Culture, philosophies and reforms in public administration for the globalizing world Edwin O.C. Ijeoma, Ogochukwu I. Nzewi, 2018-12-31 The aim of this scholarly collected work is to contribute to the scientific discourse on public administration in a globalised environment The book reflects on governance challenges in South Africa and in Africa with its point of departure being the master narratives the so called grand debates such as New Public Management and specifically the role of technology It also reflects on the so called middle range discourses concerning organisational level issues in government e.g. leadership and work procedures and explores new solutions to old governance challenges like corruption and service delivery The uniqueness of this collected work lies in its ability to reflect on existing philosophies and practices in an innovative way Through its multidisciplinary lens the book opens up a new vision for the future of public administration in the South African context and on the African continent not neglecting the current local regional and global environment Until recently globalisation was considered an entrenched world order but international political events during the course of the past few years have resulted in one of the biggest challenges to its endurance in recent history This includes developments such as the successful referendum in Britain to exit the European Union highlighting the growth of a severe nationalist and protectionist agenda that may be a signal of the unravelling of the current globalism world order These developments inspire deeper interrogation of the challenges to effective public administration globally and the ripple effects in South Africa and Africa as a whole Pointedly it is evident that ensuring the voice of citizens in policy decision making remains a critical governance challenge On the policy front there are perennial challenges of land reform service delivery and poverty while on the governance front corruption has metastasised with a growing culture of impunity and lack of accountability in leadership In the midst of growing corruption and more than 20 years into democracy South Africa's income inequality remains one of the highest in the world This setting constitutes the context of the research outcome

Chemical Methods for Thin Film Deposition Babasaheb R. Sankapal,Ahmed Ennaoui,Ram B. Gupta,Chandrakant D.

Lokhande,2023-07-02 This book explores chemical methods for thin film deposition with diverse nanostructured morphology

and their applications Unlike top down techniques chemical methods offer low cost simplicity and growth of nanostructured surface architecture with ease of small to large scale area deposition The book primarily focuses on innovative twelve chemical methods for thin film deposition on one platform Since each method has its own advantages and disadvantages it is crucial to select the specific method for specific material to be deposited depending upon what type of application is targeted Due to inclusive of diverse chemical deposition methods researcher will have knowledge about best choice of the deposition method to be adopted Inclusive methods discussed in the book are chemical bath deposition successive ionic layer adsorption and reaction ion exchange electroless deposition electrodeposition hydrothermal spray pyrolysis spin coating dip coating doctor blade screen printing and sol gel The selection of the correct procedure for material to be deposited in thin film form depends on its unique process parameters based on the kind of application and its requirement The role of preparative factors necessary for thin film alters properties related to structure and surface morphology electrical conductivity and optical band gap which have been extensively discussed along with the underlying science of film synthesis The book provides a comprehensive overview of the field of chemical methods for thin film synthesis to applications In addition to synthesis the book covers characterization instrumentation and industrial application of thin films As a result concentrated techniques will be of great interest to university college professors students and new engineers as well as postdocs and scientists in the area
