Multicampus University Systems Ishmael I. Munene, 2014-08-27 In the face of increasing social demand and cutbacks in state budgetary support universities in African countries are now turning towards a multicampus system strategy As African governments have adopted neoliberal education policies that place premium on entrepreneurialism profit making privatization and markets as drivers of university development a reshaping of the academic work and organizational framework have taken place However little is known about the impact of this paradigm shift on access quality and governance in higher education This book fills the void in research and academic knowledge about the impact of the emerging university configurations in Africa It analyzes the paradox surrounding the performance of multicampus university systems as avenues of broadening university access but whose structural success may be qualitatively contested This book offers a refreshing examination of the African multicampus university system from both an African and global perspective It makes use of empirical data from Kenya collected during extensive fieldwork along with substantive library and documentary resources on the rest of the continents to fortify arguments and demonstrate important conclusions This allows for a comparative analysis of policies and strategies used in the establishment of campuses both within and beyond national boundaries in the continent and will be a welcome contribution to the existing repertoire on African universities *The Report: Kenya 2017* , As the largest economy in the EAC and COMESA in terms of GDP Kenya has positioned itself as a major economic power in sub Saharan Africa Traditionally a largely agrarian economy Kenya has quickly entrenched its position as a manufacturing logistics and technology hub in the region and this diversification forms a solid platform from which the government can generate economic growth over the coming years The resolution of the electoral process improving business confidence and strong private consumption are likely to support GDP expansion over 2018 and into 2019 In April 2018 the IMF estimated the economy would expand by 5.5% in 2018 and 6% in 2019 compared to 4.8% in 2017 *Competence-Based Curriculum and E-Learning in Higher Education* Keengwe, Jared, Gikandi, Joyce W., 2023-04-14 Higher education is characterized by ubiquitous digital technologies and e learning that are inevitably influencing the development of core competencies and professional skills requirements There is a need to focus on the synergy between responsive curriculum implementation and e learning delivery in the context of effective pedagogical practices and optimal integration of digital technologies Similarly we need to reexamine higher education practices towards innovative pedagogies and effective e learning design Competence Based Curriculum and E Learning in Higher Education brings together researchers in the field of education and professionals who design and deliver online learning in higher education to share paradigms perspectives insights contextualized experiences challenges and best practices Covering topics such as mobile learning activities student interaction promotion and social media technologies this major reference work is a comprehensive resource for instructional designers faculty administrators and educators of higher education students in teaching programs IT managers librarians

The Status of Student Involvement in

University Governance in Kenya Mulinge, Munyae M., Arasa, Josephine N., 2017-05-05 This book examines the concept of the democratization of governance in universities in Kenya with particular emphasis on students involvement in governance processes and decision making Data were collected from members of the student community utilizing a structured self administered questionnaire and from purposively selected key informants and focus group discussants drawn from Kenyatta University representing the public sector and the United States International University representing the private sector The guiding argument for the study was that shared governance one of the principles of good governance is critical in enabling the universities to deliver their visions and the missions effectively The results revealed that while in principle Kenyan universities have embraced democratic governance in which all stakeholders including students have a role to play in practice they continue to violate the core principles of good governance particularly shared governance Specifically students who are major stakeholders in university education are largely excluded from significant structures of governance thereby

limiting their influence and participation Although their representation is mainly provided via student self governance organs unions associations and or councils their effectiveness is undermined considerably by the lack of trust and confidence of the student body and the unending manipulation by top university administrators and external political actors Student active involvement in decision making is mainly confined to lower levels such as the school faculty and departmental programme The authors call for a paradigm shift in the involvement of students in the governance of universities in ways that discourage the current culture of tokenism and political correctness that characterizes public and private universities in Kenya

In and Out of Africa Joanna Boampong, 2012-11-30 New areas of intellectual endeavours including postcolonial transatlantic global and cultural studies have facilitated conversations that cut across traditional academic boundaries Indeed aside from precipitating more stimulating intellectual dialogues the advent of multi disciplinarity has also enabled literary and cultural theorists critics students and teachers to connect and to integrate diverse academic disciplines and schools of thought in the pursuit of a common task Of the many areas that have benefited from this trend it is perhaps in the realm of Afro Hispanic Luso Brazilian and Latin American studies that one notices a vibrant conversation that deals with the deep historical social economic and political bonds that have connected and still connect Africa to the Hispanic and Luso Brazilian worlds As these bonds acquire profound meanings in the late 20th and early 21st centuries scholars from diverse academic backgrounds find new ways to explore these connections It is in the spirit of this endeavour that the creative artists scholars of cultural and literary theory and critics whose works are presented in this anthology attempt to examine wide ranging themes from colonization slavery imperialism religion music and literature Most of the essays in this collection address long standing issues related to identity construction linguistic legacies religious and cultural beliefs and practices Others confront questions of migration and immigration configurations of female agency and Hispanic pedagogy in Africa and elsewhere What makes this volume unique and interesting is not only the idea of exploring examining and thinking the old in new ways and the new in old ways but also advancing the conversation of the relationship between Africa and the Afro Hispanic Luso Brazilian and Latin American worlds through different intellectual and artistic prisms

academic integrity in the last 20 30 years New technologies that have made it easier than ever for students to cut and paste coupled with global media scandals of high profile researchers behaving badly have resulted in the perception that plagiarism is on the rise This in combination with the massification and commercialisation of higher education has resulted in a burgeoning interest in the importance of academic integrity how to safeguard it and how to address breaches appropriately What may have seemed like a relatively easy topic to address students copying sources without attribution has in fact turned out to be a complex interdisciplinary field of research requiring contributions from linguists psychologists social scientists anthropologists teaching and learning specialists mathematicians accountants medical doctors lawyers and philosophers to name just a few Because of this broad interest and input this handbook serves as the single authoritative reference work which brings together the vast growing interdisciplinary and at times contradictory body of literature For both established researchers practitioners and those new to the field this Handbook provides a one stop shop as well as a launching pad for new explorations and discussions
