*Planning Regional Futures* is an intellectual call to engage planners to critically explore what planning is and should be in

how cities and regions are planned This is in a context where planning is seen to face powerful challenges professionally intellectually and practically in ways arguably not seen before planning is no longer solely the domain of professional planners but opened up to a diverse group of actors the link between the study of cities and regions which traditionally had a disciplinary home in planning schools and the like steadily eroded as research increasingly takes place in interdisciplinary research institutes the advent of real time modelling posing fundamental challenges for the type of long term perspective that planning has traditionally afforded regional planning and its mixed record of achievement and the link between region and planning becoming decoupled as alternative regional and other spatial approaches to planning have emerged This book takes up the intellectual and practical challenge of planning regional futures moving beyond the narrow confines of existing debate and providing a forum for debating what planning is and should be for in how we plan cities and regions The chapters in this book were originally published as a special issue of *Regional Studies*      *Global Science's Cooperation Opportunities, Challenges, and Good Practices* Moussaoui, Mohamed, 2023-07-24 Science diplomacy gives possibilities for international diplomacy and science policy to collaborate to more directly address social and global challenges such as successful diplomatic engagement international scientific coordination and policy coherence in response to the COVID 19 pandemic However most academic scientists lack policy process training networking opportunities with science policymakers and the capacity to use their expertise in the field to advance policy or diplomacy These barriers limit scientists research impact inhibit science policy relations reduce science recommendations and restrict university engagement in national and international contexts The origins of science diplomacy have yet to be closely examined and its current format does not give a clear understanding of how it concretely translates into science policy actions *Global Science's Cooperation Opportunities Challenges and Good Practices* provides a comprehensive overview of science diplomacy and its evolution in history and analyzes the ways in which politics science and diplomacy intertwine The book also provides a critical review of science diplomacy by exposing its limitations in addressing global challenges and by reflecting on the specific questions relating to the adaptation of the science diplomacy concept to the context of the Global South Covering key topics such as climate change foreign policy and energy consumption this premier reference source is ideal for policymakers government officials politicians industry professionals researchers academicians scholars practitioners instructors and students      *Yearbook of International Organizations 2014-2015, Volumes 1a & 1b (Set)* Union of International Associations, 2014-06-16 Volume 1 A and B covers international organizations throughout the world comprising their aims activities and events      **Handbook of Research on Administration, Policy, and Leadership in Higher Education** Mukerji, Siran, Tripathi, Purnendu, 2016-09-27 The creation of a sustainable and accessible higher education systems is a pivotal goal in modern society Adopting strategic frameworks and innovative techniques allows institutions to achieve this objective The Handbook of Research on Administration Policy and Leadership in Higher Education is an authoritative reference source for the latest

scholarly research on contemporary management issues in educational institutions and presents best practices to improve policies and retain effective governance Addressing the current state of higher education at an international level this book is ideally designed for academicians educational administrators researchers and professionals **The Routledge Handbook of the Political Economy of the Environment** Éloi Laurent,Klara Zwickl,2021-10-27 Featuring a stellar international cast list of leading and cutting edge scholars The Routledge Handbook of the Political Economy of the Environment presents the state of the art of the discipline that considers ecological issues and crises from a political economy perspective This collective volume sheds new light on the effect of economic and power inequality on environmental dynamics and conversely on the economic and social impact of environmental dynamics The chapters gathered in this handbook make four original contributions to the field of political economy of the environment First they revisit essential concepts and methods of environmental economics in the light of their political economy Second they introduce readers to recent theoretical and empirical advances in key issues of political economy of the environment with a special focus on the relationship between inequality and environmental degradation a nexus that has dramatically come into focus with the COVID crisis Third the authors of this handbook open the field to its critical global and regional dimensions global issues such as the environmental justice movement and inequality and climate change as well as regional issues such as agriculture systems air pollution natural resources appropriation and urban sustainability Fourth and finally the work shows how novel analysis can translate into new forms of public policy that require institutional reform and new policy tools Ecosystems preservation international climate negotiations and climate mitigation policies all have a strong distributional dimension that chapters point to Pressing environmental policy such as carbon pricing and low carbon and energy transitions entail numerous social issues that also need to be accounted for with new analytical and technological tools This handbook will be an invaluable reference research and teaching tool for anyone interested in political economy approaches to environmental issues and ecological crises

*Dangerous Technologies* Brandaan Huigen,2025-11-10 *Dangerous Technologies* focuses on the prevalent theft of consumer electronics in post Apartheid South Africa Through a material culture perspective it explores why these objects have commonly been targeted by bandits and subsequently circulated through the criminal underground The author traces ethnographically how devices travel between various social spheres delving into the experiences of a range of individuals from diverse residents who fall victim to criminals to the bandits who steal electronics for money or drugs the African migrants who export consignments of stolen electronics to their home countries the envious residents who buy stolen electronics and finally the police attempting to grapple with the problem *Dangerous Technologies* suggests that electronics have widened digital divides between citizens resulting in underground circuits that seek to violently redistribute enviable electronics to low income residents who have not been able to formally participate in electronics consumption and use Due to porous borders the widespread theft and redistribution of electronics do not only stem from internal inequalities within South

African society but also from broader disparities across the African continent The book furthers knowledge about how and why particularly modern electronics have precipitated violent property crime in democratic South Africa It is relevant to scholars of social and cultural anthropology particularly those with an interest in material culture digital anthropology and economic and political anthropology as well as criminologists
