Time, Quantum and Information Lutz Castell,Otfried Ischebeck,2013-04-17 This publication centers on the extraordinary ideas in and concepts of physics of th Carl Friedrich von Weizs cker At the time of his 90 birthday on June 28 2002 it seems the right moment to try such a survey The themes of two Festschrifts for Carl th th Friedrich von Weizs cker on the occasion of his 60 and 70 birthdays E Scheibe and G Suessmann eds Einheit und Vielheit and K Meyer Abich ed Physik Philosophie und Politik were his unique capability to encompass physics philosophy and politics He may be more known publicly today for his efforts for containment of the Cold War nuclear threat for the abolition of war as an instrument of international politics for the social responsibility of scientists and for the Conciliar Process of the Churches for Justice Peace and the Integrity of Creation But physics has been his primary professional vocation and has always remained in the center of his thought and life But even in light of the physics focus of this book it would not do justice to Carl Friedrich von Weizs cker to re strict his achievements in physics to efforts only accessible to professionals The contributions in Part 1 show how his very concentration on physics has led him to take an active part in problems of politics social change philosophy and religion

Casimir Effect 50 Years Later,the - Proceedings Of The Fourth Workshop On Quantum Field Theory Under The Influence

Of External Conditions Michael Bordag, 1999-04-01 This volume contains papers based on talks delivered at the Fourth Workshop on Quantum Field Theory Under the Influence of External Conditions This series of workshops held at the Institute for Theoretical Physics of the University of Leipzig was launched in 1989 The present meeting took place 50 years after Hendrik B Casimir discovered the effect named after him This effect was found by Casimir in investigating the retarded long range van der Waals forces in colloids and re expressing them as a change in the vacuum energy of the electromagnetic field The story of why this work was done was told by Casimir himself at the workshop A historical account of the development of vacuum energy in quantum theory starting from Planck's half quanta was given by H Reichenberg Another interesting topic was about a possible explanation of sonoluminescence as a dynamical Casimir effect Kim Milton reported on the work done by Julian Schwinger on this topic during the last years of the great physicist's life as well as on his own research M Bordag Leipzig provided a general analysis of the ultraviolet divergences of the vacuum energy of a dielectric sphere The Casimir effect had been experimentally verified 10 years after its discovery on a rather qualitative level Only last year and in another experiment this year it became also quantitatively well established It turned out to be of unexpectedly high sensitivity with respect to the presence of the so called fifth forces as V Mostepanenko showed in his talk Modern methods of computing the Casimir effect rely on zeta functional regularization and heat kernel expansion This mathematical background together with a broader embedding into expansions of various spectral quantities was the subject of the talk by S Fulling Recent progress in the computation of the heat kernel coefficients was reported by V Kornyak and K Kirsten A number of talks were devoted to magnetic background fields of various types for instance new trends in the Aharonov Bohm effect In cosmology negative energy densities and the role of adiabatic vacuum states in a de Sitter universe were discussed *Hearing* Stanley A.
