Ndlovu-Gatsheni, 2013-06-01 Global imperial designs which have been in place since conquest by western powers did not suddenly evaporate after decolonization Global coloniality as a leitmotif of the empire became the order of the day with its invisible technologies of subjugation continuing to reproduce Africa's subaltern position a position characterized by perceived deficits ranging from a lack of civilization a lack of writing and a lack of history to a lack of development a lack of human rights and a lack of democracy The author's sharply critical perspective reveals how this epistemology of alterity has kept Africa ensnared within colonial matrices of power serving to justify external interventions in African affairs including the interference with liberation struggles and disregard for African positions Evaluating the quality of African responses and available options the author opens up a new horizon that includes cognitive justice and new humanism *The European Union and Global Development* S. Gänzle, S. Grimm, D. Makhan, 2012-04-17 An assessment of the capacity of the EU to coordinate actors and policies with regards to global development The authors argue that the EU and its member states have the potential to act for global development when they are able to improve policy and actor coherence such as through better linking of bilateral and community programmes Research in the History of Economic Thought and Methodology Luca Fiorito, Scott Scheall, Carlos Eduardo Suprinyak, 2020-07-10 Volume 38B of Research in the History of Economic Thought and Methodology features a symposium on economists and authoritarian regimes in the 20th century It also features a new general research essay by Reinhard Schumacher and RHETM co editor Scott Scheall that provides new details concerning Carl Menger's life and career **State, Land and Democracy in Southern Africa** Arrigo Pallotti, Corrado

Tornimbeni,2016-03-03 Each country in southern Africa has a unique history but in all of them socio economic inequalities and high poverty levels weaken the governments legitimacy and represent a challenge to models of economic development One key issue appears to be the solution of the land question This vital concern affects both citizenship and democracy in the political systems of the region yet no government has shown the capacity or commitment to solve it In this volume leading European American and African scholars explore in detail the relationship between state land and democracy They examine the historical background of asset allocation and its impact on questions of nationality the definition of citizenship human rights and the current political and economic processes in southern Africa
