Zimsec Human And Social Biology For June 2015

Serena Nanda, Richard L. Warm

Zimsec Human And Social Biology For June 2015:

Born to Choose John H Falk, 2017-09-05 Born to Choose is John H Falk's compelling account of why and how we make the endless set of choices we do every second of every day of our lives. Synthesizing research from across the biological and social sciences, Falk argues that human choice making is an evolutionarily ancient and complex process. He suggests that all our choices are influenced by very basic and early evolving needs and that ultimately each choice is designed to support survival in the guise of perceived well-being. This engaging book breaks new intellectual ground and enhances our understanding not just of human choice making but human behavior overall. **Exploiting the Wilderness** Greg L.

Warchol, 2017-11 Illegally harvested ivory and endangered plants, mammals, reptiles, birds, and even insects are easily found for sale throughout East and Southern Africa. And this is just one part of the multi-billion dollar illegal global trade in wildlife. Wildlife is an important and even vital asset for both intrinsic and economic reasons. Yet it is illegally exploited on a massive scale to the point where some species now risk extinction. Exploiting the Wilderness provides a concise overview of this shameful business, describing some of the main species being exploited and examining select wildlife whose survival is imperiled due to heavy pressure from poachers to meet consumer demand. Greg Warchol draws on his firsthand experience and research in Africa to examine the structure and operation of the illegal trade in wildlife. He identifies the participants as well as their motivations and operations and explains the behavior of poachers, traffickers, and consumers of illegally obtained goods. He concludes with a description of legislative and law enforcement efforts to control and prevent wildlife exploitation along with a number of contemporary conservation initiatives designed to improve the ability of rangers to protect wildlife.

Yearbook of International Organizations 2014-2015, Volumes 1a & 1b (Set) Union of International Associations, 2014-06-16 Volume 1 A and B covers international organizations throughout the world, comprising their aims, activities, and events. **The Extinction Market** Vanda Felbab Brown, 2017-11-15 Emphasizes the disturbing consequences poaching and trafficking pose globally in terms of both biodiversity and public health. Medical Outcasts Roxane Richter, 2015-12-24 As witnessed through the firsthand experiences of a frontline activist and international medical aid practitioner, this biosocial political study gives voice to the inequities in undocumented Mexican and Zimbabwean women's emergency healthcare access and treatment in Houston, United States of America, and Johannesburg, South Africa. As a construct of feminist transdisciplinary fieldwork, this research utilizes methodological pluralism and biosocial disparities to examine constructs of social determinants or social origins of women's suffering, disease, and healthcare access. These variables include gender inequity, xenophobia, structural violence, political economy, subjugation, healthcare access, and delivery disparities, and human rights violations. Illustrated through 24 purposive interviews, this seven-year study shows Zimbabwean women sought out emergency care at a rate 16 times higher than their Mexican counterparts but reported lower instances of domestic violence and depression. Most notably, the Zimbabwean women reported communicable diseases.

at double the rate of the interviewed Latinas However the most surprising finding of the study was the high number of Mexican women some 60% who cited depression as one of their indications for seeking emergency healthcare The study indicated that the reality of many forced migrants experiences in claiming their accorded healthcare rights was more theoretical than practical in its distribution and disposition Particularly sovereign freedom and civil justice were not being conferred to these women according to the two host country s mandated Constitutional precepts and or emergency medical aid mandates and social gender aid and human rights justice directives Thus the role of government in shaping these systemic and institutionalized ideologies will be examined as well as paradigms that effect national healthcare expenditures subsidies and public health risks The intention of this study is not to provide definitive recommendations of specific forced migration policies that have a civic and or partisan duty to be executed but rather to serve as an illustration of how these social tenets inequitable power relations and political economy subjugation directly impact socioeconomically disadvantaged women s health livelihood and human rights
