Castells in Africa Johan Muller, Nico Cloete, 2017-11-28 *Castells in Africa* Universities and Development collects the papers produced by Manuel Castells on his visits to South Africa and publishes them in a single volume for the first time The book also publishes a series of empirically based papers which together display the multi faceted and far sighted scope of his theoretical framework and its fecundity for fine grained detailed empirical investigations on universities and development in Africa Castells in his afterword to this book always looking forward assesses the role of the university in the wake of the upheavals to the global economic order He decides the university's function not only remains but is more important than ever This book will serve as an introduction to the relevance of his work for higher education in Africa for postgraduate students reflective practitioners and researchers Includes two previously unpublished public lectures and an Afterword by Manuel Castells

The Political Economy of Education Martin Carnoy, 2024-02-15 The Political Economy of Education provides

academically rigorous yet clear explanations of the economics and politics driving today's educational systems and how economists analyze them. The book covers a host of topics central to teaching about education and crucial to educational policy. These include how to use the tools of economic and political theory to take critical measure of education's role in social mobility and economic growth; whether good teachers can overcome social class and race achievement gaps; the effectiveness of early childhood and vocational education; and debates on school accountability and whether increasing spending on schooling improves quality. The book also explores worldwide changes in higher education, especially massification and increased stratification and privatization. Written for upper undergraduate and graduate students in economics, public policy, and education and packed with real world examples, this is an essential text for anyone interested in gaining fresh and international perspectives on education.

Understanding Global Higher Education Georgiana Mihut, Philip G. Altbach, Hans de Wit, 2017-08-24. This volume brings together selected articles published in *University World News* (UWN) and *International Higher Education* (IHE) between 2011 and 2016. Researchers, policy makers, and practitioners alike further the development of higher education as a field of study through public and ongoing conversations. It is news analysis and commentary publications like UWN and IHE that facilitate this dialogue and keep pace with the most up to date developments in the field. Together, the articles included in this volume, alongside the section introductions, offer a rich and relevant picture of the dynamic state of higher education globally. While both publications are freely available online, this book provides a thematically coherent selection of articles offering an accessible and analytic perspective on the pressing concerns of contemporary higher education.

International Handbook on Education Development in the Asia-Pacific Wing On Lee, Phillip Brown, A. Lin Goodwin, Andy Green, 2023-11-20. The Springer International Handbook of Educational Development in Asia Pacific breaks new ground with a comprehensive, fine-grained, and diverse perspective on research and education development throughout the Asia Pacific region. In 13 sections and 127 chapters, the Handbook delves into a wide spectrum of contemporary topics, including educational equity and quality, language education, learning and human development, workplace learning, teacher education, and professionalization, higher education organizations, citizenship, and moral education, and high-performing education systems. The Handbook is grounded in specific Asia Pacific contexts and scholarly traditions, using unique country-specific narratives, for example, Vietnam and Melanesia, and socio-cultural investigations through lenses such as language identity or colonisation, while offering parallel academic discourse and analyses framed by broader policy commentary from around the world.

Routledge Handbook of the Sociology of Higher Education James E. Côté, Sarah Pickard, 2022-03-21. Higher education has come under increasing public scrutiny in recent years, assailed with demands for greater efficiency, accountability, cost reduction, and, above all, job training. Drawing upon examples from across the world, with an emphasis on Anglo-American higher education systems, this handbook employs sociological approaches to address these pressing concerns. The second edition is thoroughly updated and adds several new

chapters to shed further light on the transformations wrought by the interrelated processes of massification vocationalization and marketization that have swept through universities in the wake of neoliberal reforms introduced by governments since the 1980s The handbook explores recent developments in higher education systems and policy as well as the everyday experiences of students and staff and ongoing problems of inequality and diversity within universities In doing so the chapters address a number of current issues concerning the legitimacy of higher educational credentials from the continuing debate regarding traditional pedagogies and the role of universities in social class reproduction to more recent concerns about standards in mass systems Collectively this handbook demonstrates that the sociology of higher education has the potential to play a leadership role in improving the myriad higher education systems around the world that are now part of an interrelated set of subsystems replete with both persistent problems and promising prospects This book is therefore necessary reading for a variety of stakeholders within academia as well as professionals and policy makers interested in understanding higher education and the acute challenges it faces

Knowledge Production and Contradictory Functions in African Higher Education Nico Cloete, Peter Maassen, 2015-03-01 The dominant global discourse in higher education now focuses on world class universities inevitably located predominantly in North America Europe and increasingly East Asia The rest of the world including Africa is left to play catch up But that discourse should focus rather on the tensions even contradictions between excellence and engagement with which all universities must grapple Here the African experience has much to offer the high participation and generously resourced systems of the so called developed world This book offers a critical review of that experience and so makes a major contribution to our understanding of higher education

Putin's Russia: Economy, Defence And Foreign Policy Steven Rosefielde, 2020-08-27 This volume seeks to fill the vacuum created by the Joint Economic Committee of Congress's decision to cease publishing comprehensive assessments of Russia's performance and potential It provides readers with authoritative descriptions of Russia's economy military prowess and international ambitions The volume does not settle controversies but does provide readers with an objective basis for assessing Russia's prospects without the distortions caused by fake news and disinformation wars

Global Perspectives on Higher Education Philip G. Altbach, 2016-04 The single best book on higher education as a global phenomenon Over the past half century globalization has had a profound impact on postsecondary

education The twin forces of mass higher education and the global knowledge economy have driven an unprecedented transformation These fundamental changes have pulled in opposite directions one pushes for wider access and accompanying challenges of quality the other toward exclusive world class research oriented universities In *Global Perspectives on Higher Education* renowned higher education scholar Philip G Altbach offers a wide ranging perspective on the implications of these key forces and explores how they influence academe everywhere Altbach begins with a discussion of the global trends that increasingly affect higher education including the implications of mass enrollments the logic of mass higher education systems around the world and specific challenges facing Brazil Russia India and China He considers the numerous implications of globalization including the worldwide use of the English language university cross border initiatives the role of research universities in developing countries the impact of the West on Asian universities and the expansion of private higher education Provocative and wide ranging *Global Perspectives on Higher Education* considers how the international exchange of ideas students and scholars has fundamentally altered higher education

The Fifth Wave Michael M. Crow, William B. Dabars, 2020-04-14 Out of the crises of American higher education emerges a new class of large scale public universities designed to accelerate social change through broad access to world class knowledge production and cutting edge technological innovation America's research universities lead the world in discovery creativity and innovation but are captive to a set of design constraints that no longer aligns with the changing needs of society Their commitment to discovery and innovation which is carried out largely in isolation from the socioeconomic challenges faced by most Americans threatens to impede the capacity of these institutions to contribute decisively and consistently to the collective good The global preeminence of our leading institutions moreover does not correlate with overall excellence in American higher education Sadly admissions practices that flatly exclude the majority of academically qualified applicants are now the norm in our leading universities both public and private In *The Fifth Wave* Michael M Crow and William B Dabars argue that colleges and universities need to be comprehensively redesigned in order to educate millions more qualified students while leveraging the complementarities between discovery and accessibility Building on the themes of their prior collaboration *Designing the New American University* this book examines the historical development of American higher education the first four waves and describes the emerging standard of institutions that will transform the field What must emerge in this Fifth Wave of universities Crow and Dabars posit are institutions that are responsive to the needs of students focused on access embedded in their regions and committed to solving global problems *The Fifth Wave in American higher education* Crow and Dabars write comprises an emerging league of colleges and universities that aspires to accelerate positive social outcomes through the seamless integration of world class knowledge production with cutting edge technological innovation This set of institutions is dedicated to the advancement of accessibility to the broadest possible demographic that is representative of the socioeconomic and intellectual diversity of our nation Recognizing the fact that both cooperation and competition

between universities is essential if higher education hopes to truly serve the needs of the nation Fifth Wave schools like Arizona State University are already beginning to spearhead a network spanning academia business and industry government agencies and laboratories and civil society organizations Drawing from a variety of disciplines including design economics public policy organizational theory science and technology studies sociology and even cognitive psychology and epistemology The Fifth Wave is a must read for anyone concerned with the future of higher education in our society

The European Higher Education Area Adrian Curaj, Liviu Matei, Remus Pricopie, Jamil Salmi, Peter Scott, 2015-10-12 Bridging the gap between higher education research and policy making was always a challenge but the recent calls for more evidence based policies have opened a window of unprecedented opportunity for researchers to bring more contributions to shaping the future of the European Higher Education Area EHEA Encouraged by the success of the 2011 first edition Romania and Armenia have organised a 2nd edition of the Future of Higher Education Bologna Process Researchers Conference FOHE BPRC in November 2014 with the support of the Italian Presidency of the European Union

and as part of the official EHEA agenda Reuniting over 170 researchers from more than 30 countries the event was a forum to debate the trends and challenges faced by higher education today and look at the future of European cooperation in higher education The research volumes offer unique insights regarding the state of affairs of European higher education and research as well as forward looking policy proposals More than 50 articles focus on essential themes in higher education Internationalization of higher education Financing and governance Excellence and the diversification of missions Teaching learning and student engagement Equity and the social dimension of higher education Education research and innovation Quality assurance The impacts of the Bologna Process on the EHEA and beyond and Evidence based policies in higher education The Bologna process was launched at a time of great optimism about the future of the European project to which of course the reform of higher education across the continent has made a major contribution Today for the present that optimism has faded as economic troubles have accumulated in the Euro zone political tensions have been increased on issues such as immigration and armed conflict has broken out in Ukraine There is clearly a risk that against this troubled background the Bologna process itself may falter There are already signs that it has been downgraded in some countries with evidence of political withdrawal All the more reason for the voice of higher education researchers to be heard Since the first conference they have established themselves as powerful stakeholders in the development of the EHEA who are helping to maintain the momentum of the Bologna process Their pivotal role has been strengthened by the second Bucharest conference Peter Scott Institute of Education London General Rapporteur of the FOHE BPRC first edition

World Literacy John W. Miller, Michael C. McKenna, 2016-01-29 International literacy assessments have provided ample data for ranking nations charting growth and casting blame Summarizing the findings of these assessments which afford a useful vantage from which to view world literacy as it evolves this book examines literate behavior worldwide in terms of both the ability of populations from a wide variety of nations to read and the practice of literate behavior in those nations Drawing on The World's Most Literate Nations author Jack Miller's internationally released study emerging trends in world literacy and their relationships to political economic and social factors are explored Literacy and in particular the practice of literate behaviors is used as a lens through which to view countries economic development gender equality resource utilization and ethnic discrimination Above all this book is about trajectories It begins with historical contexts described in terms of support for literate cultures Based on a variety of data sources these trends are traced to the present and then projected ahead The literate futures of nations are discussed and how these relate to their economic and sociocultural development This book is unique in providing a broader perspective on an intractable problem a vantage point that offers useful insights to inform policy and in bringing together an array of relevant data sources not typically associated with literacy status

How World-Class Universities Affect Global Higher Education Ying Cheng, Qi Wang, Nian Cai Liu, 2014-09-23 World class universities commonly recognized as global research universities or flagship universities are cornerstone institutions

embedded in any academic system and play an important role in developing a nation's competitiveness in the global knowledge economy. The development of world class universities is high on the policy agenda of various stakeholders across the globe. In the past few years an increasing number of nations, regions and higher education institutions in both developed and developing countries have joined the same race for academic excellence and have adopted a range of development strategies and implemented various reforms. From a comparative perspective, How World Class Universities Affect Global Higher Education intends to provide an in-depth picture of excellence initiatives and relevant policies adopted in various nations and regions and to reflect opportunities and challenges of developing excellence. Global Perspectives and Local Challenges Surrounding International Student Mobility Bista, Krishna, 2015-12-09. As one of the fastest growing trends in higher education, study abroad programs are having a critical impact on the educational landscape. While international study programs generate more revenue and promote campus diversity, there are several challenges that must be considered when integrating non-native students into native universities. Global Perspectives and Local Challenges Surrounding International Student Mobility explores comparative research regarding the implementation of effective strategies needed when working with native and non-native individuals in educational settings. Offering perspectives from international student experiences as well as views on current mobility trends, immigration policies and challenges with cultural expectations, this publication will be a critical source for educators, policymakers and university staff who interact with international students. Routledge Handbook of Education in India Krishna Kumar, 2017-10-17. This comprehensive handbook introduces the reader to the education system in India in terms of its structural features, its relations with society and culture and the debates that have shaped present-day policy ethos. Expert scholars provide a lucid analysis of complex themes such as the equal distribution of educational opportunities, legal provisions shaping the opportunity structure and curricular issues in major areas of knowledge. The volume provides a general overview of India's education system and examines key and current issues that face higher and school education: the examination system, disciplines of social sciences, curriculum, teachers, law, coaching and unemployment. This handbook will serve as a valuable resource and guide to anyone seeking authentic information about India's contemporary educational challenges in relation to its society, economy and politics. It will be useful to scholars and researchers of education, public policy and administration, sociology and political studies as well as practitioners, think tanks, those in media, government and NGOs. Reconceptualizing Development in the Global Information Age Manuel Castells, Pekka Himanen, 2014-08-28. The conditions in which development—the process by which people individually and collectively enhance their capacities to improve their lives according to their values and interests—operates have significantly changed in the global information age, a period characterized by the technological revolution in information and communication, the rise of the networking form of social organization and the global interdependence of economies and societies. This volume aims to redefine the means and goals of development in this new context, first by characterizing the

specific mode of development informational development that the authors consider to be the driver of the creation of material wealth in the twenty first century secondly by reconceptualizing human development as the fulfilment of human wellbeing in the multidimensionality of the human experience ultimately affirming dignity as the supreme value of development thirdly by examining the relationship between informational development and human development After first setting out its analytical framework the book brings together a diverse set of empirically rich case studies to illustrate this investigation from across the globe Silicon Valley Costa Rica Chile South Africa Finland the European Union and China and concludes by attempting to reconceptualize development It raises important questions and provides observations including examining the concept of dignity as development to contribute to a policy debate that should provide specific answers linked to the conditions of each society and be enacted by democratic institutions in a concerted global effort to save humankind while there is still time
