Global Economic Prospects, June 2015 The World Bank,2015-06-22 Global growth is expected to be 2.8 percent in 2015 but is expected to pick up to 3.2 percent in 2016. Growth in developing countries and some high income countries is set to disappoint again this year. The prospect of rising borrowing costs will compound the challenges many developing countries are facing as they adapt to an era of low commodity prices. Risks to this outlook remain tilted to the downside. This edition of Global Economic Prospects includes two Special Features that analyze the policy challenges raised by the two transitions in developing countries: the risks associated with the first U.S. central bank interest rate increase since 2006 and the implications of persistently low commodity prices for low income countries. Global Economic Prospects is a World Bank Group Flagship Report that examines global economic developments and prospects with a special focus on developing countries on a semiannual basis in January and June. The January edition includes in depth analyses of topical policy challenges faced by developing countries while the June edition contains shorter analytical pieces.

Legal Protection of Foreign Direct Investment. A Critical Assessment with Focus on South Africa and Zimbabwe Talkmore Chidede,2016-09 This study undertakes a critical assessment of the legal protection of foreign direct investments (FDI) in South Africa and Zimbabwe by determining their compliance with the international minimum standards, norms and or best practices on the legal protection of FDI by host states. Firstly, the study argues that foreign investment is much needed in South Africa and Zimbabwe to improve economic growth and development, to create jobs and to increase their competitiveness. However, these benefits are not accrued automatically but rather host states need to create an enabling environment to receive such benefits. Thus, host states need to put an investment scheme into operation to guarantee the legal protection of foreign investments. South Africa and Zimbabwe have at large crafted and implemented investment laws and related policies which tend to be hostile towards foreign investments. Therefore, similar investment laws and related policies in both jurisdictions are analysed. This study will also offer recommendations for a legal investment which is not only flexible, friendly and favourable to foreign investment in South Africa and Zimbabwe but also advances their local economic policies.

African Canadian Leadership Tamari Kitossa, Erica S. Lawson, Philip S.S. Howard,2019-07-15 Challenging the myth of African Canadian leadership in crisis, this book opens a broad vista of inquiry into the many and dynamic ways leadership practices occur in Black Canadian communities. Exploring topics including Black women's contributions to African Canadian communities, the Black Lives Matter movement, Black LGBTQ HIV/AIDS advocacy, motherhood and grieving, mentoring and anti-racism, contributors appraise the complex history and contemporary reality of blackness and leadership in Canada. With Canada as a complex site of Black diasporas, contributors offer an account of multiple forms of leadership and suggest that through surveillance and disruption, practices of self-determined Black leadership are incompatible with and threatening to White structures of power in Canada. As a whole, African Canadian Leadership offers perspectives that are complex, non-aligned and in critical
