Societies Annette Froehlich, 2019-12-24 This book provides detailed insights into how space and its applications are and can be used to support the development of the full range and diversity of African societies as encapsulated in the African Union's Agenda 2063. Like previous books in the Southern Space Studies series, it focuses on the role of space in supporting the UN Sustainable Development Goals in Africa, but it covers an even more extensive array of relevant and timely topics addressing all facets of African development. It demonstrates that while great achievements have been made in recent years in terms of economic and social development, which has lifted many of Africa's people out of poverty, there is still much that needs to be done to fulfill the basic needs of Africa's citizens and afford them the dignity they deserve. To this end, space is already being employed in diverse fields of human endeavor to serve Africa's goals for its future, but there is much room for further incorporation of space systems and data. Providing a comprehensive overview of the role space is playing in achieving Africa's developmental aspirations, the book is of great interest to both students and professionals in fields such as space studies, international relations, governance, social and rural development, and many others. **The Report: Ghana 2022** Oliver

Cornock, Ghana is the first African country to achieve independence from British colonial rule and is widely known for its natural resources such as cocoa, as well as its inland water sources. Several measures have been taken to balance government revenue and spending, and the country remains a safe haven for foreign direct investment, which stood at 830m in the first half of 2021. The most recent general elections held in December 2020 were favourably assessed by observers who noted that they represented a continuation of democratic processes. *Daily Graphic* Ransford Tetteh, 2014-04-28 *The Ubiquity of Positive Measures for Addressing Systemic Discrimination and Inequality* David Oppenheimer, 2019-08-26 Positive measures to prevent and remedy discrimination have been adopted in many parts of the world. By comparing the scope and form of such measures in different legal systems, we can gain a better perspective on our own system and appreciate possible new

approaches This book compares positive anti discrimination measures in the United States India Brazil South Africa Canada the United Kingdom and the European Union **State-of-the-Art Indonesia Energy Transition** Dinita

Setyawati,2023-06-03 This book discusses how people can come together to address current energy justice and access poverty problems by examining the relationship between energy systems and society in diverse energy sources The novelty of this book is that this is the only complete guide for readers who wish to understand the status of Indonesia s energy transition and renewable energy development Energy programs that are explored are the ones prioritized by government administrations including coal nuclear power solar energy green electricity and geothermal energy Based on extensive fieldwork and empirical data the book combines insights from historical data on energy subsidies and economic diversification current empirical data on social acceptance of new energy technologies and contemporary studies that forecast the implications of the transition to the coal industry and fossil fuel subsidies It asks how Indonesia has enacted policies that support energy transition How do the public and civil society view those policies What are the implications for broader themes and discussions on energy sources technology systems policies and service Strategies are suggested to advance a sustainable transition in the developing world that will mitigate developmental risks associated with the transition away from fossil fuels while encouraging decision making in a sustainable and socially just manner This book is an informative and engaging read for a general audience as well as a valuable resource for scholars researchers and students in environmental and energy studies *Handbook on Planning and Climate Change Adaptation* Patrick Brandful

Cobbinah,Michael Addaney,2025-08-11 This timely Handbook explores how planning can be used as a mechanism a tool and a process to sustainably manage the impacts of climate change Conceptually grounded in the planning and climate change literature it illustrates the different capabilities and inadequacies of planning in addressing climate change adaptation
