Youth Employment Programmes in Africa Ramos E.

Mabugu, Lucas Ronconi, 2025-10-03 This book investigates youth employment programmes across nine African countries providing important insights into the world's youngest continent by population in which 60% of people are aged under 25. By 2050 the labour force in sub-Saharan Africa is expected to be almost double the size of the labour force in high income countries representing a massive shift in the world's working population and providing a significant challenge for job creation. In this book contributors bring together insights from more than 500 in-depth interviews and 1,500 focus group participants to consider whether youth employment programmes are effectively reaching vulnerable groups. This book tackles the problem of political clientelism in the allocation of benefits and considers the level of coordination that is taking place across programmes and political institutions. Combining rich empirical findings with data about labour market outcomes and institutions, this book will be an important read for researchers wishing to understand the political economy of youth employment policy in Africa. *Affirmative Intervention to Support Multispecies Relationships* Janet J.

McIntyre-Mills, 2024-11-29 This book offers a pioneering approach to collaborative co-authorship integrating storytelling, participatory action research and innovative uses of technology like Zoom to bridge geographical and cultural divides. The authors emphasize authentic dialogue using a form of metalogue to ensure all voices are heard and respected, thus avoiding ventriloquy (speaking for or over others). Their praxis revolves around performative and regenerative projects involving indigenous custodians, academics, students and community members aiming to address Species Apartheid and promote a more inclusive and sustainable future. The book's engagement model includes inner work focusing on critical analysis and analytical meditation on values and their consequences; outer work involving transformative education and organic food production workshops to engage a broad community of practice; and future work exploring narrative and 'if then' scenarios to envision new possibilities with an emphasis on creativity and courage. The authors draw inspiration from diverse sources including Indigenous knowledge systems and various academic institutes and organizations. Through their collaborative efforts, they aim to create a more inclusive, sustainable and just world. **3D Printing: Application in Medical Surgery**
