Larry Prochner, Ailie Cleghorn, Anna Kirova, Christine Massing, 2016-09-27 Teacher Education in Diverse Settings presents a study of initial educator preparation in three social contexts: a training program for immigrant child care educators in Canada, a pre and lower primary specialization in a teacher education program in Namibia, and a partnership between the Misak indigenous communities in Colombia and the University of Cauca to deliver courses for educators within their communities. In each setting, the book explores the relationships between indigenous ways of thinking and western discourse in reference to the preparation of educators, whether they be teachers, community leaders, or newly arrived immigrants in Canada. In each case, the authors' focus is on the tensions between the local understandings and global ideas and the creation of space for diverse but intersecting worldviews. The book's goal is to investigate ways that teacher educators, parents, and communities can better prepare children for the realities of schooling while preserving the integrity of local norms and values through educator preparation programs.

Tombe, 2017-09-28 The South Sudan Skills Story is an account about manpower and education development in South Sudan a narrative that includes efforts exerted in attainment of the much needed workforce for fuelling the countrys economy now fatally impacted by the ongoing internal strife Prior to escalation of the armed conflict that broke out in December 2013 hardly four years after the country gained its sovereignty on July 9 2011 the new nation was on course in setting up its new education system and basis of sustainable human development now shattered by the vicious war The conflict has eroded the countrys human potential through loss of life skills wastage and extreme brutalities perpetrated against citizens by the war drivers The education quandary is compounded by displacement of over 3 million people from their homes and localities a dire situation that has caused severe food insecurity affecting over 7 5 million people With over 2 million children forced out of school particularly in the most conflict affected regions of South Sudan including over 1 4 million forced out of the country as refugees to neighbouring countries it means that one in every three children in

the country is out of school The scale and magnitude of the unending human dispersal has severely curtailed South Sudans ability to provide education to all its citizens The once adopted slogan of bringing education to all in the country is now a far cry as the new nation heads to total collapse if the conflict is not halted The South Sudan Skills Story urges the leaders of South Sudan who are proponents of the conflict to rise above self serving political cleavages to stop the war for peace so that all the citizens are availed the opportunity to realize their fullest potential for development of the country The narrative concludes that the people of this young nation will remain one of the most undereducated populations in the world as long as the legacy of war violence and impunity prevails in the country
