Garden Calendar, 2012 **2009 Garden Calendar** Cynthia Haynes, 2008 **Scandalous Error** C. Philipp E. Nothaft, 2018 The Gregorian calendar reform of 1582 which provided the basis for the civil and Western ecclesiastical calendars still in use today has often been seen as a triumph of early modern scientific culture or an expression of papal ambition in the wake of the Counter Reformation Much less attention has been paid to reform's intellectual roots in the European Middle Ages when the reckoning of time by means of calendrical cycles was a topic of central importance to learned culture as impressively documented by the survival of relevant texts and tables in thousands of manuscripts copied

before 1500 For centuries prior to the Gregorian reform astronomers mathematicians theologians and even Church councils had been debating the necessity of improving or emending the existing ecclesiastical calendar which throughout the Middle Ages kept losing touch with the astronomical phenomena at an alarming pace Scandalous Error is the first comprehensive study of the medieval literature devoted to the calendar problem and its cultural and scientific contexts It examines how the importance of ordering liturgical time by means of a calendar that comprised both solar and lunar components posed a technical astronomical problem to medieval society and details the often sophisticated ways in which computists and churchmen reacted to this challenge By drawing attention to the numerous connecting paths that existed between calendars and mathematical astronomy between the Fall of Rome and the end of the fifteenth century the volume offers substantial new insights on the place of exact science in medieval culture *Artistic Experimentation in Music* Darla Crispin, Bob

Lincoln, 2023-03-15 During the long reign of Alfonso VIII Castilian bishops were crusaders castellans cathedral canons and collegiate officers and they served as powerful intermediaries between the pope and the king of Castile In A Constellation of

Authority Kyle C Lincoln traces the careers of a septet of these bishops and uses this history to fill in much of what really happened in thirteenth century Castile The relationships that local prelates cultivated with Alfonso VIII and the Castilian royal family existed in tension with how they related to the reigning pope Drawing on diocesan archives monastic collections and chronicles Lincoln reconstructs the complex negotiations and navigations these bishops undertook to maintain the balance among the papal and royal agendas and their own interests Lincoln examines the bishops ties to crusades and political influence the growth of canon and Roman law religious and church reform and the canonization of local leaders In the process he makes the case that the medieval past is best illuminated by the combined luminescence of a constellation of authority represented at least in part by a conglomerate of bishops Through seven case studies each examining a prelate in his individual historical context *A Constellation of Authority* improves our understanding of the politics of thirteenth century Castile and provides an important foundation for further consideration of the ties between Castile and the broader European medieval world It will appeal to medieval Hispanists and historians of the medieval church and episcopacy
