Open and Distance Education in Asia, Africa and the Middle East Olaf Zawacki-Richter, Adnan Qayyum, 2019-02-18 This book is open access under a CC BY 4.0 license. This book describes the history, structure and institutions of open and distance education in six countries: China, India, Russia, Turkey, South Africa and South Korea. It describes how open and distance education is evolving in a digital age to reflect the needs and circumstances of the national higher education systems in these countries. It also explores the similarities and differences between how their open and distance higher education systems are managed and structured. This book is the second in a series following *Open and Distance Education in Australia, Europe and the Americas* (Springer 2018). Both books compare and draw conclusions about the nature of open and distance education in the context of various national higher education systems. In a digital era characterized by the growing use of online open and distance education, this book will prove particularly valuable for policy makers and senior administrators who want to learn about establishing or expanding open and distance education services. In addition, it offers a valuable reference guide for researchers, academics and students interested in understanding the different approaches to open and distance education.

Public Sector Reform in South Africa 1994-2021 Robert Cameron, 2022-08-02. Public Sector Reform in South Africa 1994-2021 is an examination of specific public sector reforms in three core Public Administration areas in the democratic South Africa: political-administrative relationships, the delegation of authority to senior managers and performance management.

The Legal Protection of Women From Violence Rashida Manjoo, Jackie Jones, 2018-03-22. Violence against women remains one of the most pervasive human rights violations in the world today and it permeates every society at every level. Such violence is considered a systemic, widespread and pervasive human rights violation experienced largely by women because they are women. Yet at the international level, there is a gap in the legal protection of women from violence. There is currently no binding international convention that explicitly prohibits such violence or calls for its elimination or mandates the criminalisation of all forms of violence against women. This book critically analyses the treatment of violence against women in the United Nations system and in three regional human rights systems. Each chapter explores the advantages and disadvantages coming from the legal instruments, the work of the monitoring systems and the resulting findings and jurisprudence. The book proposes that the gap needs to be addressed through a new United Nations Convention on the Elimination of All Forms of Violence against Women or alternatively an Optional Protocol to the Convention on the Elimination of all Forms of Discrimination against Women. A new Convention or Optional Protocol would be part of the transformative agenda that is needed to normatively address the promotion of a life free of violence for women, the responsibility of states to act with due diligence in the elimination of all forms of violence against all women and the systemic challenges that are the causes and consequences of such violence.

South African Schooling: The Enigma of Inequality Nic Spaull, Jonathan D. Jansen, 2019-11-05 This volume brings together many of South Africa's leading scholars of education and covers the full range of South African schooling from financing and policy reform to in depth discussions of literacy numeracy teacher development and curriculum change The book moves beyond a historical analysis and provides an inside view of the questions South African scholars are now grappling with Are there different and preferential equilibria we have not yet thought of or explored and if so what are they In practical terms how does one get to a more equitable distribution of teachers resources and learning outcomes While decidedly local these questions resonate throughout the developing world South Africa today is the most unequal country in the world The richest 10% of South Africans lay claim to 65% of national income and 90% of national wealth This is the largest 90/10 gap in the world and one that is reflected in the schooling system Two decades after apartheid it is still the case that the life chances of most South African children are determined not by their ability or the result of hard work and determination but instead by the colour of their skin the province of their birth and the wealth of their parents Looking back on almost three decades of democracy in South Africa it is this stubbornness of inequality and its patterns of persistence that demands explanation justification and analysis This is a landmark book on basic education in South Africa an essential volume for those interested in learning outcomes and their inequality in South Africa The various chapters present conceptually and empirically sophisticated analyses of learning outcomes across divisions of race class and place The book brings together the wealth of decades of research output from top quality researchers to explore what has improved what has not and why Prof Lant Pritchett Harvard University There is much wisdom in this collection from many of the best education analysts in South Africa No surprise that they conclude that without a large and sustained expansion in well trained teachers early childhood education and adequate school resources South Africa will continue to sacrifice its people's future to maintaining the privileges of the few Prof Martin Carnoy Stanford University Altogether one can derive from this very valuable volume if not an exact blueprint for the future then certainly at least a crucial and evidence based itinerary for the next few steps Dr Luis Crouch RTI

Breeding Sorghum for Diverse End Uses Aruna C, K.B.R.S. Visarada, B. Venkatesh Bhat, Vilas A.

Tonapi,2018-08-22 **Breeding Sorghum for Diverse End Uses** is a comprehensive overview of all significant global efforts for the genetic improvement of sorghum a major crop of many semi arid nations that is suitable for a huge range of uses from human food to biofuels Split into two main sections the book initially reviews the genetic suitability of sorghum for breeding also providing the history of the genetic improvement of the grain Finally other sections look at specific breeding programs that could be improved in a number of areas including human food animal feed and industrial usage Readers in academics research plant genetics and sorghum development will find this resource of great value In addition it is essential reading for engineers who utilize sorghum for food feed and industrial materials in industry Provides information on key advances in the genetic makeup of sorghum Allows plant breeders to apply this research to effectively breed new strains of sorghum that are dependent on final usage goals Includes the latest findings in each section to orient researchers to plans for future genetic enhancement

Virtues and Fallacies of VAT: An Evaluation after 50 Years Robert F. van Brederode,2021-08-09 Value added tax VAT is a mainstay of revenue systems in more than 160 countries Because consumption is a more stable revenue base than other tax bases VAT is less distorting and hence more likely to encourage investment savings optimum labor supply decisions and growth VAT is not without criticism however and faces its own specific technical and policy challenges This book the first to thoroughly evaluate VAT from a global policy perspective after over 50 years of experience with its intricacies offers authoritative perspectives on VAT s full spectrum from its signal successes to the subtle ways its application can undermine revenue performance and economic neutrality The contributors leading tax practitioners and academics examine the key policy issues and topics that are crucially relevant for measuring the success of the tax in the first part of the book including revenue generation and revenue efficiency single rate versus multiple rates susceptibility to fraud exemptions and exceptions compliance cost for businesses policy and compliance gaps in revenue collection adjustment rules caused by the transactional nature of the tax transfer pricing issues treatment of vouchers permanent establishments and holding companies payment of refunds cross border digital transactions and

supplies for free or below cost price The second part offers six country reports on New Zealand Japan China Colombia Ethiopia and India to demonstrate the different ways in which VAT operates in a variety of national economies Whether a government is contemplating the imposition of a general consumption tax for the first time or new rules for applying an existing one it is important for policymakers to keep central the aim to design a tax that realizes optimal efficiency and causes minimal distortions This invaluable book serves as an expert guide to VAT policy development in this area It will be welcomed not only by concerned government officials but also by tax professionals both lawyers and accountants and academics in tax law The End of Compassion Alejandro Portes,Patricia Fernandez-Kelly,2020-12-17 This book brings together the most recent and the most comprehensive collection of articles on a population at risk the children of immigrants in the United States especially those children whose parents came to the country without legal authorization The end of compassion and the shift to temporary migration to source the labour needs of the American economy have brought in their wake a series of consequences some of which were predictable and others unexpected The chapters fully document the nature and implications of the enforcement initiatives implemented by the American government in recent years and their interaction with state policies and local contexts of reception This collection provides an exhaustive testimony of the severe conditions faced by unauthorized migrant families and their children today and their repercussions in both countries of origin and those where they currently live The End of Compassion will be of interest to researchers and academics studying migration in the United States and ethnic and racial studies and to advanced students of sociology public policy law and political science This book was originally published as a special issue of the journal Ethnic and Racial Studies

Identification and Citizenship in Africa Séverine Awenengo Dalberto,Richard Banégas,2021-05-09 In the context of a global biometric turn this book investigates processes of legal identification in Africa from below asking what this means for the relationship between citizens and the state Almost half of the population of the African continent is thought to lack a legal identity and many states see biometric technology as a reliable and efficient solution to the problem However this book shows that biometrics far from securing identities and avoiding fraud or political distrust can even participate in reinforcing exclusion and polarizing debates on citizenship and national belonging It highlights the social and political embedding of legal identities and the resilience of the documentary state Drawing on empirical research conducted across 14 countries the book documents the processes practices and meanings of legal identification in Africa from the 1950s right up to the biometric boom Beyond the classic opposition between surveillance and recognition it demonstrates how analysing the social uses of IDs and tools of identification can give a fresh account of the state at work the practices of citizenship and the role of bureaucracy in the writing of the self in African societies This book will be of an important reference for students and scholars of African studies politics human security and anthropology and the sociology of the state **Abiotic Stresses in Agroecology: A Challenge for Whole Plant Physiology** Mauro Centritto,2017-07-04 Understanding plant responses to

Legal and Ethical Standards in Corporate Insolvency Elizabeth Streten, 2024-06-17 Recent financial crisis and the global financial impacts of the COVID 19 pandemic have brought renewed interest to the regulation and practice of corporate insolvency and restructuring Modernisation of the insolvency profession and the regulation of its practitioners is a contemporary concern and recent years have seen significant reforms of insolvency law The success of such reforms can be enhanced through a clear understanding of difficulties faced by the insolvency profession in achieving successful restructuring and insolvency outcomes and through the determination of effective solutions to those difficulties However there is limited empirical data to inform the day to day practice of insolvency nor the difficulties experienced by insolvency practitioners in pursuing insolvency and restructuring solutions This book addresses this absence of data and understanding examining the role and practice of corporate insolvency practitioners and exploring the challenges that they

encounter Offering an empirical study together with a comparative analysis of the experiences of practitioners around the world this book facilitates a greater understanding of corporate insolvency practice confronting a misunderstanding of and under confidence in corporate insolvency practitioners making it key reading for academics practitioners and regulators working in the area of corporate insolvency *The Future of Accessibility in International Higher Education* Alphin Jr., Henry C., Chan, Roy Y., Lavine, Jennie, 2017-05-17 Education is the foundation to almost all successful lives and it is important that a high level of schooling be available on a global scale Studying the trends in accessibility in education will allow educators to improve their own teaching techniques as well as expand their influence to more remote areas in the world The Future of Accessibility in International Higher Education is a comprehensive reference source for the latest scholarly material on emerging methods and trends in disseminating knowledge in university settings Featuring extensive coverage on relevant topics such as e learning economic perspectives and educational technology this publication is ideally designed for educators academics students and researchers interested in expanding their knowledge of global education The Committee on the Rights of Persons with Disabilities Valentina Della Fina, 2023-10-26 The book focuses on the modus operandi of the Committee on the Rights of Persons with Disabilities CRPD Committee the Convention on the Rights of Persons with Disabilities CRPD monitoring body and its main tasks namely monitoring functions and interpreting the CRPD provisions Unlike other doctrinal contributions it analyses all aspects of the CRPD Committee including those of an institutional nature membership sessions methods of voting relationships with other organs and others The target audience of the book is composed of academics and students of international human rights law Furthermore it serves as a guide for civil servants NGOs DPOs practitioners and other stakeholders involved in implementing disability rights **Higher Education Pathways** Paul Ashwin, M. Case, 2018-12-13 In what ways does access to undergraduate education have a transformative impact on people and societies What conditions are required for this impact to occur What are the pathways from an undergraduate education to the public good including inclusive economic development These questions have particular resonance in the South African higher education context which is attempting to tackle the challenges of widening access and improving completion rates in a system in which the segregations of the apartheid years are still apparent Higher education is recognised in core legislation as having a distinctive and crucial role in building post apartheid society Undergraduate education is seen as central to addressing skills shortages in South Africa It is also seen to yield significant social returns including a consistent positive impact on societal institutions and the development of a range of capabilities that have public as well as private benefits This book offers comprehensive contemporary evidence that allows for a fresh engagement with these pressing issues Assessing Academic Literacy in a Multilingual Society Albert Weideman, John Read, Theo du Plessis, 2020-11-02 South African universities face major challenges in meeting the needs of their students in the area of academic language and literacy The dominant medium of instruction in the universities is English and to a much

lesser extent Afrikaans but only a minority of the national population are native speakers of these languages. Nine other languages can be media of instruction in schools which makes the transition to tertiary education difficult enough in itself for students from these schools. The focus of this book is on procedures for assessing the academic language and literacy levels and needs of students not in order to exclude students from higher education but rather to identify those who would benefit from further development of their ability in order to undertake their degree studies successfully. The volume also aims to bring the innovative solutions designed by South African educators to a wider international audience. **Going to**

University Case, Jennifer, Marshall, Delia, 2018-02-09. Around the world more young people than ever before are attending university. Student numbers in South Africa have doubled since democracy and for many families higher education is a route to a better future for their children. But alongside the overwhelming demand for higher education, questions about its purposes have intensified. Deliberations about the curriculum, culture, and costing of public higher education abound from student activists, academics, parents, civil society, and policy makers. We know from macro research that South African graduates generally have good employment prospects. But little is known at a detailed level about how young people actually make use of their university experiences to craft their life courses. And even less is known about what happens to those who drop out. This accessible book brings together the rich life stories of 73 young people six years after they began their university studies. It traces how going to university influences not only their employment options but also nurtures the agency needed to chart their own way and to engage critically with the world around them. The book offers deep insights into the ways in which public higher education is both a private and public good and it provides significant conclusions pertinent to anyone who works in and cares about universities.
