University Of Limpopo Closing Dates For 2015:

Breaking a Rainbow, Building a Nation Rekgotsofetse Chikane, 2018-10-01 Breaking a Rainbow Building a Nation is a first hand account of the university protests that gripped South Africa between 2015 and 2017 widely better known as the FeesMustFall Chikane outlines the nature of student politics in the country before during and after the emergence of MustFall politics exploring the political dynamics that informed and drove the student protests and the effect that these MustFall movements have had on the nature of youth politics in the country Chikane looks at how the current nature of youth politics is different from previous youth upheavals that have defined South Africa specifically due to the fact that the protests were being led by so called coconuts who are part of the black elite Breaking a Rainbow Building a Nation poses the provocative question can coconuts be trusted with the revolution

Thabo Mbeki Mark Gevisser, 2022-05-06 Hailed in the Times Literary Supplement as probably the finest piece of non fiction to come out of South Africa since the end of apartheid The Dream Deferred is back in print and updated with a brilliant new epilogue The prosperous Mbeki clan lost everything to apartheid Yet the family saw its favourite son Thabo rise to become president of South Africa in 1999 A decade later Mbeki was ousted by his own party and his legacy is bitterly contested particularly over his handling of the AIDS epidemic and the crisis in Zimbabwe Through the story of the Mbeki family award winning journalist Mark Gevisser tells the gripping tale of the last tumultuous century of South Africa life following the family's path to make sense of the liberation struggle and the future that South Africa has inherited At the centre of the story is Mbeki a visionary yet tragic figure who led South Africa to freedom but was not able to overcome the difficulties of his own dislocated life It is 15 years since Mbeki was unceremoniously dumped by the ANC giving rise to the wasted years under Jacob Zuma With the benefit of hindsight and as Mbeki reaches the age of 80 Gevisser examines the legacy of the man who succeeded Mandela essential reading for anyone intrigued by South Africa's complex philosopher king The Economist

Sustainable Education and Development—Clean Energy

Clinton Aigbavboa, Wellington Thwala, Joseph N. Mojekwu, Lawrence Atepor, Emmanuel Adinyira, Gabriel Nani, Emmanuel Bamfo-Agyei, 2025-02-07 This book is Volume 1 of the proceedings of 2023 Sustainable Education and Development Research Conference This volume concentrates on papers in the area of clean energy Despite considerable progress more than 700 million people worldwide still lack access to electricity and around 2.4 billion people continue to use harmful and polluting fuels for cooking While efforts have been made to promote renewable energy and energy efficiency they have not been fast enough to achieve Sustainable Development Goal 7 Adding to the challenge the ongoing war in Ukraine has contributed to rising global energy prices and heightened energy insecurity in Europe In response to the energy crisis some European countries are planning to accelerate the transition to renewables and increase investments in clean energy and energy efficiency However others are considering a resurgence of coal which poses a risk to the overall green transition Between 2010 and 2020 the percentage of the global population with access to electricity increased from 83% to 91% with 1.3 billion people gaining access Nevertheless this leaves approximately 733 million people still without electricity and most of them reside in sub-Saharan Africa Achieving universal access by 2030 the annual growth rate in access needs to accelerate from 0.5 percentage points to 0.9 percentage points necessitating significant efforts in low income fragile and conflict affected countries In 2020 69% of the global population had access to clean cooking fuels and technologies While more than half of those without access to clean cooking fuels live in Asia the 20 countries with the lowest percentage of people having access to clean cooking were predominantly least developed countries in Africa The share of renewable sources in total final energy consumption reached 17.7% globally in 2019 just slightly higher than the figure for 2015 The electricity sector leads in the adoption of renewables accounting for 26.2% of total final energy consumption in 2019 while the heat and transport sectors have made limited progress Global primary energy intensity defined as global total energy supply per unit of GDP improved from 5.6 megajoules per dollar 2017 purchasing power parity in 2010 to 4.7 megajoules in 2019 However the rate of improvement 1.6% per year on average since 2015 falls short of the 3.2% annual rate needed to reach Sustainable Development Goal 7.3 International financial flows to support clean and renewable energy in developing countries reached 10.9 billion in 2019 a 23.6% decrease from 2018 This decline occurred even before the onset of the COVID-19 pandemic Over a longer five year moving average average annual commitments decreased for the first time since 2008 from 17.5 billion in 2014 to 16.6 billion in 2019.19 Although developing countries achieved a record of 245.7 watts per capita in installed renewable energy generating capacity in 2020 small island developing States least developed countries and landlocked developing countries have lagged behind It would take least developed countries and landlocked developing countries nearly

40 years and small island developing States almost 15 years to reach the same level of progress as the average developing country in 2020 The 2023 SEDRC conference titled Sustainable Development and Education aims to redefine the understanding of research in the continent s development and the role of researchers The conference focusses on applied research discussions and its dissemination Researchers from research institutions academicians postgraduate students politicians and industry representatives will be the primary audience for the conference proceedings

Border Culture Victor Konrad, Anne-Laure Amilhat Szary, 2022-12-29 This book introduces readers to the cultural imaginings of borders the in between spaces in which transnationalism collides with geopolitical cooperation and contestation Recent debates about the refugee crisis and the spread of the COVID 19 pandemic have politicized culture at and of borders like never before Border culture is no longer culture at the margins but rather culture at the heart of geopolitics flows and experience of the transnational world Increasingly culture and borders are everywhere yet nowhere In border spaces national narratives and counter narratives are tested and evaluated coming up against transnational culture This book provides an extensive and critical vision of border culture on the move drawing on numerous examples worldwide and a growing international literature across border and cultural studies It shows how border culture develops in the human imagination and manifests in human constructs of nation and state as well as in transnationalism By analyzing this new and expanding cultural geography of border landscapes the book shows the way to a fresh broader dialogue Exploring the nature and meaning of the intersection of border and culture this book will be an essential read for students and researchers across border studies geopolitics geography and cultural studies

Local Responses to Mine Closure in South Africa Sethulego Matebesi, Lochner Marais, Verna Nel, 2024-02-12 This book investigates mine closure and local responses in South Africa linking dependencies and social disruption Mine closure presents a major challenge to the mining industry and government policymakers globally but particularly in the Global South South Africa is experiencing notable numbers of mine closures and this book explores the notion of social disruption a concept often applied to describe the effects of mine growth on communities but often neglecting the impact of mine closures The book begins with three theoretical chapters that discuss theory closure cost frameworks and policy development in South Africa It uses evolutionary governance theory to show how mining creates dependencies and how mining growth often blinds communities and governments to the likelihood of closure Too easily mining goes ahead with no concern for the possibility or indeed inevitability of eventual closure and how mining communities will cope These impacts are showcased through eight place based case studies from across South Africa one focusing on mine workers to demonstrate that mine closure causes significant social disruption This book will be of interest to students and scholars researching the social impacts of mining and the extractive industries social geography and sustainable development as well as policymakers and practitioners working with mine closure and social impact assessments
