**War by Other Means** Robert D. Blackwill, Jennifer M. Harris, 2016-04-11 A Foreign Affairs Best Book of 2016 Today nations increasingly carry out geopolitical combat through economic means Policies governing everything from trade and investment to energy and exchange rates are wielded as tools to win diplomatic allies punish adversaries and coerce those in between Not so in the United States however America still too often reaches for the gun over the purse to advance its interests abroad The result is a playing field sharply tilting against the United States Geoeconomics the use of economic instruments to advance foreign policy goals has long been a staple of great power politics In this impressive policy manifesto Blackwill and Harris argue that in recent decades the United States has tended to neglect this form of statecraft while China Russia and other illiberal states have increasingly employed it to Washington's disadvantage G John Ikenberry Foreign Affairs A readable and lucid primer The book defines the extensive topic and opens readers eyes to its prevalence throughout history Presidential candidates who care more about protecting American interests would be wise to heed the advice of War by Other Means and take our geoeconomic toolkit more seriously Jordan Schneider Weekly Standard

**The Return of Food** Tawodzera, Godfrey, Crush, Jonathan, 2016-06-14 The nadir of Zimbabwe's political and economic crisis in 2008 coincided with the implementation of a baseline household food security survey in Harare by AFSUN This survey found that households in low income urban areas in Zimbabwe's capital were far worse off in terms of all the food

insecurity and poverty indicators than households in the other 10 Southern African cities surveyed by AFSUN The central question addressed in this report is whether food security in Zimbabwe s urban centres has improved AFSUN conducted a follow up survey in 2012 that allows for direct longitudinal comparisons of continuity and change The status of household food security in low income neighbourhoods in Harare was improved in 2012 relative to 2008 and yet persistently high rates of severe food insecurity demonstrate that the daily need to access adequate food continued to be a major challenge The key lesson for policymakers is that even in the context of overall economic improvement food insecurity remains endemic among the poorest segments of the urban population Households are already accustomed to drawing on resources outside of the formal economy and improvements in employment income have not reversed that trend These alternative livelihood strategies should therefore be considered as a normal part of urban life and supported with state resources that can improve access to food for the most marginalized groups
