Rhetorics of Value Corinne A. Kratz, 2025-03-28 In *Rhetorics of Value* Corinne A. Kratz explores how exhibition design creates and conveys values that have the potential to touch, educate and engage visitors. Drawing on case studies from the Victoria and Albert Museum, museums in South Africa and Kenya, a Hawaiian resort hotel and the Smithsonian's National Museum of African American History and Culture among others, Kratz shows how exhibits help shape and narrate cultural categories, values and histories while provoking questions and evoking memories and experiences. She crosses contexts to consider ethnographic history and art exhibits in national and community museums and other display settings. Through these examples, Kratz traces how exhibition designers combine objects, texts, images, lighting, audio, space and narratives to craft a complex, multilayered communicative form that visitors experience as they move through museums. By investigating the relationship between audience reception and exhibition design strategies, Kratz contends that through design, exhibits can shape the ways we know the stories we tell and our contours of meaning and engagement.

Uprooting University Apartheid in South Africa Teresa A. Barnes, 2018-12-07 South Africa continues to be an object of fascination for people everywhere interested in social justice issues, postcolonial studies and critical race theory as manifested by the enormous worldwide attention given to the Rhodes Must Fall movement. In this book, Teresa Barnes examines universities' complex positioning in the apartheid era and argues that tracing the institutional legacies left by pro-apartheid intellectuals are crucial to understanding the fight to transform South African higher education. A work of interpretive social history, this book investigates three historical dynamics in the relationship between the apartheid system and South African higher education. First, it explores how the legitimacy of apartheid was historically reproduced in public higher education. Second, it looks at ways that academics maneuvered through and influenced national and international discourses of political freedom and legitimacy. Third, it explores how and where stubborn tendrils of apartheid-era knowledge production practices survived into and have been combatted during the democratic era in South African universities.

African Jewry and its ambivalent position as a minority within the privileged white minority Grounded in research in over a dozen archives the book provides a rich empirical account of the centrality of Holocaust memorialization to the community's ongoing struggle against global and local antisemitism Most of the chapters focus on white perceptions of the Holocaust and reveals the tensions between the white communities in the country regarding the place of collective memories of suffering in the public arena However the book also moves beyond an insular focus on the South African Jewish community and in very different modality investigates prominent figures in the anti apartheid struggle and the role of Holocaust memory in their fascinating journeys towards freedom Pitch Battles Peter Hain,Andre Odendaal,2021-09-01 There will be a black

conceptual perspectives from different disciplines The ten chapters which make up this book are by contributors from Australia Italy and the United Kingdom who draw in very different ways on spatial theory as a means of exploring processes of inclusion and exclusion in education Each one of the authors not only seeks to challenge growing orthodoxies in their respective field but is interested in cross disciplinarity and spatial theory in education This book provides key readings for experienced and beginning teachers studying for bachelors masters and research degrees or professional qualifications It will be particularly useful to equality and diversity post holders lecturers researchers and policy makers working in all education establishments which take issues of inclusion seriously The international content of the diverse papers in Space Place and Inclusive Learning will be of interest not only to those practising in the United Kingdom but to educationists working in other countries who seek to understand how space and place modulate opportunities for inclusion This book was originally published as a special issue of the International Journal of Inclusive Education Rough Diamonds Hendrik Snyders, 2025-08-22 Starting in the late 19th century South African baseball has established a fascinating and multi layered history Initially established by a small group of dedicated pioneers the sport benefited from the contributions of a diverse and multi national group of enthusiasts and opponents including sailors cricketers missionaries activists businessmen and bureaucrats Established at a time of social and political segregation the South African game eventually developed into a system of legislated racism under apartheid Through its willing participation in official race based events the sport was stripped of its innocence and South Africa was formally expelled from the world game only to be readmitted in 1992 following the country s slow transition to democracy This book presents the history of South African baseball from its inception to its liberation from apartheid Based on extensive archival research this is the first integrated history of South African baseball s eventful past The First Year at School: An International Perspective Peter Tymms, Tiago Bartholo, Sarah Howie, Elena Kardanova, Mariane Campelo Koslinski, Christine Merrell, Helen Wildy, 2023-06-26 This book explores an under researched but vital part of education the first year at primary elementary school The work shows that children s progress varies enormously from school to school class to class and child to child This variation is important because the more progress that children make in that first year of school the higher their academic attainment at the end of compulsory schooling The iPIPS international Performance Indicators in Primary Schools project upon which this book is based has been able to provide deeper insights into some of the key issues within and across different contexts whilst highlighting new and some ongoing issues Despite all the work there remain unanswered or new puzzling issues which are also explored We need to know how to improve the education at that stage and more broadly we need greater clarity about when children should be taught to read and be introduced to formal arithmetic in other words when they should start school We also need to be clearer about whether when and how young children should be assessed The book will suggest some answers but it will raise important questions and dilemmas for which we do not as yet have answers **Handbook of Energy Law in the Low-Carbon**
