Zimsec Papers 2014 November Maths Paper

David Coniam, Peter Falvey

Zimsec Papers 2014 November Maths Paper :

Validating Technological Innovation David Coniam, Peter Falvey, 2016-04-02 This book discusses Hong Kong's use of onscreen marking OSM in public examinations. Given that Hong Kong leads the way in OSM innovation, this book has arisen from a recognised need to provide a comprehensive coherent account of the findings of various separate but linked validation studies of onscreen public examinations in Hong Kong. The authors discuss their experience of the validation process, demonstrating how high stakes innovation should be fully validated by a series of research studies in order to satisfy key stakeholders.

International Handbook of Mathematical Learning Difficulties Annemarie Fritz, Vitor Geraldi Haase, Pekka Räsänen, 2019-01-30 This comprehensive volume provides teachers, researchers and education professionals with cutting edge knowledge developed in the last decades by the educational, behavioural and neurosciences, integrating cognitive, developmental and socioeconomic approaches to deal with the problems children face in learning mathematics. The neurocognitive mechanisms and the cognitive processes underlying acquisition of arithmetic abilities and their significance for education have been the subject of intense research in the last few decades, but the most part of this research has been conducted in non-applied settings and there is still a deep discrepancy between the level of scientific knowledge and its implementation into actual educational settings. Now it is time to bring the results from the laboratory to the classroom. Apart from bringing the theoretical discussions to educational settings, the volume presents a wide range of methods for early detection of children with risks in mathematics learning and strategies to develop effective interventions based on innovative cognitive test instruments. It also provides insights to translate research knowledge into public policies in order to address socioeconomic issues. And it does so from an international perspective, dedicating a whole section to the cultural diversity of mathematics learning difficulties in different parts of the world. All of this makes the *International Handbook of Mathematical Learning Difficulties* an essential tool for those involved in the daily struggle to prepare the future generations to succeed in the global knowledge society.

Sustainable and Dynamic Graduate Employability Mona Khare, 2023-09-22 This volume presents a theoretical and strategic discussion on the linkages between sustainable graduate employability, skill building and economic growth. With case studies from India, South Africa, Zimbabwe, Taiwan, England, Germany, the United States, United Arab Emirates, Australia and Asian countries, it looks at the skills training and education landscape around the continents, examines the state of employment and offers case specific recommendations. The book analyses the role of higher education and vocational education policies and strategies in integrating skill training in education in order to achieve quality education and sustainable employment for all. An important critique of skills training, education policy and employment planning, the volume will be an essential read for scholars and researchers of sustainable development, development studies, public policy, political economy, labour studies and education. It will also be useful for policymakers.

The African Mother Tongue and Mathematical Ideas Abdul Karim Bangura, 2020-06-02 This book by renowned scholar Dr Abdul Karim Bangura combines linguistics and mathematics to show how and why African centred mathematical ideas can be a driving force in Africa's development efforts Bangura explores the concept that Africa has been the centre of the History of Mathematics for thousands of years as the civilizations that emerged across the continent developed contributions which would enrich both ancient and modern understanding of nature through mathematics However scholars and other professionals working in the field of mathematics education in Africa have identified a plethora of issues in carrying out their tasks This is highlighted by one of the most compelling arguments in the book which is that a major reason for these problems is the fact that the African mother tongues has been greatly neglected in the teaching of mathematics in the continent Bangura asserts that a change has to be made in order for Africa to benefit from the exceptional opportunities mathematics offer showing that even if there is a great body of work connecting linguistics and mathematics few analyses have been performed on the link between African languages and mathematics and the ones that have been made are not theoretically grounded on linguistics Thus the book begins by identifying the objects of study of linguistics and mathematics and delineates which ones they have in common Next since the object of study of linguistics is language the nine design features of language are employed to examine each of the objects as it pertains to African languages After that mathematical ideas of sustainability and those of tipping points are suggested as means to help Africa's development efforts

African Migrants and the Refugee Crisis Olayiwola Abegunrin, Sabella O. Abidde, 2020-11-12 This book discusses African migration and the refugee crisis Economic political and social tension in the Middle East and in many parts of the Global South has induced historic mass migration across national and international borders The situation is especially dire in Africa where a sizable number of Africans have chosen or have been forced to leave their countries of origin for Europe and North America Written by an international team of scholars this edited book traces the refugee crisis around the world telling the necessary story of forced migration intentional exclusion and human insecurity from an Afrocentric lens The volume is divided into three sections Section I places African migration within the broader contexts of international history law economics and policy Section II discusses cases of African migration to Europe Latin America and the Mediterranean Section III considers negative consequences of mass African migration including the restriction and criminalization of migration post traumatic stress disorder and gender based violence A compelling account of risk resilience and global power dynamics this volume will be useful to students and researchers interested in African studies migration peace and conflict studies and policy as well as professionals practitioners NGOs IGOs governmental and humanitarian organizations

ICT-Supported Innovations in Small Countries and Developing Regions Ian A. Lubin, 2017-10-11 This timely analysis brings greater clarity to the question of how ICT supported innovations are experienced in small low to middle income countries and developing regions

with implications for international education and development By bringing together a group of international technologists researchers and scholars this book explores the building of local capacity for educational technology policy and application in such regions and ably links theory to practice to illuminate how the issues at hand play out in professional practice The volume offers itself as an invaluable resource by offering a salient assessment of the existent methodological and ecological challenges and constraints in developing implementing and evaluating technology and technology research while simultaneously providing recommendations and strategy for future policy and implementation Among the topics covered The research agenda for technology education and development ICT curriculum planning and development policy and implementation lessons from small developing states New challenges for ICT in education policies in developing countries Playful partnerships for game based learning in international contexts Addressing persistent ICT in education challenges in small developing countries ICT Supported Innovations in Small Countries and Developing Regions is of significant interest to educational technology researchers policymakers and officials with influence over resource allocation and implementation of technology innovations It is also relevant to administrators teachers instructional designers and technology evaluators interested in advancing educational communications and technology in public and private settings
