Building a Home Security System with Raspberry Pi Matthew Poole, 2015-12-28 Build your own sophisticated modular home security system using the popular Raspberry Pi board About This Book This book guides you through building a complete home security system with Raspberry Pi and helps you remotely access it from a mobile device over the Internet It covers the fundamentals of interfacing sensors and cameras with the Raspberry Pi so that you can connect it to the outside world It follows a modular approach so that you can choose the modules and features you want for your customized home security system Who This Book Is For This book is for anyone who is interested in building a modular home security system from scratch using a Raspberry Pi board basic electronics sensors and simple scripts This book is ideal for enthusiastic novice programmers electronics hobbyists and engineering professionals It would be great if you have some basic soldering skills in order to build some of the interface modules What You Will Learn Understand the concepts behind alarm systems and intrusion detection devices Connect sensors and devices to the on board digital GPIO ports safely Monitor and control connected devices easily using Bash shell scripting Build an I O port expander using the I2C bus and connect sensors and anti tamper circuits Capture and store images using motion detectors and cameras Access and manage your system remotely from your mobile phone Receive intrusion alerts and images through your e mail Build a sophisticated multi zone alarm system In Detail The Raspberry Pi is a powerful low cost credit card sized computer which lends itself perfectly as the controller for a sophisticated home security system Using the on board interfaces available the Raspberry Pi can be expanded to allow the connection of a virtually infinite number of security sensors and devices The Raspberry Pi has the processing power and interfaces available to build a sophisticated home security system but at a fraction of the cost of commercially available systems Building a Home Security System with Raspberry Pi starts off by showing you the Raspberry Pi and how to set up the Linux based operating system It then guides you through connecting switch sensors and LEDs to the native GPIO connector safely and how to access them using simple Bash scripts As you dive further in you ll learn how to build an input output expansion board using the I2C interface and power supply allowing the connection of the large number of sensors needed for a typical home security setup In the later chapters of the book we ll look at more sophisticated topics such as adding cameras remotely accessing the system using your mobile phone receiving intrusion alerts and images by e mail and more By the end of the book you will be well versed with the use of Raspberry Pi to power a home based security system that sends message alerts whenever it is triggered and will be able to build a truly sophisticated and modular home security system You will also gain a good understanding of Raspberry Pi s ecosystem and be able to write the functions required for a security system Style and approach This easy to follow guide comprises a series of projects where every chapter introduces a new concept and at the end of the book all these concepts are brought together to create an entire home security system This book features clear diagrams and code every step of the way Building a Home Security System with BeagleBone Bill

Pretty,2013-12-17 Building a Home Security System with BeagleBone is a practical hands on guide for practical hands on people The book includes step by step instructions for assembling your own hardware on professionally manufactured PCB s and setting up the software on your system This book is for anyone who is interested in alarm systems and how they work for hobbyists and basement tinkerers who love to build things If you want to build the hardware described in this book you will need some basic soldering skills but all the parts are of the thru hole variety and are very easy to put together When it comes to software you can just run it as is but if you want to modify the code you will need knowledge of Java and IDEs **The Complete Idiot's Guide to Home Security** Tom Davidson,Lorna Gentry,2001 Covers creating a home security plan assessing local public safety agencies planning a budget alarm systems home surveillance and protecting a car Security Electronics Circuits Manual R M MARSTON,1998-08-28 The application of electronics to security systems has now reached a level of sophistication that offers great benefits to those willing and able to design and build innovative circuits To replace his best selling Electronic Alarm Circuits Manual Ray Marston has written this completely new book covering the whole field of security devices and systems including a range of new circuit designs using some of the latest techniques and ideas This guide will be invaluable for engineers and technicians in the security industry It will also prove to be a useful guide for students and experimenters as well as giving experienced amateurs and DIY enthusiasts a number of ideas that will help protect their homes businesses and properties Exploratory Shaft Facility Preliminary Designs - Gulf Interior Region Salt Domes Parsons Brinckerhoff/PB-KBB.,1983 *Exploratory Shaft Facility Preliminary Designs - Paradox Basin* Parsons Brinckerhoff/PB-KBB.,1983 *Raspberry Pi: Amazing Projects from Scratch* Ashwin Pajankar,Arush Kakkar,Matthew Poole,Richard Grimmett,2016-09-26 Explore the powers of Raspberry Pi and build your very own projects right out of the box About This Book From robotics to gaming this Learning Path will unlock your creativity Build your own impressive IoT projects to transform your home Featuring some of Packt s very best Raspberry Pi content this Learning Path doesn t just get you to your destination it opens up a whole horizon of possibilities Who This Book Is For Want new ideas for your next Raspberry Pi project Got one lying around gathering dust This Learning Path gets you straight into the creative dirty work of programming and playing with your pi Whether your new to Raspberry Pi or an experienced maker we think this Learning Path will inspire you and get your creative juices flowing What You Will Learn Discover an awesome range of Raspberry Pi projects Bridge the gap between software and hardware through your Pi and find out how to make an operating system interact with cameras and other hardware Find out how to use your Raspberry Pi for gaming Secure your home with this tiny computer Make science fiction a reality build a walking robot In Detail Looking for inspiration for your next Raspberry Pi project Not sure where to begin This Learning Path is the perfect place to begin providing you with an accessible yet comprehensive journey through Raspberry Pi Following three modules you ll soon be confident and prepared to get creative with your microcomputer Raspberry Pi by Example is the first module in this Learning Path and it does exactly what it says It

doesn't just teach it shows you how to go and build some awesome Raspberry Pi projects immediately Build and play your own games with the Pi build a complete Internet of Things home automation system that controls your house through Twitter let your imagination run wild In the next module we'll look in more depth at building a home security system You'll be using some of the skills you developed through the first module but apply them to something more intricate and impressive Using a Linux based operating system as the foundations you'll gradually build up an entire security infrastructure adding cameras remote controls and even intrusion alerts In the final module we'll take you into the world of Raspberry Pi robotics By the end of it you'll have built a biped robot that can interact with its environment This Learning Path combines some of the best that Packt has to offer in one complete curated package It includes content from the following Packt products Raspberry Pi By Example by Ashwin Pajankar and Arush Kakkar Building a Home Security System with Raspberry Pi by Matthew Pole Raspberry Pi Robotics Essentials by Richard Grimmer Style and approach It's not every day you build a home automation system It's not every day you build a walking robot But with this Learning Path you'll do just that So get started and let this tiny computer expand your imagination
